Hi Ellie,

Thanks for your email.

Happy that this is sufficient for the proposed alterations. The scheme won't be eligible for the full SBD accreditation with replacement of all existing elements to SBD standards, so the standard SBD condition isn't appropriate in this instance.

Regards

Bradley Hart MTCP

Good afternoon Brad,

Thank you for comments on this application.

The agent has since confirmed the following – *Regarding the SGMP comments, the specified fire doors are SR2 certified with break glass to open and a self-closer.*

Does SGMP considered this sufficient? Or is the secured by design accreditation condition still required?

Kind regards,
Ellie Knowles (she/her)

Dear Ellie,

Thank you for the opportunity to comment on the above application.

We would advise that all new doorsets are compliant with and certified to BS PAS 24, LPS 1175 SR2 or STS 202 BR2. It is crucial that the door ironmongery is permitted for use on the escape doors under the security certification of the product. Security-certified louvred doorsets are also available where required (see [Secured by Design](#)).

Regards
