143182/ TCA/2025. 8A Northen Grove- remove mixed saplings and cherry

Dear John Kelsey,

We do not object to this application because the wild cherry would grow too large for its position in front of a small house. 8a has been neglected for some time

We ask that a smaller tree is replaced on the frontage to maintain amenity and a green aspect on this section of Northen Grove which could easily become denuded of vegetation. We would suggest amelanchier as a suitable species to replant which also benefits bird life and has excellent amenity value, otherwise hawthorn, ,holly,field maple, crab apple, rowan or white beam would be welcome.

I attach a photo of a similar small property further up Northen Grove as an example of where, despite limited space, a small tree and landscaping has been combined with off street parking to make a good contribution to the Conservation Area

Kind regards,

Alison Hunt- Environment Officer, WDRA
