

OPTION A - remove top shrubbery
butt ramp up to steps: retain long shrubbery area:
would have to deal with grid and gully beneath

OPTION B - Retain enough of top shrubbery to
bypass cutting into gully/grid area: will lose more
of long shrubbery although gully run will still have
to be investigated.

OPTION C - Retain all of top shrubbery to
bypass cutting into gully/grid area - will lose more
of long shrubbery although gully run may still have
to be investigated.
