|---|---|
| ■ Food Waste Bin | ■ Dry Mixed Recycling Bin |
| ■ General Waste Bin | ■ Animal By-Products Bin |
| — Internal collection routes | — External collection routes |

Collection methods:

The majority of waste is generated on the first floor. During business hours, all waste is sorted and deposited into designated bins located in respective rooms or zones. At the end of each business day, waste from the first floor is collected and transported via a predetermined route to the ground-floor waste storage area. All waste is collected by a licensed disposal company on a weekly basis.

Pet waste shall be deposited in designated Animal By-Products Bin, while pet waste contaminated with non-recyclable bedding materials shall be disposed of in general waste bins.
