Delegated officer report for planning application

Application no.	143156/LO/2025
Date registered valid:	18 June 2025
Proposal:	Listed Building Consent for the installation of 18no. louvres to 3rd floor.
Address:	Bridgewater House, 58 - 60 Whitworth Street, Manchester, M1 6LT
Ward(s):	Piccadilly Ward
Applicant:	Mr Paul Crowe, APAM
Agent (if any):	Mr Don Murphy, Paul Butler Associates
Case officer:	Jack Naven Tel: 0161 219 2095 Email: jack.naven@manchester.gov.uk
Recommendation:	Approve
Date of recommendation:	**08 August 2025**

Application Details

Type of application: Listed Building Consent

Development type: Listed building alteration

Date of site visit: 26 June 2025

Departure from Development Plan: No

Environmental Statement: Not required

Description of Site/Area

Listed building: Grade II

Conservation area: Whitworth Street Conservation Area 1985

Tree Preservation Order:

The site relates to the Grade II Listed Bridgewater House, an office building bounded by the Palace Theatre, Whitworth Street, a multi storey car park and the Rochdale Canal.

It is located in an area of Manchester City Centre that accommodates a large number of Grade II and Grade II* former warehouses that are now used as hotels, offices and residential accommodation. It is also located within the Whitworth Street Conservation Area.

The building was built in 1912 as a shipping warehouse by Harry S. Fairhurst. It is ten storeys in height including a ground floor. It has a steel frame and is cladded with Sandstone Ashlar and White Glazed Terracotta with a concealed roof and is in keeping with the typical construction techniques of the Georgian Period.

The character of the surrounding area comprises many different uses, including the Palace Theatre, shops, restaurants, hotels, residential accommodation, offices, takeaways and cafés.

Description of Development

The proposal seeks listed building consent for the installation of 18no. louvres to 3rd floor.

14 no. louvres shall by installed on the elevation that faces to the back of the Palace Theatre, whilst 4 no. louvres shall be installed on the elevation facing the courtyard at the rear of the building, which is situated next to the Rochdale Canal.

Related Applications

143155/FO/2025 - Installation of 18 no. louvres to the 3rd floor.
Approved in tandem with this application.

Consultations & Notification Responses

Publicity - Neighbour notification letters were sent to surrounding properties. A site notice and local press advert were also produced. At the time of writing this report, no representations have been received because of this publicity.

Policy

The effect of the proposal on the affected heritage asset has been considered under the following criteria.

The Adopted Core Strategy for the City of Manchester (2012)

SP1 (Spatial Principles) advises that development in all parts of the City should protect and enhance the built environment.

EN1 (Design Principles and Strategic Character Areas) advises that developer's will be expected to consider the City's heritage, including its listed buildings, conservation areas, archaeological remains and historic street pattern.

EN3 (Heritage) advises that throughout the City, the Council will encourage development that complements and takes advantage of the distinct historic and heritage features of its districts and neighbourhoods, including those of the City Centre and that proposals which enable the re-use of heritage assets will be encouraged where they are considered consistent with the significance of the heritage asset.

CC9 (Design and Heritage) advises that development in Manchester should preserve or enhance the heritage assets affected.

DM1 (Development Management) advises that all development should be appropriately sited, scaled, formed, massed, and detailed with appropriate layout and materials and should have regard to the character of the surrounding area and effects on built heritage.

The Unitary Development Plan (UDP) for the City of Manchester (1995)

DC18.1 (Conservation Areas) states that the Council will give particularly careful consideration to development proposals within Conservation Area. The Council will seek to preserve and enhance the character of its designated conservation areas by carefully considering; the relationship of new structures to neighbouring buildings and spaces; and the effect of major changes to the appearance of existing buildings.

DC19.1 (Listed Buildings) states that the Council will have regard to the desirability of securing the retention, restoration, maintenance and continued use of such buildings and to protecting their general settings by; not permitting any external or internal alterations or addition to a listed building where, in its opinion, there would be an advise effect on its architectural or historic character; and seek to preserve and enhance the setting of listed buildings by appropriate control over the design of new development in their vicinity, control over the use of adjacent land, and where appropriate, by the preservation of trees and landscape features.

Places for Everyone

The Places for Everyone Plan is a Joint Development Plan Document, providing a strategic plan and policies, for nine of the 10 boroughs which make up Greater Manchester.

