7. Identification Of Tree(s) And Description Of Works

Please identify the tree(s) and provide a full and clear specification of the works you want to carry out. Continue on a separate sheet if necessary. Please provide the following information below : tree species (and the number used on the sketch plan) and description of works. Where trees are protected by a TPO you must also provide reasons for the work and, where trees are being felled, please give your proposals for planting replacement trees (including quantity, species, position and size) or reasons for not wanting to replant.
E.g. Oak (T3) - fell because of excessive shading and low amenity value. Replant with 1 standard ash in the same place.

an established sycamore of at least 30 years which is in good health but is leaning on the boundary wall adjoning 17 the grove and 809 wilmslow road. i am applying to do pruning from the top of the tree through an arborist and to complete this procedure i will need the access to the garden at the rear of 809 wilmslow road . the couple in the property will not allow me this access so i have to go through the correct procedure of planning even it is only a small pruning job which will take 10 mins of an arborists time
