John,

7 Stratford Avenue Manchester M20 2LH - 143354/TCA/2025

The applicant has submitted the following proposals:

1. Goat Willow - Reduce the growth and stump 15cm back from the rear edge of the path. (removing the tree to a low stump)
2. Goat Willow - Reduce all top growth to 10cm stubs and maintain regrowth on a 2 yearly cycle due to decay in stump.
3. Cherry - Reduce side growth by 1.5 - 2 metres to the approximate points of the previous reduction. (The tree has minimal growth on the top following the previous reduction).
4. Hawthorn - Reduce in height by approximately 2.5 metres and prune to shape.
5. 2x Silver Birch - Reduce the taller tree by approximately 3 metres and prune side limbs to shape. Reduce the smaller tree to a corresponding height (if any height reduction is required). Prune lateral limbs on the property side by 1 metre to control overhang over the rear yards.
6. Bird Cherry - Reduce in height by 2 metres.
7. Leaning Cherry - Reduce by 1.5 metres (to below the level of the wires) and prune to shape.
8. Silver Birch and Hawthorn - Reduce the Birch in height by 2-2.5 metres and prune lateral branches on the property side by 1 metre to control overhang over the rear yards.
12. Ivy clad stump - Fell to ground level.
13. Dead Ivy clad Cherry - Fell to ground level.
15. Cherry - Heavily suppressed and included main union. Sectional dismantle to ground level.
17. Hawthorn - Reduce by approximately 2 metres in height and prune to shape.

I can confirm that we would have no objection to the proposed routine pruning works for this site.

Kind regards
