

● THIRD FLOOR LEVEL - LOCATION OF PROPOSED INTERNAL WORKS.
(NO WORKS TO EXTERIOR TO BE UNDERTAKEN)

6.0 Conclusion

The fit-out of the 3rd Floor East Suite does not have an impact upon the historically significant elements of the building. The design is in line with the modern and refurbished internal finishes found throughout the building - as noted, no interior elements exist that predate the 1980s facade retention and therefore interior finishes are considered to be of low historical significance.
