Executive Summary

Appointment	In March 2021 Curtins were instructed by One Manchester Housing on behalf of Jigsaw to undertake a Phase 1 Preliminary Risk Assessment of a currently vacant plot of land off Kenyon Lane, Manchester, M40 5FH. The site is centred on NGR SD 87682 01232 and covers an area of approximately 0.38 Ha. It is understood that the site is proposed to be redeveloped as residential dwellings.
Current Site Status	The site is located southwest of Kenyon Lane. The site is currently occupied by well-kept grass surface cover and trees along the site boundary running northeast to southwest. A public footpath extends along the western boundary.
Site History	Earliest mapping (1848) shows that the site was undeveloped until 1908 when two rows of terraced residential dwellings, one aligned along the northern boundary the other to the southwest site were constructed. From 1923 two additional buildings appear on site, once of which is demolished by 1932 and the other extended by 1952. Another two appear by 1988 and in 1978 all buildings are absent from historical mapping. The Lancashire and Yorkshire Railway orientated northeast to southwest, 123m south of the site, later accompanied by the Newton Heath Station in 1893. This is expanded from 1908 and reduced in size again by 1978. The surrounding area is continuously developed through into the 1980's with various terraced housing and residential properties constructed in all directions from site. Other buildings like the Mill Dye Works are noted 217m east of site (demolished by 1923) and a school 243m southeast of the site. The Moston Brook flows roughly east to west, from 15m south of the site and later, partially infilled to the south. Areas of cut and/or fill occupy most of the land to the south and northeast of the site from 1908 to 1978, with historical landfills noted in the area.
Geology	BGS mapping indicates the site is underlain by Glacial Till Deposits (clay) and the Collyhurst Sandstone Formation bedrock. Local BGS boreholes within 100m of the site record made ground underlain by clay and sand deposits, with bedrock deeper than 7.62m bgl. The site is located in a low probability radon area where <1% of homes are estimated to be at or above the radon Action Level.
Mining	While located in a coal mine reporting area, the site is not located in a Development High Risk Area and no recorded mine entries are within 500m. The risk from shallow coal mining is considered to be **Low**.
Hydrogeology	The site is underlain by a Principal Aquifer associated with the bedrock formation. The superficial deposits are designated as a Secondary Undifferentiated Aquifer. The site is not located within a Source Protection Zone (SPZ). There are no potable groundwater abstraction points within 500m.
Hydrology	The nearest surface water feature is an unnamed water course approximately 178m northeast of the site flowing southwards. There are no surface water abstractions within 1km.
Unexploded Ordnance	The risk from UXO associated with WWII bombing to the intrusive investigation is considered to be **Low.**
Initial Ground Contamination Assessment	The risk from Made Ground soils posed to the site's end-users and construction workers is considered to be **Moderate / Low** due to the anticipated lack of contamination in potential Made Ground soils on site. The risk presented to groundwater and surface water receptors is considered to be **Low** and **Very Low**, taking into account the lack of historical industrial land use on site. The risk posed to site end-users from ground generating gases arising from organic / putrescible soils on or near the site is considered to be **Moderate**.
Recommendations	The following recommendations are made with regards to further works at the site: 1. Undertake an intrusive ground investigation; 2. Undertake a GQRA as part of the ground investigation; and 3. Undertake Ground Gas Monitoring over a period of two-three months for methane, carbon dioxide, oxygen, hydrogen sulphide, gas flow in l/hr, weather conditions and barometric pressure (with confirmation if falling, steady or rising). It is further recommended that this work is completed in advance of any development works taking place.

Appendix C **Qualitative Risk Assessment Rationale**

1.0 Introduction

1.1 Project Background

In March 2021 Curtins were instructed by One Manchester Housing on behalf of Jigsaw to undertake a Phase 1 Preliminary Risk Assessment of a currently vacant plot of land located off Kenyon Lane, Manchester M40 5FH.

The location and extent of the site is shown in *Figure 2.1* on the following page. It is understood that the site is to be developed for residential dwellings.

At the time of witing, no proposed site plans were available for review.

1.2 Scope of Services

The Phase 1 PRA is intended to provide an overview of the geo-environmental and geotechnical setting of the site, prior to the proposed development of the site.

