Comment Details

Commenter Type: Neighbour
Stance: Customer objects to the Planning Application
Comment Reasons:
Comment:The pitches are located very close to residential properties, myself included. When in use they generate a lot of noise, even with double glazed doors and windows shut, shouting, screaming and blowing whistles can be clearly heard within the adjacent properties. With doors and/or windows open, the problem gets even worse. If the use times are extended into the evenings and weekends you are not allowing local residents any peace and quiet in their own homes, we will be constantly having to listen to this noise. We would not have any time to relax and unwind in our own homes, to switch off and enjoy some quiet time. To impose this upon residents would not be good for my mental health or that of my neighbours and would be completely unfair to subject us to this noise every single day.
