Appendix C – Importation Documentation
Appendix D – Cover System Photo Records

1 INTRODUCTION

GroundSolve Ltd was commissioned by Greatledge Printers Ltd (GP) to undertake a verification of the imported material from the recommendation of a simple engineered cover system proposed by Manchester City Council.

This report has been devised to generally comply with the relevant principles and requirements of a range of guidance including:

- Part IIA of the Environment Protection Act, 1990
- BS5930:2015: "Code of practice for site investigations"
- BS10175: 2011 +A2:2017 "Investigation of Potentially Contaminated Sites - Code of Practice"
- The Building Regulations 2010. Part C (HM Government 2013)
- Environment Agency: Land Contamination Risk Management (LCRM), Version 3, October 2020
- Environment Agency (2017) "The Environment Agency's Approach to Groundwater Protection" November 2018 Version 1.2.

1.1 Proposed Development

The proposed development is understood to construct two warehouse buildings with concrete floor slabs, external concrete yard to the front and hard surfacing to the other areas.

The findings and conclusions of the risk assessments have been set out and recommendations given for the proposed industrial.

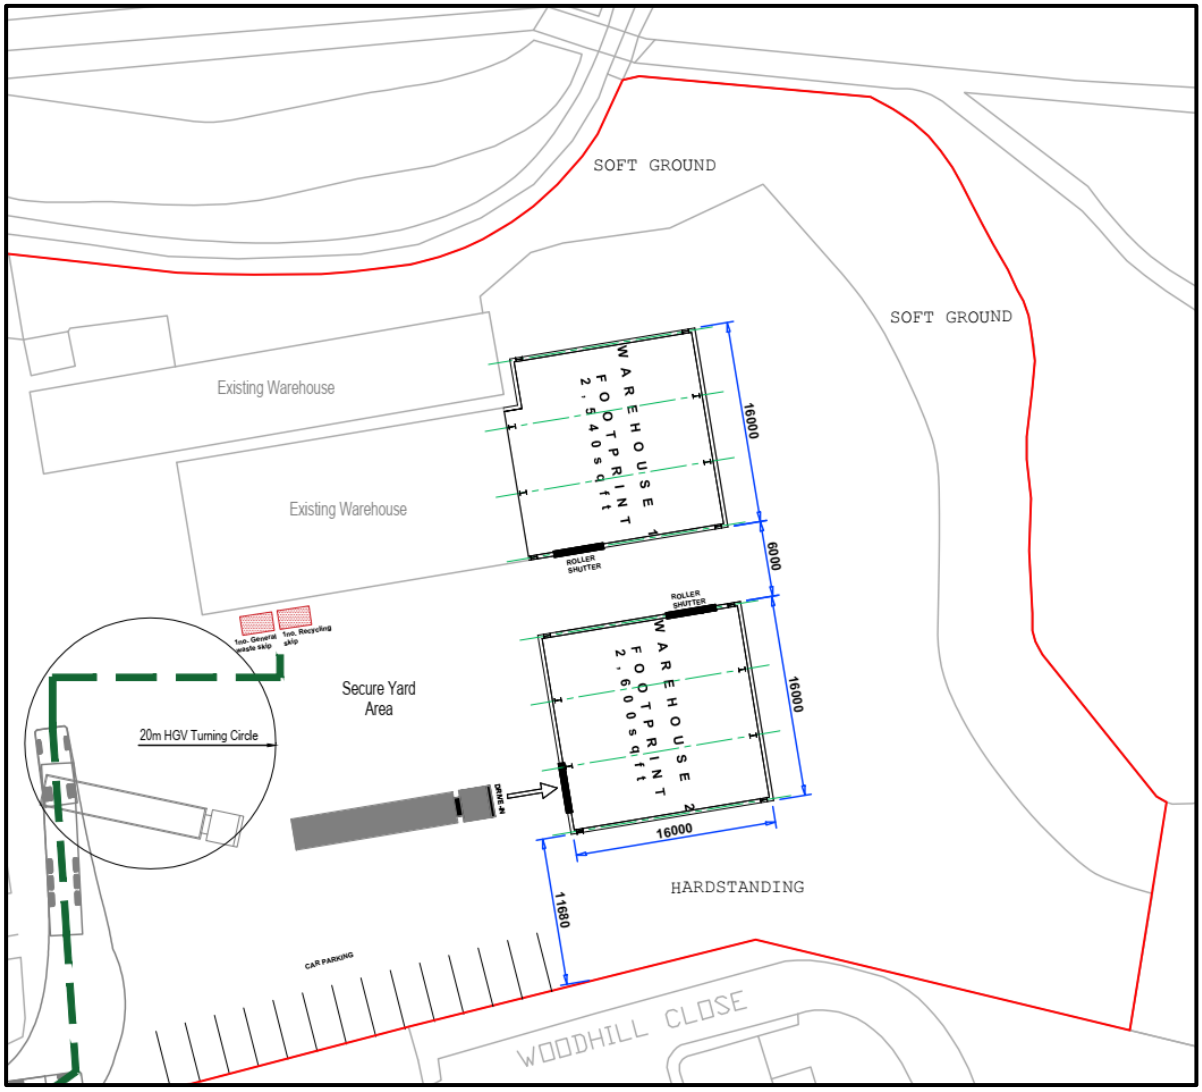

Figure 1 Extract from proposed development plan

1.2 Previous Investigations

The following reports have already been undertaken and will be summarised in Section 3:

- 18-1075 – Phase 1 Contaminated Land Risk Assessment – August 2018
