Thanks Rudi. The tree will thank us, and also look better for the surrounding community, it will be good for a good number of years.

I look forward to your email John . 🌳

Best Regards.

Thanks for the clarification.

I can see what you're trying to achieve, and I can understand the need for maintaining a manageable crown given the trees position.

Your proposal looks more like a 3-4m height reduction and a 1-2m lateral branch reduction.

The 6m height reduction was concerning, however, subject to natural target pruning being carried out in accordance with BS:3998, we would have no objection to this proposal.

You will need to await confirmation from John Kelsey.

Kind regards

Thanks Rudi, I can I've attached it's, obviously they are rough, but each and every neighbour I'm sure will be pleased once we have worked out magic, Intend to leave it looking natural, and beautiful like we do with every tree, it will have all the heavy scruffy growth removed from the top, the sides all brought in and shaped, lifted and thinned out, the tree to be honest is in a very bad place, it's far to close to the houses etc, it will be made safe for years to come, and will look very pleasing on the eye. 🌳👍 The picture is just rough, but you get my idea, it will look great!

Best Regards.

Thanks for that, I see now.

Can you annotate one of the images to give me an idea of how you propose to leave the tree?

Kind regards

Hi Rudi.

That's the wrong tree, I've added some images of the tree, it's right near that but on the little passage..... They first wanted to remove it.

Images attached.

Best Regards.

Hi Christian,

23 Elm Grove Manchester M20 6PQ - 143600/TPO/2025

I am reviewing your proposal for the Horse Chestnut on Elm Grove.

I have annotated an image of the tree to try and understand the 6m reduction and your vision for this tree.

I am currently failing to see the benefit of such a heavy crown reduction. The tree being large is not a concern so long as the tree is found to be in good condition. Are you proposing to reduce the height due to stability concerns?

Can you annotate a google image to show me how much you propose to reduce the tree by?

Kind regards
