Statement from Manchester City Councils' Planning & Accommodation Support Services.

Armitage Primary School – Provision of new temporary classroom unit.

A temporary unit, consisting of two classroom spaces will be sited adjacent to the playing field elevation, and close to the main school access and also the car park.

The unit will not encroach on the existing football pitches and running track areas and will be positioned as close to the main school building as practically possible.

The unit will be installed, and up and running for September 2012, for a period of no longer than 5 years.
A more permanent solution is being sought with a scoping meeting already held at the school due to increased pupil numbers, and PASS are presently awaiting the designs and costings. A decision can then be made on commencing with the proposed scheme.

The increase in admissions for extra places will be thirty. as a previous thrity was accommodated in a unit installed 2009. The school will manage any immediate difficulties due to the proposed increase in numbers.

The unit will not encroach on the existing football pitches and running track areas and will be positioned as close to the existing classroom unit as possible.
