

No Parking Residents Only - Prohibition 'P' - Landscape

Clear and easy to understand – ideal for effectively prohibiting unauthorised parking on private property or in specific areas around premises

- Organisations have obligations under the Health and Safety at Work Act to ensure the Safety and Wellbeing of those on-site, which may include signs to restrict parking in some areas. This ISO compliant design can be customised in seconds
- High quality print delivers a clear and crisp message using durable UV stabilised inks
- Choose from a range of hard-wearing materials specifically manufactured to withstand outdoor use and guaranteed for up to 7 years
- Additional coatings, fixings and accessories can be selected separately to create a complete signage solution that is quick and simple to install
- Made in the UK with 95% of orders shipped within 1-2 working days

Round Post Kit

Sleek & durable round mild steel post

Umbra Grey "Triplex" anti-corrosion powder coating, guaranteed for 25 years

50mm diameter and 2.9m length, with internal post caps

Complete kit includes anti-rotational fixing clips and channels on your sign for easy installation

SPECIFICATION

Sign Type:

No Parking Sign

Sign Reads:

No Parking Residents Only

Sizes Available (W x H):

400 x 300 mm | 600 x 450 mm | 800 x 600 mm

Materials Available:

3mm Aluminium Composite Non-Reflective, RA1 Reflective 3mm Aluminium Composite,

RA2 Reflective 3mm Aluminium Composite, 2mm Rigid Plastic

Orientation:

Landscape

Application:

Designed for outdoor use

Guarantee:

Subject to material type and use in the appropriate setting. Does not account for extreme or atypical environmental conditions.

How To Order:

Select the Required Size, Material, any additional coatings, fixings and then add to basket, or customise the message

Artwork ID:

L23-PPC-0-045

REGULATIONS

ISO 3864 – International Standard for Safety Signs & Markings:

This international standard defines the design principles for safety signs that convey safety messages. By following ISO 3864, our parking signs are designed with the official and appropriate colours to effectively communicate essential safety information, reducing the risk of accidents and confusion in parking areas.

Upgrade to Class RA1 or Class RA2 Reflective Signs:

Class RA1 and Class RA2 are two types of reflective coatings that offer significant benefits in terms of visibility, durability, and performance in low-light or night-time conditions. The reflective coatings we offer are equivalent to the BS EN 12899:1:2007 standard.

RA1 is visible up to 300 meters with good night time visibility and weather resistance. RA2 is a more advanced material, offering superior reflectivity. Visible up to 500 meters, it performs excellently in low-light conditions.

Both RA1 and RA2 materials benefit parking signs by helping drivers identify and understand parking areas, offering clear night-time visibility to reduce accidents through improved safety and compliance.

The choice between RA1 or RA2 depends on factors like sign location, viewing distance, and information criticality. However, both can improve the effectiveness and safety of parking signage at an affordable price.

Health and Safety At Work Act 1974

The Health and Safety at Work Act 1974 obliges employers to ensure the safety of those on their premises, which extends to car parks.

Safety & Guidance: Signage can help prevent accidents by guiding drivers and pedestrians, indicating speed limits, designating parking areas, and warning of hazards.

Liability: If an accident occurs, signs show that reasonable safety measures were taken, which could limit legal repercussions.

Well-being: A well-organised car park reduces stress for employees and visitors alike, contributing to a positive work environment and visitor experience.

Even though the Act doesn't mandate car park signage, having it supports your broader safety responsibilities.
