Sevendale House – Access Provision

A disabled person will use the platform lift on Dale Street adjacent to the main entrance (see **Figure 1**) then make their way to the centrally located reception desk. The person on reception will open the security access entrance which is located in front of the lifts; the disabled person will then take the lift down to the lower ground floor (there are three lifts two of which are new glass lifts, the third is the lift located in the original lift shaft, this goes to the lower ground floor).

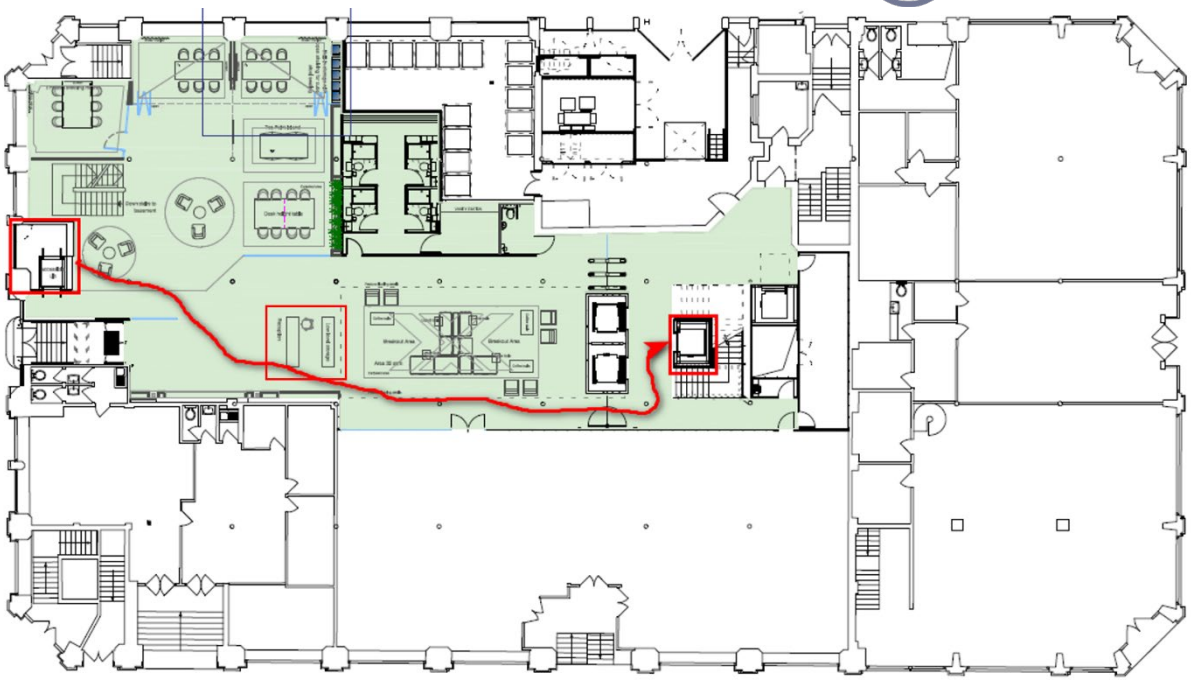

This route is shown overleaf in **Figure 2** with the platform lift, reception desk, and lift all marked with a red line boundary.

When they exit the lift the gym entrance is immediately on their left. All gym members have an app on their phone to allow access to the gym non gym members cannot gain access. This route is also shown overleaf in **Figure 3**.
