Description of site/building

Listed building: Grade II

Conservation area: Deansgate Conservation Area 1985

Tree Preservation Order: Not applicable

Sunlight House is located on the corner of Quay Street and Little Quay Street in the city centre of Manchester. Sunlight House is a Grade II listed building completed in 1932 by Joseph Sunlight, architect and developer, as the headquarters for his property business, with offices and shops to let. At the time, it was Manchester's tallest building. The building is also located within the Deansgate/ Peter Street Conservation Area.

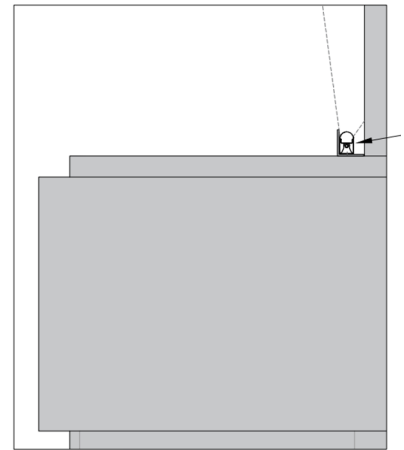

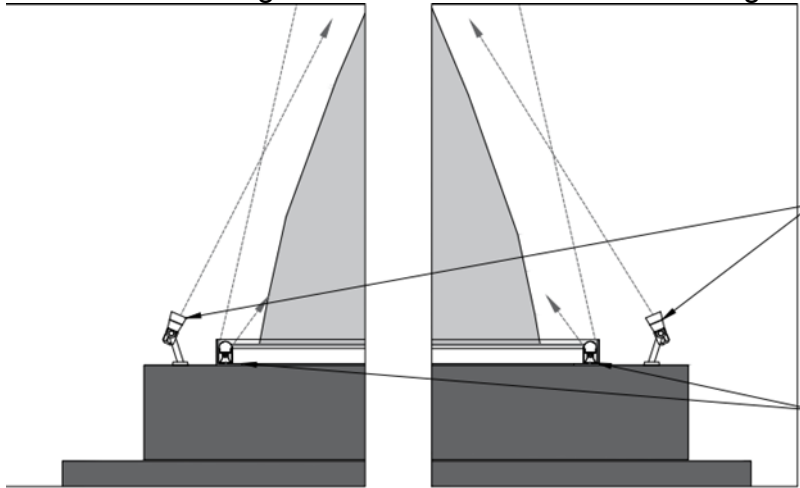

The building is a 14 storey (15 including roof plant to western side) steel and concrete structure, clad in Portland stone. The building is almost square in plan, with three street frontages, and a large central light-well. Each of the three street facades are seven bays, with the two street corners expressed as three sided towers, which each rise to a four level octagonal turret, topped by a domed lantern and finial. Behind and between the turrets, the top four floors are expressed as a mansard roof with multiple setback square dormer windows, which together with the turrets create a distinctive skyline and a major feature in the city.

Sunlight House has been extensively modernised throughout including refurbishment works previously throughout the building since its original construction.

The application site is located in the heart of the city centre. Quay Street contains a variety of commercial uses and buildings.

Description of development

Permission is sought for the installation of external lighting:

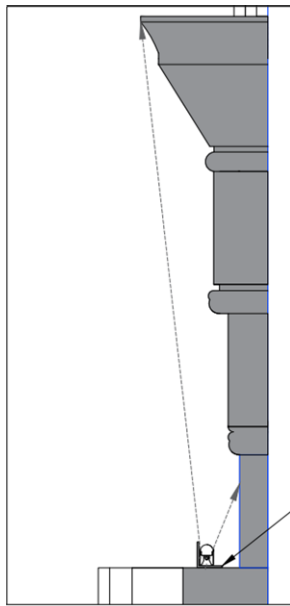

Section A: Detail of Dome Lighting

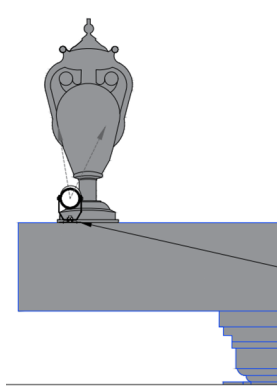

- 2no. Roblight fibreoptic lenses to spotlight each eagle motif
- Linear LED lighting to illuminate domes