JP-Strat2 (City Centre) states that the role of the City Centre as the most significant economic location in the country outside London will be strengthened considerably. The City Centre will continue to provide the primary focus for business, retail, leisure, culture and tourism activity in Greater Manchester, but the increasingly important residential role of the City Centre will be expanded. It will be a priority for investment in development and infrastructure. This will include addressing current network capacity issues in the City Centre which will enable the future expansion of the rapid transit public transport network across Greater Manchester. Improvements in the public realm, walking and cycling facilities, and green infrastructure will help to enhance the local character and environmental quality of the City Centre so that it can rival city centres across the globe, enabling it to compete effectively at the international level for investment, businesses, skilled workers, residents and tourists. A broad range of commercial accommodation will be delivered, helping the City Centre to capture growth across key economic sectors. The new functions within the City Centre will be delivered in a way that complement, rather than displace the area's non-residential functions and will seek to protect and enhance the city centre's historic environment and assets.

JP-P1 (Sustainable Places) states an aim to become one of the most liveable city regions in the world, consisting of a series of beautiful, healthy, and varied places, each having the following key attributes that all development, wherever appropriate, should be distinctive, with a clear identity, visually stimulating, socially inclusive, resilient, adaptable, durable, resource efficient, safe, supported by critical infrastructure, functional and convenient, incorporating accessibility, legible easy to move around, well connected, comfortable and inviting, incorporating high quality and well managed green infrastructure and public realm, well served by local shops, services and amenities.

JP-P2 (Heritage) aims to proactively manage and work with partners to positively conserve, sustain and enhance its historic environment and heritage assets and their settings. Opportunities will be pursued to aid the promotion, enjoyment, understanding and interpretation of heritage assets, as a means of maximising wider public benefits and reinforcing Greater Manchester's distinct identity and sense of place. The policy requires development proposals affecting a designated heritage asset (or an archaeological site of national importance) and a conservation area to conserve those elements which contribute to its significance including those identified in any conservation area appraisal as making a positive contribution to the area. Harm to such elements will only be permitted where this is clearly justified and outweighed by the public benefits of the proposal.

National Planning Policy Framework (NPPF) (2024)

Development decisions should, therefore, accord with the requirements of the **NPPF**, in particular to **section 16 (Conserving and enhancing the historic environment).**

It is a fundamental requirement of the NPPF that planning proposals contribute to the achievement of "sustainable development". In order to meet this key planning objective, in this instance, the development should sustain and contribute to the stimulation of a thriving historic environment.

Section 12 (Achieving well-designed places) advises that the government attaches great importance to the design of the built environment. Good design is a key aspect of sustainable

development, is indivisible from good planning, and should contribute positively to making places better for people.

Section 16 (Conserving and enhancing the historic environment) states the following:

Paragraph 202 advises that heritage assets should be conserved in a manner appropriate to their significance.

Paragraph 207 advises that Local Planning Authorities (LPAs) should require an applicant to describe the significance of any heritage assets affected. The level of detail should be sufficient to understand the potential impact of the proposal on their significance.

Paragraph 208 advises that LPAs should ensure that any conflict between the heritage asset's conservation and any aspect of the proposal is avoided or minimised.

Paragraph 210 advises that in determining applications, LPAs should take account of:
- The desirability of sustaining and enhancing the significance of heritage assets and putting them to viable uses consistent with their conservation.
- The positive contribution that conservation of heritage assets can make to sustainable communities including their economic vitality.
- The desirability of new development making a positive contribution to local character and distinctiveness.

Paragraph 212 advises that when considering the impact of a proposed development on the significance of a designated heritage asset, great weight should be given to the asset's conservation.

Paragraph 213 advises that any harm to or loss of a designated heritage asset should require clear and convincing justification. Substantial harm or loss should be exceptional and substantial harm to or loss of designated heritage assets of the highest significance, including grade I and II* listed buildings should be wholly exceptional.

Paragraph 214 states that where a development proposal will lead to substantial harm to the significance of a designated heritage asset, this harm should be weighed against the public benefits of the proposal, including securing its optimum viable use.

Paragraph 215 advises that proposals of less than substantial harm to the significance of a designated heritage asset should be assessed against the wider public benefits of the proposal.

Paragraph 219 advises that local planning authorities should look for opportunities for new development within conservation areas, and within the setting of heritage assets, to enhance or better reveal their significance.

National Planning Practice Guidance (NPPG)

The National Planning Practice Guidance (NPPG) is a web-based resource which was launched in March 2014 and coincided with the cancelling of the majority of Government Circulars. It provides guidance on many aspects of planning including plan-making and decision taking.

NPPG advises that ‘In the case of buildings, generally the risks of neglect and decay of heritage assets are best addressed through ensuring that they remain in active use that is consistent with their conservation. Ensuring such heritage assets remain used and valued is likely to require sympathetic changes to be made from time to time’ (Paragraph 002).

Other Legislation

Sections 16, 66 and 72 of the **Listed Buildings and Conservation Areas Act 1990** require that special consideration is given to the preservation of the significant fabric and setting of listed buildings and conservation areas.

