Ordnance Survey Plan

Published 1953 - 1955

Source map scale - 1:2,500

The historical maps shown were reproduced from maps (predominantly held at the scale accepted for England, Wales and Scotland in the 1840's. In 1854 the 1:2,500 scale was selected for mapping urban areas and by 1890 it covered the whole of what were considered to be the cultivated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1855, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

Large-Scale National Grid Data

Published 1993 - 1995

Source map scale - 1:1,250

Large Scale National Grid Data succeeded OS maps Ordnance Survey's Survey of Information on March[illegible] in 1952, and continued to be produced until 1995. These ranged were the first systems of digital mapping and so provide detailed information on houses and trees, but are to show less topographic features such as vegetation. These maps were produced at both 1:2,500 and 1:1,250 scales.

Large-Scale National Grid Data

Published 1994

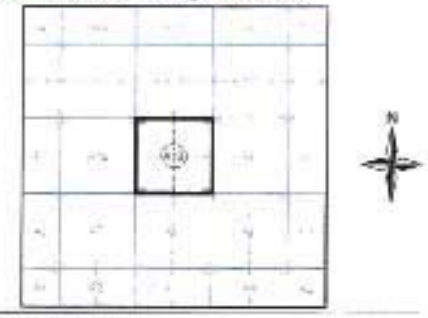

Source map scale - 1:1,250

Large-Scale National Grid Data superseded SIM cards (Ordnance Survey's Survey of Information on Microfilm) in 1992, and continued to be produced until 1999. These maps were the fore-runners of digital mapping and so provide detailed information on houses and roads, but tend to show less topographic features such as vegetation. These maps were produced at both 1:2,500 and 1:1,250 scales.