Section B: Detail of Eleventh Floor Lighting

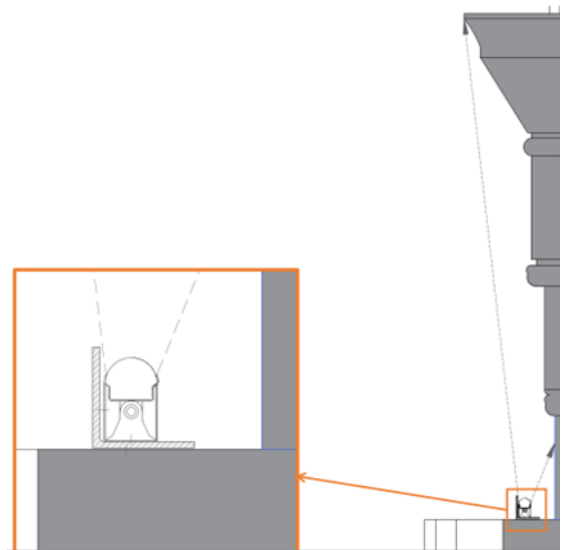

- Linear LED lighting to illuminate towers

Section C

Section D

LED Lighting Bracket

Section C: Detail of Plinth Lighting

- Linear LED lighting to illuminate central cornices/parapets

Section D: Detail of Vase Lighting

- Miniature spotlights to illuminate vases

Section: LED Lighting Bracket

- Installation of bracket to prevent any glare

First Floor Upward and Downward Lighting to Towers

- Installation of spotlights to first and second floors to light towers

Visuals of the proposed lighting

Corner of Quay Street and Little Quay Street

Little Quay Street

Quay Street

Atkinson Street

Consultations & Notification Responses

Publicity – The proposal has been advertised, by way of site notice and press advertisement, as affecting the setting of a listed building and the conservation area. Letters have also been sent out to local businesses and residents. No comments have been as part of that process.

Highways Services – No objections

Environmental Health – No objections subject to a condition for restricting luminance levels to maximum of 300 cd/m²

Greater Manchester Police – No comments to make

Issues

Visual amenity and heritage

The original lighting scheme has been amended as the lighting to the second floor has been removed. The current proposal seeks to focus on highlighting key architectural features of the building.

The specification of lighting varies and consists of miniature spotlights, spotlights and linear LED lights. The spotlights are considered to be appropriately positioned to emphasize the eagle motifs located on the dome towers, the vases on the ground floor and each of the towers.

The lighting to the central cornice/parapet, tower parapets and domes consists of linear LED lighting. The LPA consider this would create a consistent and unbroken lighting of key features of the building.

The function of the lighting is for upward lighting and therefore incorporated within the lighting fixing is a bracket which will act as a casing to prevent any light spill directly outwards. This will avoid a consistent beam of light across the building façade which would have detracted and negatively impacted on the listed building.

The applicant has advised the bracket fixing for lighting will be aluminium or steel. The fitting will be bespoke and designed to ensure any new penetrations will be through existing penetrations or mortar joints which is welcomed by the LPA. The exact details and finish of the bracket will be secured through condition.

The cabling for the associated lighting will utilise existing cabling routes as shown on a submitted layout plan and within a submitted method statement. The methodology is accepted by the LPA and any works shall be carried in accordance with these details.

Whilst the submitted details have confirmed any interventions to historic fabric would be minimised where possible, there would be a low level of less than substantial harm through the siting of lighting and associated bracket detail. Subject to a condition for final details to be submitted for approval by the LPA.

In line with the requirements of paragraph 215 of the NPPF where less than substantial harm occurs this must be set against the public benefits of the scheme.

There are benefits to the proposal as the new lighting would highlight key architectural features and allowing the building to be admired and celebrated at night. The low level of less than substantial harm is considered to be outweighed by this public benefit.

The proposal complies with policies SP1, CC9, EN1, EN3 and DM1 of the Manchester Core Strategy, saved UDP policies DC18 and DC19, Places for Everyone Plan policy JP-P2, and guidance within the National Planning Policy Framework and the Planning (Listed Buildings and Conservation Areas) Act 1990.

