Variation application number
EPR/NP3698CT/V002

Permit number
EPR/NP3698CT

Wharf Street Transfer Station

Permit number EPR/NP3698CT

Introductory note

This introductory note does not form a part of the notice.

The following notice gives notice of the variation of an environmental permit.

The variation adds our current permit template conditions concerning noise and vibration. These have been added to the permit as there were no conditions concerning noise and vibration and the facility has been the subject of complaints concerning noise. The addition of these conditions will therefore enable the Environment Agency to more effectively regulate the facility with respect to noise and vibration.

The Schedules specify the changes made to the original permit.

Schedule 1 of the notice lists any conditions that have been deleted, Schedule 2 of the notice lists any amended conditions and Schedule 3 of the notice lists any conditions that have been added.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.

----------------------	-------------------

Authorised on behalf of the Environment Agency

Schedule 1 – conditions to be deleted

None

Schedule 2 – conditions to be amended

None

Schedule 3 – conditions to be added

The following conditions are added following an Environment Agency initiated variation

6.3 Noise and vibration

- 6.3.1 Emissions from the activities shall be free from noise and vibration at levels likely to cause pollution outside the site, as perceived by an authorised officer of the Environment Agency, unless the operator has used appropriate measures, including, but not limited to, those specified in any approved noise and vibration management plan to prevent or where that is not practicable to minimise the noise and vibration.
- 6.3.2 The operator shall:
- (a) If notified by the Environment Agency that the activities are giving rise to pollution outside the site due to noise and vibration, submit to the Environment Agency for approval within the period specified, a noise and vibration management plan;
 - (b) implement the approved noise and vibration management plan, from the date of approval, unless otherwise agreed in writing by the Environment Agency.

KLEEMANN

EC/EU Declaration of Conformity
pursuant to
Machinery Directive 2006/42/EC
EMC Directive 2014/30/EU

The manufacturer:

KLEEMANN GmbH
Manfred-Wörner-Strasse 160
73037 Göppingen
Germany

hereby declares that as a result of the manner in which the machinery / plant designated below was designed, the type of construction and the version which has been brought on to the market, it complies with the provisions of the directives listed above.

The protection objectives of the Low Voltage Directive in accordance with Annex I, No. 1.5.1 of the Machinery Directive have been observed.

Designation of the machinery / plant:

Mobile crushing plant

Series / Model:

MC 110i EVO 2

Serial number:

K1170186 - 4111009499

In the event of a significant modification to the machinery / plant, this declaration shall lose its validity.

Person authorised to compile the relevant technical documents:

KLEEMANN GmbH

Language version:

Original Declaration of Conformity

Place, date / signature:

Göppingen, 19.10.2022

Identification of the signatories:

(Managing Directors)

Dr. Cyrus Barimani / Karl Joachim Janka

TAMESIDE METROPOLITAN BOROUGH COUNCIL
POLLUTION PREVENTION AND CONTROL ACT 1999
ENVIRONMENTAL PERMITTING REGULATIONS 2016 (as amended)

APPLICATION RECEIVED: 11th November 2022

PERMIT REFERENCE NO: EP107/22

REGISTERED ADDRESS OF OPERATOR: Chartrange Ltd
Wharf Street
Dukinfield
Cheshire
SK16 4NS

The above-named company is hereby permitted to undertake the activity of mobile crushing, in accordance with the following conditions.

ADDRESS OF PERMITTED ACTIVITY: Chartrange Ltd
Wharf Street
Dukinfield
Tameside
SK16 4NS

Or such other sites as notified to Tameside MBC by Chartrange Limited.

DESCRIPTION OF PERMITTED ACTIVITY:

The crushing and size reduction, screening and temporary storage of material, including construction and demolition waste and stone prior to removal. The process involves the use of a Mobicat MC 110(i) EVO2 Crusher, serial number K.117.0186, and occasionally with a screening plant.

A mobile crusher usually has a stationary steel jaw working with a moving jaw to crush and pulverise material.

Crushed material is carried from the crusher jaws via conveyor to stockpiles prior to either further screening, transportation from or re-use on site.

This activity is regulated under Section 3.5B of Schedule 1, Part 2 to the Environmental Permitting Regulations 2016, SI 1154:2016, as amended.

Conditions

1. Asbestos shall not be crushed or screened.

Notifications

2. The operator shall, before the mobile Mobicat MC 110(i) EVO2 Crusher, serial number K.117.0186, is operated, notify the regulator of the site where this mobile plant is to be operated, and Tameside MBC:
 - a) where and when the mobile Mobicat MC 110(i) EVO2 Crusher, serial number K.117.0186 is expected to start operating, and
 - b) the serial numbers of the mobile plant involved.

Emissions and Monitoring

3. No visible particulate matter shall be emitted beyond the installation boundary.
4. The emission requirements and methods and frequency of monitoring set out in Table 1 on Page 4 of this permit shall be complied with.
5. All plant and equipment capable of causing, or preventing, emissions shall be maintained in accordance with the manufacturer's instructions. **Records shall be kept of such maintenance.**

Aggregates, Delivery and Storage

6. Dusty materials (including dusty wastes) shall be subject to suppression and management techniques to minimise dust emissions.

Crushers and Screening Units

7. Crushers shall be totally contained or fitted with a water suppression system over the crusher aperture.
8. Where the use of water as a method of dust suppression is necessary in order to meet the emission limits, it shall be used. In such circumstances, if water of the required pressure is not available for use on the suppression system, then the process shall not operate.
9. Deposits of dust on external parts of the plant shall be cleaned off at the end of each working day in order to minimize the potential for wind entrainment.
10. Processed materials likely to generate dust shall be conditioned with water prior to internal transfer.