- 18-1075 – GeoEnvironmental Assessment Letter Report Revision B – January 2019
- 1374162.nfj – Phase 3 Remediation Statement – March 2019

The previous site investigation reports are discussed and summarised in **Section 3** of this report.

1.3 Limitations

This report has been prepared for the sole use of Greatledge Printers. No other third party may rely upon or reproduce the contents of this report without the written approval of GroundSolve Ltd. If any unauthorised third party comes into possession of this report, they rely on it entirely at their own risk.

2 SITE DETAILS AND DESCRIPTION

Table 2.1 Current Site Overview.

Site name	Greatledge Printer
Site address	Gorebrook Works, Pink Bank Lane, Longsight, M12 5GH
National Grid Reference (NGR)	387574E , 395577N
Approximate Site area	0.23ha
Site shape	Rectangular.
Current land use on the Site	There are two industrial units present on site.
Surrounding land uses	Predominantly residential to the south with industrial and commercial units to the north and west. To the east dense woodland.
General topography and ground levels	General topography levels are at an elevation of 55mAOD.

3 PREVIOUS INVESTIGATIONS

Previous reports have already been undertaken and the findings are summarised:

- 18-1075 – Phase 1 Contaminated Land Risk Assessment – August 2018
- 18-1075 – GeoEnvironmental Assessment Letter Report Revision B – January 2019
- 1374162.nfj – Phase 3 Remediation Statement – March 2019

Table 3.1 Summary of main findings from the Phase 1 Report.

