Comment Details

Commenter Type: Neighbour

Stance: Customer made comments in support of the Planning Application

Comment Reasons:

Comment: Dear planning committee members,

I support the above referenced planning application for the following reasons:

1. Provision of much needed greenspace for the local populations in an urban area. The covid pandemic highlighted the importance of greenspace on population health; we should not fail to learn from the experience of covid.
2. Supports wildlife population including protected flora and fauna of conservation concern. The site is recognised as of biological importance.
3. Contributes to the council target to reduce the impact of climate change by carbon sequestration.
4. Provides space for community events and therefore enhances the local community environment.
5. Has a number of excellent proposals including community orchard and has the potential to enhance the local area by providing a site for collaborative projects to support mental health.

Please acknowledge this submission and advise where it will be logged for future reference.