Through this overview, the Phase 1 PRA aims to develop both a working conceptual and ground model for the site, as well as present an initial assessment of any risks that could be presented to the development including its intended end users and the wider environment.

Specifically, the Phase 1 PRA provides an initial assessment of the site regarding:

a) Potential on and offsite contamination from historical and/or current uses, including potential ground gas generating sources;
b) The potential impact on the wider environment by historical and or current use of the site of interest;
c) The potential impact from surrounding land uses and other environmental factors;
d) Potential problems associated with geological features such as faulting, mineral extraction, mining and land instability; and
e) The location of apparent sub-surface structures that may affect the proposed redevelopment.

Consideration of detailed flood risk, ecology and archaeological issues are outside of the scope of this report.

2.0 Current Site and Surrounding Area Details

2.1 Site Location and Current Details

Site use, location and description are shown below in *Table 2.1* and *Figure 2.1*.

Table 2.1 – *Site Details*

Site Address	Land off Kenyon Lane, Manchester M40 5FH
NGR	SD 87682 01232
Area of Site	Approximately 0.38 Ha.
Current Site Use and Description	The site is located south to southwest of Kenyon Lane, accessed from Kenyon Lane or the public footpath to the west of the site. The site is currently occupied by public open space, with a well-kept grass surface cover and trees along the site boundary running northeast to southwest. A public footpath runs adjacent to the west of the site. The topography of the site is relatively flat, possibly sloping slightly towards the southwest.

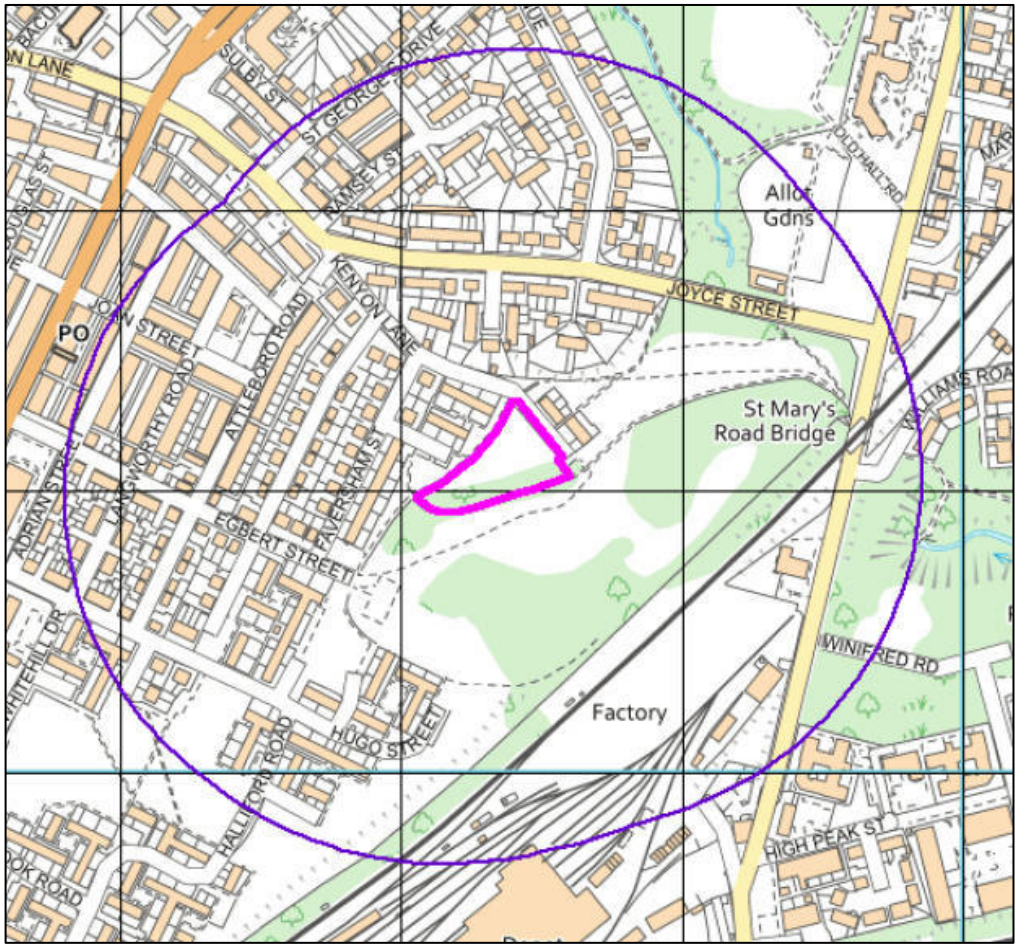

Figure 2.1 *– Site Location Plan (site boundary shown in pink and 250m buffer in purple). Crown Copyright. License Number 100022432.*

