Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why the requirement does not apply to the development.

- ☐ Yes
- ☒ No

☒ Yes, the plans do incorporate areas to store and aid the collection of waste.

Proposed Waste Storage Provisions:

Location:

A dedicated bin storage area is proposed at the rear of the site, accessible via the gated vehicle access off Worrall Street.

Types of Waste to be Accommodated:

General Waste – standard non-recyclable waste generated from daily use of the facility

Recycling Waste – paper, cardboard, plastics, cans, and other recyclable materials

Food Waste – waste associated with the kitchen and foodbank operations

Sanitary Waste – from the WC facilities, managed via standard waste services

The bin store is appropriately sized for commercial wheeled bins and designed for easy collection by local waste services without impacting pedestrian or vehicle access.

Have arrangements been made for the separate storage and collection of recyclable waste?

☒ Yes

☐ No

If Yes, please provide details:

Yes, arrangements have been made for the separate storage and collection of recyclable waste.

Details:

A designated external bin storage area at the rear of the site will accommodate:

Recyclable waste bins (paper, plastics, cardboard, cans)

General waste bins

Food waste bins (due to kitchen/foodbank use)

The bin store will be clearly labelled and compartmentalised to support waste segregation in line with Manchester City Council's commercial waste collection requirements.

This approach supports sustainable site operation and reduces environmental impact.
