Part 2 – Particulars of decision

Manchester City Council gives notice that the detail(s) referred to in Part 1 are **Refused** in accordance with the information set out below.

b) Plant Noise Verification

Condition 3b Plant Noise Verification attached to planning permission 140223/FO/2024 cannot yet be discharged as the following information is still outstanding:

The validation report needs to include the background noise level and the plant noise limit for completeness and most importantly, the measured plant noise at the receptor not calculated levels.

The purpose of the validation assessment is to demonstrate that all the items of plant once installed are operating in accordance with the manufacturers specification not just 1 of them. One or more of the other remaining 3 units may have a fault, may not be operating as expected or in accordance with the manufacturers data, there may be problems with workmanship when installed which causes a different noise or tone or may be operating differently when installed in field conditions.

The report needs to include measurements of all 4 units to provide actual cumulative noise level not calculated as would be expected in part a) of the condition to demonstrate that the compliance with the calculated rating to address part b)

Also, for completeness, the report should include a description of the 4 units installed and confirm that they are the same units as originally proposed and assessed under part a) of the condition.

As it stands and as previously stated, the information submitted doesn't demonstrate that all 4 units when operating in cumulative use do not exceed the criteria at the receptor so we need a revised report to address the above and provide the required information.