Belt Conveying

11. All dusty materials, including wastes, shall be conveyed using conveyors protected against wind whipping and shall have water dust suppression fitted and used. All transfer points shall be fitted with protection against wind whipping.

Loading, Unloading and Transport

12. No potentially dusty materials (including wastes) or finished products shall arrive on or leave the site other than by use of covered wagons.

Roadways and Transportation

13. All areas where there is regular movement of vehicles shall have a consolidated surface capable of being cleaned, and these surfaces shall be kept clean and in good repair, or shall be kept wet.
14. Vehicles shall not track material from the site onto the highway.

Records and training

15. Written or computer records of all tests and monitoring shall be kept by the operator for at least 18 months. They shall be made available for examination by Tameside MBC. Records shall be kept of operator inspections, including those for visible emissions.
16. Staff at all levels shall receive the necessary training and instruction to enable them to comply with the conditions of this permit. Records shall be kept of the relevant training undertaken.

Signed: 
Julian Jackson
Director of Place

Please ask for: Craig Richardson

Table 1 – Emission Limits, Monitoring & Other Provisions

Substance	Source	Emission Limits / Provisions	Type of Monitoring	Monitoring Frequency
Particulate Matter	Whole process	Avoidance of visible emissions crossing the (construction) site boundary	Recorded operator observations	On start-up and on at least two more occasions each day
Smoke	Engines	No visible smoke during normal operations	Recorded operator observations	On start-up and on at least two more occasions each day

EXPLANATORY NOTE

1. This permit is based upon the information provided in the application for a permit received by Tameside MBC from the operator on 11th November 2022. All plant, equipment and processes referred to in this permit shall be taken to refer to those such matters as described in that application.
2. Any modifications to the process or equipment used therein shall be notified to Tameside MBC and approval obtained prior to the modification being undertaken.
3. Drop height of stone should be minimised. Stone should normally be conditioned with water or proprietary conditioning agents and this should take place at or before the point of discharge from the conveyor. Wherever possible, loading should take place at sheltered points around the stockpile.

When constructing and managing stockpiles, regard should be had to the need to prevent dust becoming wind-entrained. Stockpiles should be suitably profiled and, wherever possible, should be situated in sheltered areas of the quarry. Other appropriate methods might include periodic conditioning with water or proprietary conditioning agents, according to weather conditions.

4. You should note that the Environmental Permitting Regulations implies a condition that the operator shall use the best available techniques for preventing or, where that is not practicable, reducing emissions from the installation or mobile plant.
5. This permit is given in relation to the requirements of the Environmental Permitting Regulations. It must not be taken to replace any responsibilities you may have under workplace Health and Safety Regulations.
6. This permit does not detract from any other statutory requirement, such as the need to obtain planning permission, building regulation approval, hazardous substances consent, discharge consents, waste disposal licence or any licence or consent from the Environment Agency.
7. The annual subsistence fee is due on 1 April each year. Before being invoiced you will be notified of the amount and method of payment in March each year. Failure to pay the fee will lead to revocation of the permit.
8. All enquiries and notifications required to be made in relation to this permit shall be made to:

Tameside Metropolitan Borough Council
Operations & Neighbourhoods
Environmental Services (Public Protection)
Tame Street Depot
Tame Street
Stalybridge
SK15 1ST

Tel: 0161 342 3130

Incidents occurring outside office hours shall be reported on the next working day unless otherwise directed within the permit or there is an imminent risk to health which shall be reported immediately by telephoning 0161 342 2222 and asking for the Emergency Call Out Officer.

9. Appeal against permit conditions

Anyone who is aggrieved by the conditions attached to a permit can appeal to the Secretary of State for the Environment. **Appeals must be received by the Planning Inspectorate no later than 6 months from the date of the decision (normally the date on the bottom of the permit).**

Appeals relating to installations in England should be sent to the Secretary of State for the Environment. The address is as follows:-

The Planning Inspectorate
Environment Team, Major & Specialist Casework
Room 4/04 – Kite Wing
Temple Quay House
2 The Square
Temple Quay
BRISTOL BS1 6PN

Tel: 0117 372 8726 Fax: 0117 372 8139

Guidance on the appeal procedure is published by the Planning Inspectorate and available from:

www.planning-inspectorate.gov.uk/pins/environment/environment/index.htm

There are no forms or charges for appealing. However, for an appeal to be valid, appellants are legally required to provide the following 8 items :

- (a) written notice of the appeal of appeal;
- (b) a statement of the grounds of appeal;
- (c) a statement indicating whether the appellant wishes the appeal to be dealt with by written representations procedure or a hearing – a hearing must be held if either the appellant or enforcing authority requests this, or if the Planning Inspector or the Secretary of States decides to hold one;
- (d) appellants must copy the above three items to the local authority when the appeal is made;
- (e) a copy of any relevant application;
- (f) a copy of any relevant permit;
- (g) a copy of any relevant correspondence between the appellant and the regulator; and
- (h) a copy of any decision or notice, which is the subject matter of the appeal.

Appellants should state whether any of the information enclosed with the appeal has been the subject of a successful application for commercial confidentiality and provide relevant details. Unless such information is provided all documents submitted will be open to inspection.

Please Note

An appeal will not suspend the effect of the conditions appealed against; the conditions must still be complied with.

In determining an appeal against one or more conditions, the Act allows the Secretary of State in addition to quash any of the other conditions not subject to an appeal and to direct the Local Authority either to vary any of these other conditions or to add new conditions.
