Cross Section

3mm Aluminium tray powder coated RAL 9005

5mm Opal Acrylic

Gold translucent vinyl

LED Lights 1000K

The diagram shows a cross-section of the LED display assembly. It consists of a 3mm Aluminium tray (powder coated RAL 9005) which houses the LED Lights (1000K). The tray is covered by a 5mm Opal Acrylic layer, which is further protected by a Gold translucent vinyl layer. The diagram illustrates the internal components and their arrangement within the display frame.
