Comment Details

Commenter Type: Neighbour

Stance: Customer made comments in support of the Planning Application

Comment Reasons:

Comment: I strongly support the proposed change of use of Rye Bank Fields to community woodland and meadow. This is an important opportunity to protect and enhance a valued green space for the benefit of the whole community.

Transforming the land into woodland and meadow will:

Safeguard biodiversity by creating vital habitats for plants, birds, insects, and other wildlife.

Provide a peaceful and accessible space for local people to walk, relax, and connect with nature, improving health and wellbeing.

Ensure the land remains a shared community resource, rather than being lost to development.

Support education and engagement opportunities for schools, families, and community groups to learn about the environment and conservation.

Contribute to tackling climate change through tree planting and the restoration of natural ecosystems.

Rye Bank Fields is a much-loved local green space, and this application will protect it for present and future generations. I fully support the change of use to community woodland and meadow.
