Science & Industry Museum

Power Hall

Application Number 140596/LO/2024

Condition 3

5 no. large backlit images are to be fixed to the internal walls as part of the exhibition and interpretation installation providing historical context the building and museum collection.

Each of the images will be fixed to wall using a proprietary bracket system at high level. The number of brackets for each unit is relative to their size with up to 3 no. brackets for the largest units. Up to 2 no. fixings per unit will fix the units to the wall providing structural stability. Fixings will be stainless M6 100mm bolts. As per the previously approved strategy for fixing into historic material, fixings have been kept to a minimum required and where possible will be fixed into mortar joints.

Elevation drawings highlighting approximate fixing locations for each of the large images are included here:

PHL-CGA-00-XX-DR-A-4_06212 - Proposed Internal Elevations 01-03 copy

PHL-CGA-00-XX-DR-A-4_06213 - Proposed Internal Elevation 04-05

Additional details on bracket fixings are included here:
