19 August 2025

Job: William Hulme's Grammar School

Job Code: WHGS1

Subject: **EXTERNAL MATERIALS SCHEDULE**

1. Glazing unit samples and specification to unisex basement toilets:

Image ref: IMG_8615

Stippolyte toughened glass, 6mm nominal thickness.

*Lead came (strips) to be 3/8" 'H' section flat lead **

Internal beading to be putty beaded, shaped to an angle finish.

All to match existing being replaced.

** Lead piece joints to be soldered together with a solder consisting of lead and tin. Cement (putty used in stained glass consisting of calcium carbonate, linseed oil, white spirits and a black pigment) pushed into the gaps between the lead and glass to ensure water tightness and increase the panel's stability. The excess cement is cleaned away and the panel is polished to darken and age the lead.*

2. Glazing unit samples and specification to female/male basement toilets:

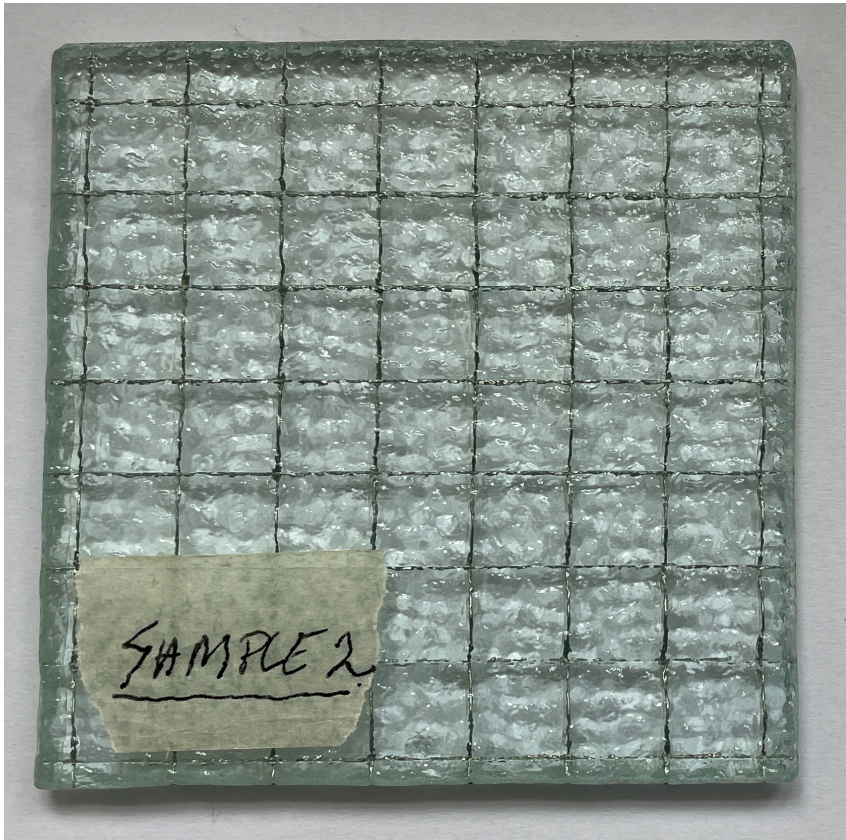

Image ref: IMG_8616

Georgian Glass Wired, Square wired mesh pattern, obscured, 6/7mm nominal thickness.
Internal beading to be chamfered timber beading.
All to match existing glazing being replaced.