Summary of main findings from the Phase 1&2 Report	
Site History	The historical land use of the Gorebrook Works was the manufacture of textile machines, which extended onto site from approx the 1950s. The more recent use of the main Gorebrook Works was as a print works. The proposed development area has been used as open storage with the western portion surfaces with Yorkstone Flags and gritstone cobbles.
Geological Setting	Superficial deposits – Till (Diamicton), Devensian. Bedrock – Chester Formation (sandstone).
Mining	The site is not located within a high-risk development area and no shafts or adits are present on or near the site.
Radon	The site is located in an area with affected properties less than 1%.
Hydrogeology	Superficial deposits (Glacial Till) – Secondary Undifferentiated Aquifer (low vulnerability) Bedrock (Chester Formation) – Principal Aquifer (low vulnerability). 261m southwest. Historical abstraction borehole at Whitefield Golf Club for spray irrigation. The site is not located within 500m of a Source Protection Zone or Source Protection Zone within a confined aquifer
Waste	There are is a historical landfill on site – inert, household and commercial waste. There are a licenced waste management site 43m north of the site.
Contamination Sources	Contaminants from construction of existing dwelling and past historic uses could include; • Heavy metals, • Polycyclic aromatic hydrocarbons (PAH), • BTEX compounds, • Volatile Organic Compounds (VOC), • Asbestos • Ground gases (Carbon dioxide and methane).
Scope of Phase 2 Site Investigation	The scope of ground investigation works carried out at the site by GHG Consulting Ltd comprised: • 7No. machine excavated trial pits, • Sampling for chemical testing of soils,
Findings of the Phase 2 Ground Investigation	The sequence of strata encountered beneath the site was as follows: • Made Ground – Variable Made Ground was encountered in all trial pits comprising: ○ Sandy clayey ash/clinker with brick, masonry, roof tile and occasional steel slag. • Alluvial deposits – only encountered TP01 – dark brown fine sandy Clay • Glacial till – all locations – Firm becoming very stiff brown slightly sandy slightly gravelly Clay
Phase 2 Conclusions – Geoenvironmental	**Human Health:** The selected samples exceeded the GAC values for lead and cyanide, PAH, petroleum hydrocarbons or other contaminants. Asbestos fibres were recorded in TP01 and TP04. **Controlled Waters:** No unacceptable risks. **Ground Gases (Human Health / Property):** No ground gas protection measures required.

Summary of main findings from the Phase 1&2 Report	
	New development The proposed warehouse development will occupy the majority of the study site and therefore break the pathway between any Made Ground and users of the site. It is understood that a small area of soft landscaping will be present around the eastern boundary. Any materials that go off site to landfill or recycling should be accompanied with all relevant chemical test certificates.
Remediation Strategy	In order to break potential pollutant linkages to future commercial end users, it is recommended that soft landscaped areas across the site should have a Simple Engineered Cover System consisting of a separator geotextile and a granular cover of 300mm. The submitted documents state that the development will have no water supply and therefore the recommendation for further work and potential on pipework is not required.

4 VERIFICATION OF COVER SYSTEM

4.1 Waste Removal

The proposed development required the removal of excess material, which was then sent to landfill. The removal of material was carried out in two phases. The first phase was carried out by Booth Ventures between February and April 2019. Heidelberg Materials managed the second phase of removal which was carried out between 7th December and 27th Aug 2021. The documentation of the waste transfer information is given in **Appendix A**.

4.2 Cover System

The previous risk assessments have concluded that a simple engineered remediation measure is required to address risks to human health. The verification of the remediation measures installation was required.

The followings actions were agreed with the Manchester City Council:

- 300mm cover of engineered granular fill over a geotextile layer.

4.3 Unexpected Contamination

No unexpected contamination was encountered during construction works.

Prior to the removal of materials to landfill, Northwest Asbestos Removal inspected the area around TP01 and TP04. A total of 1200kg of Chrysotile cement containing material was picked, bagged and removed to appropriate landfill under waste code 17-06-05. The waste transfer information is given in **Appendix B**.

4.4 Source of Imported Material

The cover system comprises limestone quarry stone from Tyrone Stone Ltd. The delivery information is found in **Appendix C.**

4.5 Description of Imported Material

The Cover System Material has been described as being a grey angular fine to coarse gravel of limestone.

4.6 Verification of Engineered Granular Material

The presence of the geotextile layer and the 300mm thickness of limestone granular material have been confirmed on site. Photographical records are presented in **Appendix D**.

5 CONCLUSIONS

5.1 Conclusions

The waste materials produced on site have been removed in the appropriate manner and documentation is provided in Appendix A.

