Hi Jen

Re this wonderful application, Im assessing the noise report from e3p. Would it be possible to get a clearer report regarding where the plot number as in relation to the assessments that they undertook. Furthermore they claim the they have modelled plant noise to a receptor 100m away when there are some a lot nearer. I believe the acoustician is aware of these as she has done other reports and used closer receptors.

I haven't read the cont land section by e3p, there may be more....

Thanks
