Waste Management Pro Forma & Strategy

Location: Redgate Lane, Manchester
Hot Food Huts: Located on outdoor car park
Operator: Polish & Glow

---

1. Waste Streams & Segregation

To ensure effective waste management and environmental responsibility, the following waste streams will be separated and managed across the site:

- **General Waste**
- **Mixed Dry Recycling** (plastics, cans, cardboard)
- **Food Waste**
- **Cooking Oil (Vendor Use Only)**
- **Glass** (if applicable)

Each vendor is responsible for segregating their waste according to council standards. Waste monitors will be on-site to ensure proper disposal practices are followed.

---

2. Bin Infrastructure

Public Areas:

- Bin stations located every 20–25 meters
- Each station will include:
    - General Waste (black bins)
    - Recycling (blue bins)
    - Food Waste (green bins)
- Each bin will be clearly labelled with visual guides for users

Vendor Areas:

- Dedicated back-of-house containers for:
    - Food preparation waste
    - Used cooking oil (secured containers)
    - Cardboard and packaging waste

---

3. Collection & Disposal

Licensed Waste Contractor: Biffa

- **Collection Frequency:** Monday, Wednesday, Friday, Saturday & Sunday
- Biffa will provide separate containers for each waste stream
- Waste Transfer Notes will be maintained and available upon request

Oil Collection:

- Vendors will store used oil in designated, secure tanks
- Collected weekly by a licensed waste oil contractor

---

5. Green Serving Solutions

All vendors will requested to utilise sustainable serving materials:

- Compostable or biodegradable packaging
- Wooden cutlery or reusable alternatives
- No plastic straws, cups, or bags

We will partner with BioPak to ensure consistent eco-friendly packaging across all vendors.

---

6. Signage

- Clear signage on all bins to assist public waste segregation
- Mandatory onboarding waste management training for all vendors
- Periodic public awareness campaigns to promote responsible waste disposal

---

7. Monitoring & Review

- An on-site manager will review waste management within daily operations
- Monthly waste audits will be conducted to assess performance
- Feedback from audits and the council will guide continuous improvements