Asbestos was encountered in the area of TP01 and TP04. The Chrysotile cement containing material was picked, bagged and removed to appropriate landfill.

The inspection of the simple engineered cover system shows that the geotextile is present, and the material is the suitable thickness. Therefore the cover system complies with the remedial measures agreed with Manchester City Council.

Environment Agency

PART A Notification details

1 Consignment note code: NORTHW / NWA39

2 The waste described below is to be removed from (name, address, postcode, telephone, e-mail, facsimile):
Greatledge Printers
Gorebrook works Pink bank lane
Longsight M12 5TH.

3 Premises code (where applicable): —

4 The waste will be taken to (name, address and postcode):
Bradley Park waste LTD Lower Quarry Rd Huddersfield HD2 1FN.

5 The waste producer was (if different from 2) (name, address, postcode, telephone, e-mail, facsimile):
Northwest Asbestos Removals LTD
3 Albion St Pendlebury Industrial Est M27 4FG

PART B Description of the waste

If continuation sheet used, tick here ☐

1 The process giving rise to the waste(s) was:

2 SIC for the process giving rise to the waste:

3 WASTE DETAILS (where more than one waste type is collected all of the information given below must be completed for each EWC identified)

Description of waste	Lists of wastes (EWC code)(6 digits)	Quantity (kg)	The chemical/biological components of the waste and their concentrations are: Component	Concentration (% or mg/kg)	Physical form (gas, liquid, solid, powder, sludge or mixed)	Hazard code(s)	Container type, number and size
CEMENT	170605	1200	CHRYSOTILE	7 1 %	SOLID	HP7	VAN

The information given below is to be completed for each EWC identified

EWC code	Packing group(s)	UN identification number(s)	Proper shipping name(s)	UN class(es)	Special handling requirements
170605	iii	2590	White Asbestos	9	CV13 CV28.

PART C Carrier's certificate

(If more than one carrier is used, please attach schedule for subsequent carriers. If a schedule of carriers is attached tick here. ☐)

I certify that I today collected the consignment and that the details in A2, A4 and B3 are correct and I have been advised of any specific handling requirements.

Where this note comprises part of a multiple collection the round number and collection number are: /

1 Carrier nam [redacted]
On behalf of (name, address, postcode, telephone, e-mail, facsimile):

2 Carrier registration no./reason for exemption: GN08 JXL

3 Vehicle registration no. (or mode of transport, if not road): [redacted]

Sig [redacted]

PART D Consignor's certificate

I certify that the information in A, B and C above is correct, that the carrier is registered or exempt and was advised of the appropriate precautionary measures. All of the waste is packaged and labelled correctly and the carrier has been advised of any special handling requirements.
I confirm that I have fulfilled my duty to apply the waste hierarchy as required by Regulation 12 of the Waste (England and Wales) Regulations 2011.

1 Consignor name [redacted]
On behalf of (name, address, postcode, telephone, e-mail, facsimile):

As above

[redacted]

Date 29/04/2019 Time

PART E Consignee's certificate (where more than one waste type is collected all of the information given below must be completed for each EWC)

Individual EWC code(s) received	Quantity of each EWC code received (kg)	EWC code accepted/rejected	Waste management operation (R or D code)
170605	2120	✓	D1

1 I received this waste at the address given in A4 on: Date 29/4/19 Time 1440

2 Vehicle registration no. (or mode of transport if not road): GN08 JXL 29/04

3 Where waste is rejected please provide details:

I certify that waste management license/permit/authorised exemption no(s). LP3434HA

authorises the management of the waste described in B at the address given in A4.

Where the consignment forms part of a multiple collection, as identified in Part C, I certify that the total number of consignments forming the collection are:

Name: Moldova
On behalf of (name, address, postcode, telephone, e-mail, facsimile):
BPWY
HD2 1FN

[redacted]

Date 29/4/19 Time 1440
