

Proposed Extension to Wythenshawe Masjid, 7 Moor End, Northenden, Manchester M22 7JQ

Proposed Vehicle Cross Over

August 2025

Issue 1

Wythenshawe Masjid – Proposed Extension

Proposed Vehicle Cross-Over

The current car parking space at the front of the building are accessed through a couple of crossover points as well as across the existing kerb as can be seen in Figure 1 below. This is a historical arrangement, but in creating the extension and new access, it is proposed that the parking access will be formalised and brought in line with current standards.

Figure 1 – Photo showing existing car park access arrangement.

Figure 2 shows an illustration of the current arrangement and Figure 3 shows the proposed new arrangement, with a cross over provided in accordance with the City Council's Design Guide. In addition to pavement strengthening, there is one existing manhole cover that will also need to be lowered to match the new pavement profile.
