Hi Lea

Having reviewed the queries, I can confirm

Scope of Works Point 7. “Sign to be flush with Glazing. Insulated aluminium panel to interior face. Halo illuminated”

- This item was superseded by the advertisement application. Point 7 no longer applies in the format within the DAS – I can confirm there is no illuminated signage nor aluminium panel planned. The design intent is now as per the 143564/AO/2025 application for surface mounted lettering to a glazed panel which matches the existing signage to the building elsewhere, image below

I have also received an email from you on the 10th September but I believe this was the incorrect scheme? I've attached it for your reference.

Apologies again for the delay in responding

Kind Regards

Mike Bamford
