

Re: Pre-commencement conditions for application 143024/FO/2025

From [REDACTED]
Date Tue 22/07/2025 09:29
To Jennifer Atkinson [REDACTED]

Hi Jennifer,

The updated plan showing the bin storage area for the units in the arches is accepted.

I will expect further discussion re external music in Sister Square.

Kind Regards

Hi Jen,

Further to the below comment from the EHO re the missing waste plan in Appendix B of the Waste Strategy – please see attached relevant plan. To confirm this is not a new drawing however an updated version of the one submitted as a separate drawing (with a label included to make clear where the Viaduct waste storage will be located).

Kind Regards

Josh Wyatt-Smith

Some of the consultee comments are included in the attached.

Some additional comments below. Please note I do not have highways comments as yet.

Thanks Jen

Ecology

I will need a condition that if demolition does not commence before 30 April 2026 then the building will be reassessed for bat roosting.

In terms of BNG, I will need to take a monitoring fee to enable us to monitor the on site BNG. Please can you agree to the figure of £11,246 to do this and provide your clients solicitor details so I can commence the work on the legal agreement?

Environmental Health

Fumes

*The applicant will need to consult with a suitably qualified ventilation engineer and submit a kitchen fume extract strategy report for approval. The strategy should include risk assessments for odour and noise and be based on appropriate guidance such as that published by EMAQ titled 'Control of Odour and Noise from Commercial Kitchen Exhaust Systems' dated May 2022. Details should also be provided in relation to replacement air. For new kitchen extract systems calculated to have a 'high' or 'very high' impact risk score, 'very high levels of control' in accordance with the EMAQ guidance are required to minimise emissions of PM2.5 and its precursors as far as is reasonably practicable in accordance with Defra Interim Planning Guidance - PM2.5

Noise commercial

We have read Chapter 16 of the Environmental Statement, base build limits have been included for noise breakout. An addendum report will be required for each proposed commercial usage (including flexible uses/community spaces and the arches) once a tenant/use is known in case any additional mitigation measures are required. Should a gym be proposed then an addendum report will need to be submitted in accordance with the ProPG: Gym Acoustics Guidance (GAG), March 2023.

Noise external areas

The EHO does not support the use of Sister Square for any events with amplified music. Can we have a chat about this?

Plant

Within chapter 16 of the Environmental Statement limits have been set for external plant, as the plant is still unknown an addendum report will be required once the items of plant have been selected to reassess the noise and determine if any mitigation measures are required. This addendum is required for part a) of the condition

Waste

The proforma/ Waste Management Strategy seems acceptable, the plan in appendix B of the Waste Strategy does not appear to show the proposed waste storage area for the units within the viaduct.

Air Quality

*The assessment must include NO2 as well as particulate matter and have regard to Defra's PM2.5 Targets: Interim Planning Guidance. We need to agree baseline/real time monitoring locations for PM10. Baseline monitoring to commence three months before commencement (if possible). Good practice principles need to be applied for this development which will include the provision of electric vehicle charging points for the proposed disabled parking bays, the specifications of which will need to be agreed.

Ground conditions

The PRA and SI are accepted; they are still to provide a remediation strategy with details of the further delineation sampling due to elevated hydrocarbons.
