Commenter Type: Member of the Public

Stance: Customer made comments in support of the Planning Application

Comment Reasons:

Comment:I fully support this application. Ryebank Fields is a rewilded green space in the heart of Chorlton providing ecological, social, and psychological benefits for local residents. It is an area of rich biodiversity in an era of biodiversity and climate crises, located in a highly nature depleted city in one of Europe's most nature depleted countries. It is surrounded by brown field sites within a mile radius where housing developments are taking place or planned, so is not needed to help solve the housing crisis in the city. It is on the site of a possible toxic dump that needs to remain capped and undisturbed for the health and safety of local residents. This application will be beneficial to nature, the environment, local residents and the city and region as a whole - Ryebank Fields has the potential to be recognised as an important part of the region's biodiversity and nature recovery strategy.
