Re: TFGM Bus Depot - 2576

Estimator: Jo Rose
Rep: Beth Felton

This schedule has been prepared in conjunction with the following details:

Drawing: 2576-JSA-XX-XX-SH-A-32601
Drawing: 2576-JSA-XX-00-DR-A-01400 Rev: P1
Drawing: 2576-JSA-XX-DR-A-02501 Rev: P1

SPECIFICATION NOTES & POINTS FOR CLARIFICATION

- * Please see the notes on each set type for any questions relating to this schedule that need confirming before an order can be processed.
- * All ironmongery is SAA finish with the exception of the Accessible WC which has a lift to lock set, only available in SSS
- * All doors except the Acc WC have cylinder & turn locks.
- * All doors have pull handle/push plate as requested with the exception of the Acc WC and ED.01

GENERAL NOTES

If our ironmongery is procured with our Hanson and Beards Door Sets, all ironmongery would be delivered in door packs and co-ordinated with the door delivery. We can also offer pre-fitment of all non-projection items of hardware, ensuring correct fitment and reducing installation time and costs. Please note that larger items such as kick plates and pull handles may be supplied in bulk marked individually with door numbers.

All items are supplied complete with fixings suitable for timber doors.

Kick plates sizes are nominal only, the exact sizes will be produced by Synthesis Hardware if doors and ironmongery are procured together or information direct from site if 'ironmongery only' prior to manufacture.

Details of the master key suiting would be required at order stage and Synthesis Hardware would produce a master keyed schedule for the Architect / client to complete.

Sample boards and loose samples are available at request.

For further details please contact our sales office quoting the above project number.

This schedule is subject to our standard Terms and Conditions which are available upon request
