Comment Details

Commenter Type: Member of the Public

Stance: Customer made comments in support of the Planning Application

Comment Reasons:

Comment:I absolutely support this submission, this will protect the local environment and protect a biodiverse area which the local community benefit from in terms of the effect on the local environment. The alternative planning application puts so much risk into the nearby community with hazardous substances that would be disturbed, the effect of the additional cars and infrastructure on the local residents and schools nearby from a pollution, hazard increase through the additional cars and the carbon impact of the remediation works and building works.

This application protects the space and the community from these issues and is ultimately more protective of the local community