Issues

In determining whether the proposed works are acceptable, the main issue to consider is the impact these proposed works will have on the historic character and fabric of the listed building itself and to establish whether the public benefits, including heritage benefits, of the proposal will outweigh any harm to the significance of the heritage asset.

Principle of the development

The works are necessary to extend and replace the existing HVAC systems; due to the educational use of these spaces (several of which are laboratory environments), and to enhance the rooms so that they are in accordance with current legislation.

Laboratories and prep rooms require consistent ventilation in order to meet the guidelines laid out in BB101 section 5.7.5 Laboratories and Chemical stores, which at the moment is variable and requires opening windows.

The educational provider (INTO) is unable to measure the current airflow rates with any accuracy. In order to meet these requirements, the installation of full HVAC systems will give comfort that INTO are meeting these guidelines.

Alternative options were considered by the applicant:

- The utilisation of existing internal risers was considered as an alternative to window louvres, but the risers are not large enough to accommodate the newly proposed ductwork required to provide adequate fresh air to the new work areas. These can only accommodate the new air conditioning pipework.

- Utilising existing louvres was considered, and 2 existing louvres can be re-utilised. As is evident from the submitted plan and elevations, these 2 louvres would not give sufficient capacity or coverage for the enhanced ventilation scheme.

- The number of louvres have been minimised based on the maximum airflow achievable through the existing louvres size/window frames to match other floors.

The principle of the development is therefore considered to be acceptable due to the reasons outlined above.

Assessment of significance

The majority of the significance of the building comes primarily from its original front façade (facing on to Whitworth Street), which showcases a classically derived style from renowned architected Harry S. Fairhurst.

Historically, the building served as a significant shipping warehouse, towards the end of the textile industry boom in Manchester.

The external elevations that are affected by the proposal are from the more modern section of the building, which has less historical and architectural significance.

Impact on heritage asset

The works will not directly materially impact upon any original historical fabric to the external façade of the building, but instead to the later additional utilitarian part of the building.

The proposed introduction of external louvres will introduce louvres where there is currently glazing. This will further erode the elevation by altering the aesthetics of the fenestration. This impact is lessened by the fact that the windows affected are modern.

With regards to the west elevation, the rear of the Palace Theatre was extended over the former Bridgewater House vehicle exit route during the 20th Century to create a larger stage area / fly tower.

This blank elevation is in close proximity to the west elevation of Bridgewater House creating a narrow recess, which is where the majority (14) of the proposed louvres will be located. Views of these louvres from an external viewpoint will be extremely limited.

The 4no. proposed louvres to the east courtyard elevation will be visible, particularly when viewed from across the canal. The specification and siting of the proposed louvres will reflect the arrangement and specification of existing louvres on the floors of other elevations facing on to the courtyard.

Whilst the covering letter submitted with the application states that the ducting works will not impact upon any historic fabric, enough detail has not been provided within the application to satisfy the City Council that this is the case. Therefore, a condition has been added to confirm these details.

A condition has also been added to ensure that any exposed ducting, such as any ducting that is located below the suspended ceiling and is clearly visible in the interior space between the suspended ceiling and the window, shall be sprayed black to match the back panel of the louvre to which it is attached to.

There will be a very low level of less than substantial harm caused by a result of these works being carried out.

The City Council does have concerns about the cumulative impact of the various louvres that have been installed on the building and the impact this has upon the visual amenity of the building and the surrounding street scene within the conservation, as well as upon the heritage of this historically significant building.

It is the opinion of the City Council, that an effort needs to be made to remediate the louvres installed across the courtyard elevations of the building. These louvres have been installed in a piecemeal fashion over a period of many years. The amount of louvres across the courtyard elevations would not be considered acceptable by the City Council today and an alternative design solution would be sought.

The City Council would encourage the building owner to come up with a strategy to remediate the louvres across the Courtyard elevations in future. The cumulative impact of the louvres is considered by the City Council to be too much to have any more installed.

If a proposal were to come in for any additional louvres on the courtyard elevations, the City Council may have to take the view that the cumulative impact of these louvres has grown to be too much and would likely not be able to support such a scheme.

In addition to this, the City Council notes that over the last few years in Bridgewater House, there has been investment in removing suspended ceilings to some of the floors and revealing the soffits of the original building, this has ensured that the spatial characteristics of the space have been reinstated.

The approach to services in these locations has been to expose them rather than concealed them.

The 3rd floor ceiling in the area covered by the application is currently a suspended lay in grid ceiling which is unsympathetic and generally harmful to the character of the heritage asset.

The City Council would prefer to see the approach of exposing the ceilings continued for future works on this site.

