Dear Planning Department,

Project: Roof mounted solar panels to non-domestic buildings

Address: Loreto College, Chichester Road South, Manchester, M15 5PB

Please find attached our application for the above project, seeking approval for the installation of a 365 kWp solar photovoltaic (PV) system on the rooftops of four existing non-domestic buildings within the College grounds.

The proposed development involves the strategic placement of solar panels across suitable roof areas to maximise energy generation while minimising visual and structural impact.

The primary objective of the project is to enhance the sustainability of the site through on-site renewable energy generation, which will contribute to carbon reduction goals and improve operational energy efficiency.

We believe that the information provided in this application is sufficient, but should you require any additional details or wish to discuss any aspect of the project further, please do not hesitate to contact us.

Thank you for your consideration.

Kind regards,

Luke Strange