2.2 Surrounding Area Details

The following information was established through undertaking an environmental database search. The full Envirocheck report (Ref. 1) is included in *Appendix B*.

Table 2.2 – *Surrounding Land Uses*

Surrounding Area	**N**	Kenyon Lane followed by residential housing beyond
	E	Dense vegetation and greenspace followed by Newton Heath Railway Station
	W	Residential housing
	S	Dense vegetation and greenspace followed by residential housing

3.0 Site History

A review of the available historical mapping and other information for the site, as presented within the Envirocheck Report (Ref. 1), has been undertaken and is presented in *Table 3.0* below.

Table 3.0 –** Previous Site and Surrounding Area Uses and Potential Sources of Contamination.* ***Bold text refers to on-site activity.

Date	Description	Potential Sources of Contamination
1848 – 1908	**The earliest available mapping (1848) shows the site as undeveloped land, forming part of wider agricultural fields.** In the surrounding area, the Lancashire and Yorkshire Railway orientated northeast/southwest is approximately 123m southeast of the site. A watercourse flows towards the west approximately 25m south of the site, marking a boundary between parliamentary borough, named Moston Brook by 1893. Moston Brook is also noted directly south of Moston Mill. By 1893 the railway line is accompanied by Newton Heath Railway Station, 123m southeast of the site, including several signal boxes, an engine shed and an associated railway hotel. A road has been constructed adjacent to the northern boundary of site (Dean Lane). A few residential properties are noted 9m and from 174m northeast, and from 132m northwest of the site. Dean Brook Farm is located 79m south of the site, accompanied by a pond 100m south. Moston Mill (Bleach and Print) is located from 217m east of the site.	• No on-site sources of contamination identified. • Moston Mill to the east within 250m, almost directly south of Moston Brook. • Potential for uncontrolled deposition of Made Ground during off-site construction of terraced properties and the mill nearby.
1908 – 1923	**The site has been developed with two rows of terraced residential dwellings, one aligned along the northern boundary northwest to southeast and the other in the south-western corner of site northeast to southwest.** The surrounding area is now densely populated with residential terraced housing directly west of the site, with further construction of housing east of the railway line and to the northeast of site. The railway line has expanded to the southwest of the site, forming part of the *Carriage and Wagon Works* in the wider area. Areas of cut and/or fill are noted within 16m of the site to the south, spanning across the area of Moston Brook and the railway line, and within 150m to the northeast of the site. The Dean Brook Farm and associated pond are no longer present on historical mapping. A watercourse is noted 178m northeast of the site, flowing towards the south. The Moston Mill has since been renamed into the *Moston Dye Works*. A school is located 243m southeast of the site in a surrounding residential area.	• Potential for uncontrolled deposition of Made Ground during on-site construction of terraced properties. • Potential for uncontrolled deposition of Made Ground during off-site construction of terraced properties nearby. • Potential contamination of unknown material from the infill of the pond at Dean Brook Farm.

