Product Specification – Stainless Steel Safety Door

This stainless steel safety door is designed for superior security, durability, and environmental resistance. It features a robust multiple-point locking system and heavy-duty hinges for maximum protection. The internal filling consists of a fireproof board and a moisture-resistant board, providing enhanced fire safety, insulation, and resistance to humidity. The brushed stainless steel finish offers a sleek, modern appearance while ensuring excellent corrosion and wear resistance. Ideal for both residential and commercial applications.

Product Name:	Stainless Steel Safety Door
Size:	1000*2200mm
Thickness:	120mm
Color:	Grey
Surface Treatment:	Brushed Stainless Steel
Lock Set:	Multiple Point Locking System for Enhanced Security
Hinge:	Heavy-Duty Hinges for Durability and Stability
Filling Material:	Fireproof Board & Moisture-Resistant Board
