

365 Self Storage Container Yard

6 Whitworth Street M11 2GR

Waste Management Plan

1. Introduction

This document outlines the Waste Management Plan for the **365 Self-Storage Container Yard** at the **land on the south side of Whitworth Street, Openshaw, Manchester M11 2GR**.

Waste management can be applied by individuals and business following the waste hierarchy:

“5Rs” (Refuse, Reduce, Reuse, Repurpose, Recycle)

The best approach is to prevent waste from being created in the first place.

2. Implement sustainable procurement:

- Purchase only what is needed from sustainable sources to reduce overall consumption and waste.
- Improve supply chain sustainability. Encourage supplier to adopt reusable crates and totes instead of single use packaging.
- Work with eco-friendly supplier, choose supplier that use minimal or recyclable packaging and offer products that come in bulk or refillable options.

3. Go paperless:

- Switch to digital bills and documents to reduce paper

4. Promote waste segregation:

- Place clearly labelled , colour coded bins for different types of waste, such as paper, plastic, glass and compostable items

5. Invest in waste management machinery:

- Utilize balers to compress materials like cardboard and plastic to reduce storage space and lower transport costs.

6. Educate staff

- Ensure employees are aware of waste reduction practices and understand how to properly sort recyclables.
