Comment:re: Application Ref, 143413

I support this development because Ryebank Fields represents a vital green space in the midst of a heavily built-up area. It is valued by local naturalists, including botanists, entomologists and ornithologists. It is also valued by local people who value informal green spaces.

We are losing biodiversity, both nationally and locally, and it is no exaggeration to say that this represents an existential threat.

Most local people are aware that there unknown quantities, of, possibly toxic, waste material buried under this site, and it is best left undisturbed to avoid contaminating local air and water.

In my opinion the best option is to retain Ryebank Fields as a community woodland and meadow. Such a development would benefit the local community and the local environment. I urge you to support it.