Residential Amenity and Public Safety

The lighting will be dimmable, and the brightness may vary across the building. The applicant has confirmed the lighting will not exceed a luminance level of 300cd/m². This is an acceptable maximum brightness, and the lighting would not detract from visual amenity and general neighbouring amenity. Environmental Health have no objections and have recommended a condition is attached to restrict the maximum luminance levels.

The LED linear lighting will project upwards to highlight features of the listed building. The spotlights are either angled upwards or downward and would not be angled in the direction of the users of the highway network. Highways Services have no objections to the proposal.

The City Councils Lighting Team have been consulted and confirmed the lighting does not impact upon the existing street lighting. They further advised care should be taken to avoid excessive sky glow. Given the reduction in lighting and as lights are only sited to key architectural features, it is not considered to appear excessive or cause any unacceptable impact on amenity.

Subject to a condition that would limit the proposed advertisement's luminance to that in line with the proposed, it is considered the proposal is acceptable in this regard and therefore accords with Core Strategy Policy DM1 and the National Planning Policy Framework

Other Legislative Requirements

Equality Act 2010

Section 149 (Public Sector Equality Duty) of the Equality Act 2010 requires due regard to the need to: Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act and; Advance equality of opportunity between persons who share a protected characteristic and persons who do not share it. The Equality Duty does not impose a legal requirement to conduct an Equality Impact Assessment. Compliance with the Equality Duty involves consciously thinking about the aims of the Equality Duty as part of the process of decision-making.

Human Rights Act 1998 considerations

This application needs to be considered against the provisions of the Human Rights Act 1998. Under Article 6, the applicants (and those third parties, including local residents, who have made representations) have a right to a fair hearing and to this end the local planning authority must give full consideration to their comments.

Protocol 1 Article 1, and Article 8 where appropriate, confer(s) a right of respect for a person's home, other land and business assets. In taking account of all material considerations, including Council policy as set out in the Core Strategy and saved policies of the Unitary Development Plan, the Director of Planning, Building Control & Licensing has concluded that some rights conferred by these articles on the applicant(s)/objector(s)/resident(s) and other occupiers and owners of nearby land that might be affected may be interfered with but that that interference is in accordance with the law and justified by being in the public interest and on the basis of the planning merits of the development proposal. She believes that any restriction on these rights posed by the recommendation given is proportionate to the wider benefits of and that such a decision falls within the margin of discretion afforded to the Council under the Town and Country Planning Acts.

Recommendation: Approve

Article 35 Declaration

Officers have worked with the applicant/agent in a positive and proactive manner based on seeking solutions to problems arising in relation to dealing with the application

Condition(s) to be attached to decision for approval

- 1) The development must be begun not later than the expiration of three years beginning with the date of this permission.

Reason - Required to be imposed pursuant to Section 91 of the Town and Country Planning Act 1990.

- 2) The development hereby approved shall be carried out in accordance with the following drawings and documents:

- Atkinson Street Façade Lighting: 542-ORC-XX-00-DR-E-63 REV 3
- Quay Street Façade Lighting: 542-ORC-XX-00-DR-E-6300 REV 3
- Little Quay Street Façade Lighting: 542-ORC-XX-00-DR-E-6301 REV 3
- Lighting Design Intent: 00542 SUNLIGHT HOUSE PLANNING ISSUE (P5) (Pages 1-14 and 22-28)

All stamped as received by the City Council as Local Planning authority on the Received 5 June 2025

Reason - To ensure that the development is carried out in accordance with the approved plans. Pursuant to policies CC9, EN1, EN3, SP1 and DM1 of the Core Strategy, saved policy DC19.1 and Sections 12 and 16 of the National Planning Policy Framework, policy DC19.1 and Sections 12 and 16 of the National Planning Policy Framework.

- 3) The maximum luminance of the lighting hereby approved shall not exceed 300 cd/m2 in brightness at any time.

Reason - In the interests of visual and residential amenity pursuant to policies SP1, EN3 and DM1 of the Manchester Core Strategy and saved policies DC14.1 and DC18.1 of the Unitary Development Plan for the City of Manchester.

Informative

1. The applicant is required to discuss and agree any requirements for licensing, hoarding / scaffolding, and skips with MCC's Highways Licensing Team via Email to: highwaylicences@manchester.gov.uk.
2. The applicant is required to discuss and agree any requirements for temporary pedestrian and traffic management with MCC's Event and Traffic Management Team via Email to highwaynetworkmanagement@manchester.gov.uk.
