Re: Waterhouse Gardens – Waste Management Strategy

Dear Sir/Madam,

Salboy confirm that where tri-waste separator systems have not been installed in Blocks B to E, the management company will provide a strategy going forward to manage this.

The site Building Facilities Supervisor on the development will check the refuse waste areas and inside the waste containers daily as part of the Building Facility Supervisor building walk. Any refuse that will have been misplaced will be removed from the wrong container and transferred into the correct containers. Residents will notify the Building Manager when they have large cardboard boxes or items for disposal. Once informed, residents will bring the items to reception. The Building Facility Supervisor will then collect the items, break them down, and dispose of them in the appropriate recycling bins.

Signage will be put on the bin chutes advising of the correct operation and what waste is required to go in what bin. Guidance for the correct use of the waste disposal will also be put on the residents App for the site.

A manual log book will be recorded after each check has been actioned within each block dated.

Yours Sincerely,

Kerim Jones
