Description

Please describe details of the proposed development or works including any change of use

The existing pump house contains water attenuation and hydrant facilities. While continuing to fulfil its operational purpose, it has been subject to progressive deterioration over time. The most significant issue identified relates to the roof structure, where repeated water ingress has been recorded. This has contributed to ongoing decay and presents a medium-term risk to the integrity of the building. In contrast, the walls and primary structure is sound. The external envelope, aside from the roof, continues to provide stability and a secure housing for the equipment contained within. This creates an opportunity to retain much of the existing footprint and avoid unnecessary disruption. It is proposed that a new building be constructed directly over the existing footprint of the pump house. This strategy will eliminate the need for demolition, thereby reducing disruption, cost, and environmental impact. Preserve the existing water attenuation infrastructure, ensuring continuity of service during and after construction. Deliver a modernised and more resilient building envelope designed to address the shortcomings of the current roof and provide greater long-term durability.

Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why the requirement does not apply to the development.

Do you believe that, if the development is granted permission, the general Biodiversity Gain Condition (as set out in Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 (as amended)) would apply?

◯ Yes
⊘ No

Biodiversity net gain has been introduced as a general condition for planning permission. As set out in The Environment Act 2021: "grants of planning permission in England [are] to be subject to a condition to secure that the biodiversity gain objective is met". Therefore, in England, all planning permissions are generally subject to biodiversity gain rules, unless they are specifically exempt or out of scope.

If you have stated that the biodiversity net gain requirement does not apply to your application you must provide the reason(s) why, and may also need to supply evidence (especially where you believe the application is eligible for the 'de minimis' exemption).

Please add all the reasons why biodiversity net gain does not apply and enter a justification for each one

Reason biodiversity net gain does not apply:
Development subject to the de minimis exemption (development below the threshold)

What best describes the size of your site?:
Over 25 square metres

Please justify the reason why biodiversity net gain does not apply:
The proposal involves works to an existing building (roof replacement) with no impact on habitats. The biodiversity net gain requirement does not apply.

Note: Please read the help text for further information why developments may be exempt or not in scope.

We utilise the pre-planning service recently added to the portal.
The advice we received was to apply for a full planning permission based on an F2 category including a design and access statement.
The service was excellent.