Copyright ©2021 Curtins Consulting Ltd

Date	Description	Potential Sources of Contamination
1923 - 1951	**Two small buildings appear on historical mapping to the south of the site behind the terrace housing.** **By 1932 the small building further north is no longer present on historical mapping.** The *Mill Dye Works* is no longer present on historical mapping, instead replaced by areas of cut and/or fill. By 1932 the open fields north of the site are now occupied by residential housing from 105m north of the site. Continued construction of residential housing occurs in all directions of site.	• Potential for uncontrolled deposition of Made Ground during on-site construction of buildings and subsequent demolition. • Potential for uncontrolled deposition of Made Ground during off-site construction of terraced properties nearby and expansion of the railway, and demolition of the *Dye Works*.
1951 - 1978	**The building to the south of site is extended by 1952 and by 1988 two small structures appear in the centre of the site.** Continued construction of residential housing in all directions from site. Adjacent to the northern boundary, Dean Lane is renamed as Kenyon Lane. Tanks are noted 149m southeast of the site, associated with the railway station. A building appears on historical maps 45m south of the site. Residential buildings 183m northeast of the site are demolished and become an area for allotment gardens, likely associated with WWII events. By 1975 more housing to the northeast of the site is demolished and remains area of vacant land.	• Potential for uncontrolled deposition of Made Ground during on-site expansion and construction of the buildings. • Potential for uncontrolled deposition of Made Ground during off-site construction and demolition of residential housing in the surrounding area nearby.
1978 - present	**The terraced houses and buildings on site are demolished and the site is a vacant grassed land as it is today.** The railway line and station are reduced in size, with the *Carriage and Wagon Works* line no longer present on historical mapping. Instead housing developments are present. The building 45m south of the site no longer appears on historical mapping. The cut and/or fill areas to the south of the site is now visible as an area of open grassland and vegetation. An electric sub-station is noted 107m north of the site. The Moston Brook appears to have been partially infilled across the area south of the site.	• Potential for uncontrolled deposition of Made Ground during demolition of the terraced housing on site. • Potential for uncontrolled deposition of Made Ground during demolition of the railway and *Carriage and Wagon Works* off-site, and subsequent construction of residential housing.

Potential sources of onsite contamination are further discussed in *Section 6.0*.

4.0 Geology, Hydrogeology and Hydrology

4.1 Geology and Hydrogeology

A study of the Envirocheck (Ref. 1) Report and the British Geological Survey (BGS) 1:50,000 mapping records (Bedrock and Superficial Editions) for Manchester (Sheet 085) dated 2010 (Ref. 2) indicates the following geological and hydrogeological succession underlying the site:

Table 4.1 – *Geological/Hydrogeological Succession*

Geology	Associated Hydrogeological Classification
Glacial Till – Devensian, Diamicton[1]	Secondary Aquifer, Undifferentiated[2]
Collyhurst Sandstone Formation – Sandstone[3]	Principal Aquifer[4]

Notes:
1. *A heterogenous mixture of clay, sand, gravel, and boulders varying widely in size and shape.*
2. *These layers have not been assigned an attribute either category A or B rock type due to not being possible. In most cases, this means that the layer in question has previously been designated as both minor and non-aquifer in different locations due to the variable characteristics of the rock type.*
3. *A soft red sandstone with abundant beds if 'millet seed' sand grains, alternating with beds of fine-grained sharp sand; some interbedded grey sandstones locally.*
4. *Layers of rock or drift deposits that have high intergranular and/or fracture permeability - meaning they usually provide a high level of water storage. They may support water supply and/or river base flow on a strategic scale. In most cases, principal aquifers are aquifers previously designated as major aquifer.*

BGS records do not indicate the presence of Made Ground on site, however the site's historic land use, primarily as residential terraced housing, which was constructed and since demolished, suggests that Made Ground soils may be present beneath the site. There is potential that the terraced properties may have had basements, which would have been back-filled with demolition material.

There are two BGS recorded borehole logs available for review within 100m of the site. These are summarised in *Table 4.*2 below. Bedrock was not encountered in these boreholes, advanced up to 7.62m bgl. The closest availably borehole where bedrock was encountered is located 400m northeast of the site hit sandstone bedrock at 48.41m bgl.

Table 4.2 – *BGS Borehole Records*

Record Reference	Location (NGR)	Details (bottom to top of strata/details/thickness of strata)	
SD90SE92/E	37m southeast (387625, 401293)	0.00m to 0.61m bgl 0.61m to 0.91m bgl 0.91m to 5.79m bgl 5.79m to 7.31m bgl *7.31m bgl*	MADE GROUND: Ashes and ballast (0.61m) Loose brown loamy SAND (0.30m) Stiff brown stoney CLAY (4.88m) Stiff brown sandy CLAY (1.52m) *Borehole terminated*

Record Reference	Location (NGR)	Details (bottom to top of strata/details/thickness of strata)	
SD90SE92/D	63m northwest (387625, 401293)	0.00m to 0.61m bgl 0.61m to 2.13m bgl 2.13m to 4.41m bgl 4.41m to 5.49m bgl 5.49m to 7.62m bgl *7.62m bgl*	MADE GROUND: Ashes and ballast (0.61m) Stiff brown sandy CLAY (1.52m) Loose brown loamy SAND (2.28m) Soft brown sandy CLAY (1.08m) Stiff brown sandy CLAY (2.13m) *Borehole terminated*

There are four fault lines within 1km of the site, all aligned approximately northwest-southeast. The nearest fault is located approximately 136m northeast of the site.