Public benefits

The works are considered to improve the facilities within the building and its usability in terms of an education use. The continued occupation of the space is considered to be of a public benefit. Without these works being carried out, the operation of the education provider is the space would have been called into question, as they would not have been able to meet to up to date required standards.

Conclusion

In view of the above, this application is considered acceptable, as the works are considered to cause a very low level of less than substantial harm to the special interest and the historic character of the Grade II listed building which would be outweighed by the public benefits outlined above.

Other Legislative Requirements

Equality Act 2010

Section 149 (Public Sector Equality Duty) of the Equality Act 2010 requires due regard to the need to: Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act and; Advance equality of opportunity between persons who share a protected characteristic and persons who do not share it. The Equality Duty does not impose a legal requirement to conduct an Equality Impact Assessment. Compliance with the Equality Duty involves consciously thinking about the aims of the Equality Duty as part of the process of decision-making.

Human Rights Act 1998 considerations

This application needs to be considered against the provisions of the Human Rights Act 1998. Under Article 6, the applicants (and those third parties, including local residents, who have made representations) have a right to a fair hearing and to this end the local planning authority must give full consideration to their comments.

Protocol 1 Article 1, and Article 8 where appropriate, confer(s) a right of respect for a person's home, other land and business assets. In taking account of all material considerations, including

Council policy as set out in the Core Strategy and saved polices of the Unitary Development Plan, the Director of Planning, Building Control & Licensing has concluded that some rights conferred by these articles on the applicant(s)/objector(s)/resident(s) and other occupiers and owners of nearby land that might be affected may be interfered with but that that interference is in accordance with the law and justified by being in the public interest and on the basis of the planning merits of the development proposal. She believes that any restriction on these rights posed by the recommendation given is proportionate to the wider benefits of and that such a decision falls within the margin of discretion afforded to the Council under the Town and Country Planning Acts.

Recommendation: Approve

Article 35 Declaration

Officers have worked with the applicant/agent in a positive and proactive manner based on seeking solutions to problems arising in relation to dealing with the application.

Condition(s) to be attached to decision for approval

1) The development must be begun not later than the expiration of three years beginning with the date of this permission.

Reason - Required to be imposed pursuant to Section 18 of the Planning (Listed Buildings and Conservation Areas) Act 1990.

2) The development hereby approved shall be carried out in accordance with the following drawings and documents, received by Manchester City Council as the Local Planning Authority on 10 June 2025:

- Location Plan
- Proposed Courtyard Elevations A105 Rev A
- Proposed Palace Side Elevations A104 Rev A
- Proposed Third Floor Ventilation Services Layout DR-M-202 Rev T5
- Heritage, Design and Access Statement prepared by Paul Butler Associates

Received by Manchester City Council as the Local Planning Authority on 18 June 2025:

- Proposed 3rd Floor Window Louvre Details

Reason - To ensure that the development is carried out in accordance with the approved plans. Pursuant to policies SP1 and DM1 of the Core Strategy and saved policies DC18 and DC19.

3) Notwithstanding the details as set out in condition 2 above, prior to the commencement of any works that will take place above the existing suspended ceiling, the fixing details and methodology for these installation works, the proposed layout of the ducting, and an agreed specification and methodology for how to carry out any localised repair works that will need to be carried out on any elements above the suspended ceiling, shall be submitted in writing to and be approved in writing by the City Council as the Local Planning Authority.

The approved details shall then be implemented as a part of the development.

Reason - In the interest of visual amenity and as the proposed works affect a building which is included in the Statutory List of Buildings of Special Architectural or Historic Interest so careful attention to building work is required to protect the character and appearance of this building in

accordance with saved policy DC19.1 of the Unitary Development Plan for the City of Manchester and policies SP1, EN3 and DM1 of the Core Strategy.

4) Any exposed ducting, such as any ducting that is located below the suspended ceiling and is clearly visible in the interior space between the suspended ceiling and the window, shall be sprayed black to match the back panel of the louvre to which it is attached to.

Reason - In the interest of visual amenity and as the proposed works affect a building which is included in the Statutory List of Buildings of Special Architectural or Historic Interest so careful attention to building work is required to protect the character and appearance of this building in accordance with saved policy DC19.1 of the Unitary Development Plan for the City of Manchester and policies SP1, EN3 and DM1 of the Core Strategy.

5) The specification and finish of the louvres shall match the louvres installed of the 7th floor of the building.

Reason - In the interest of visual amenity and as the proposed works affect a building which is included in the Statutory List of Buildings of Special Architectural or Historic Interest so careful attention to building work is required to protect the character and appearance of this building in accordance with saved policy DC19.1 of the Unitary Development Plan for the City of Manchester and policies SP1, EN3 and DM1 of the Core Strategy.
