Date: 25 July 2025

Dear Sir/Madam,

Pre-Commencement Conditions
Application number: 139878/FO/2024
28 Edge Lane, Manchester, M21 9JY

In accordance with s100ZA of the Town & Country Planning Act 1990 (as amended), this letter gives notice of the requirement to place pre-commencement condition(s) on any permission arising from the above application.

The required condition(s), and the reason(s) for them are as follows:

Condition 5) Prior to the commencement of development, details of a sustainable surface water drainage scheme and a foul water drainage scheme shall be submitted to and approved in writing by the City Council as Local Planning Authority. The drainage schemes must include:

(i) An investigation of the hierarchy of drainage options in the National Planning Practice Guidance (or any subsequent amendment thereof). This investigation shall include evidence of an assessment of ground conditions and the potential for infiltration of surface water in accordance with BRE365;
(ii) A restricted rate of discharge of surface water agreed with the local planning authority (if it is agreed that infiltration is discounted by the investigations);
(iii) Levels of the proposed drainage systems including proposed ground and finished floor levels in AOD;
(iv) Incorporate mitigation measures to manage the risk of sewer surcharge where applicable; and
(v) Foul and surface water shall drain on separate systems.

Prior to occupation of the proposed development, the drainage schemes shall be completed in accordance with the approved details and retained thereafter for the lifetime of the development.

Reason - To promote sustainable development, secure proper drainage and to manage the risk of flooding and pollution, pursuant to national policies within the NPPF and Policies EN8 and EN14 in the Manchester Core Strategy.

Condition 9) Before the development hereby approved commences, a report (the Preliminary Risk Assessment) to identify and evaluate all potential sources and impacts of

any ground contamination, groundwater contamination and/or ground gas relevant to the site shall be submitted to and approved in writing by the City Council as local planning authority. The Preliminary Risk Assessment shall conform to City Council's current guidance document (Planning Guidance in Relation to Ground Contamination).

In the event of the Preliminary Risk Assessment identifying risks which in the written opinion of the Local Planning Authority require further investigation, the development shall not commence until a scheme for the investigation of the site and the identification of remediation measures (the Site Investigation Proposal) has been submitted to and approved in writing by the City Council as local planning authority.

The measures for investigating the site identified in the Site Investigation Proposal shall be carried out, before the development commences and a report prepared outlining what measures, if any, are required to remediate the land (the Site Investigation Report and/or Remediation Strategy) which shall be submitted to and approved in writing by the City Council as local planning authority.

Reason - To ensure that the presence of or the potential for any contaminated land and/or groundwater is detected and appropriate remedial action is taken in the interests of public safety, pursuant to policies DM1 and EN18 of the Manchester Core Strategy.

Condition 25) Prior to the commencement of development a Construction Management Plan shall be submitted to and approved by the Council. The Construction Management Plan shall contain the following:

- Details of Wheel Washing;
- Dust suppression measures;
- Compound locations where relevant;
- Location, removal and recycling of waste;
- Routing strategy and swept path analysis;
- Parking of construction vehicles and staff;
- Hours of working

The development shall be carried out in accordance with approved details.

Reason - To safeguard the amenities of the occupiers of nearby residential and commercial properties during the construction/demolition phase, pursuant to Policy DM1 in the Manchester Core Strategy.

Please confirm your agreement to the above conditions within 10 working days. If we do not hear from you within this period, we will impose the conditions on any permission. Please note that this information is provided without prejudice to any final decision in relation to this application.

If you would like any further information about this letter, please contact David Lawless using the above details. Please quote the above reference number on any further correspondence.

Yours faithfully,

Julie Roscoe
Director of Planning, Building Control & Licensing
