Chimney CS02 repairs at bottom

A photograph of a chimney repair site. The chimney is a large, rectangular concrete structure. It is surrounded by scaffolding made of metal poles and cross-braces. A safety net with a hexagonal pattern is visible in the background. Two red circles with blue centers are marked on the chimney's surface, with a red arrow pointing from the text 'Remove remnants of fixings and fill holes' to them. A white box with the text 'Finish re-pointing where incomplete' is positioned below the chimney. The ground is covered with grey paving stones.

Remove
