Subject: RE: Manchester Digital Campus - Great Ancoats St

Hi Sam

Sorry for the delay – I have just reviewed your RAMS for the boundary wall take down and erections of the hoarding and happy with the content.

As you know we don't own the towpath along the boundary here (only short section adjacent to the lock), however we have a right of access for our customers / boaters along this section.

I note you are wanting to install a Heras fencing during the demolition, therefore you may need to speak with the landlords of the towpath.

However, can you please confirm the proposed start and end date of the works, so I can inform our customers and operations teams.

Many Thanks

Gareth Taylor (BSc)