While BGS records indicate the site is underlain by the Collyhurst Sandstone Formation, the Pennine Middle Coal Measures and the Newton Heath Sandstone are located to the north of the faults.

The site is not situated within a Source Protection Zone (SPZ). There are no groundwater abstraction points within 500m of the site.

4.1.1 Mining

A review of the Coal Authority interactive mapping (Ref. 4) for the area indicates that the site is located within a Coal Mining Reporting Area, however it is not located within a Development High-Risk Area.

There are no recorded mine entries within 500m of the site, the closest is approximately 520m northeast of the site.

There are no recorded coal outcrops and no probable coal workings within 850m of the site, the nearest area is approximately 870m northeast of the site.

Consequently, the risk to development from historic coal mining is considered to be **Low**. No further actions are required to further asses the risk to development from historic coal mining.

The closest recorded BGS mineral site is located 420m northeast of the site, an opencast site known as Moston Hall Sand Pit which extracted sand from superficial soils (Till) and is recorded to have ceased works.

4.1.2 Other Ground Stability Issues

The Envirocheck Report (Ref. 1) confirms that there is a very low risk to no hazard from the following ground stability hazards on the site; collapsible ground, compressible ground, ground dissolution, landslide ground, running sands and shrinking or swelling clay.

4.1.3 Ground Gas

Given historic development on site, primarily for residential use, it is possible that made ground soils and demolition material may be present on site. These soils may act as a source of ground gas generation.

There is an area of historical landfill which encroaches into the site from the south, located where the area of cat and/or fill was noted in *Section 3.0*. Type of waste included inert and industrial waste. Input dates between May 1980 and December 1981.

There is one areas of infilled land (non-water) noted within 250m of the site. It is located 203m east of the site, which is an infilled pit, quarry etc. dated 1990.

There are two infilled land (water) features noted within 250m of the site. The nearest is located 15m south of the site with an unknown filled ground, previously likely to be the Moston Brook, noted as partially infilled in *Section 3.0*.

The Envirocheck Report (Ref. 1) and BGS Radon Mapping (Ref. 5) confirms the site is situated in an area where <1% of homes are above the radon action level. Radon protection measures are therefore not considered necessary within the proposed development. However, where the new development incorporates a basement the advice of a specialist Radon assessor must be obtained.

4.2 Hydrology

The nearest surface water feature is a small watercourse located 178m northeast, flowing towards the south. The Moston Brook is also located within 250m of the site, flowing towards the west. The Moston Brook has a GQA River Quality F, with a flow rate of less than 0.31 cumecs.

No recorded pollution incidents to controlled waters have occurred within 250m of the site.

There are no surface water abstractions within 1km.

The nearest surface water discharge consents are located from 42m southeast of the site, operated by United Utilities Water Limited for the discharge of public sewage in the tributary of the River Irk.

Copyright ©2021 Curtins Consulting Ltd

5.0 Unexploded Ordnance Risk Assessment

Military activities including those conducted as part of both the First and Second World Wars have resulted in a legacy of unexploded ordnance (UXO) being present within the shallow soils of the UK.

UXO result from various sources including both allied (military training) and German (bombing raids) with a guide figure of approximately 10% of all munitions failing to function as designed.

The likelihood of UXO being encountered on a development site is influenced by several factors including; the proximity to strategic targets, the nature of the development works being undertaken and evidence of local damage in the post-war periods amongst others. To determine the likelihood of UXO being present on a site, a step-wise risk assessment process is followed. This process is outlined within CIRIA C681 Unexploded Ordnance: A Guide for the Construction Industry (Ref. 6) with the following commentary considered to represent a Preliminary Risk Assessment intended to guide if and where there is a requirement for a Detailed Risk Assessment.

5.1 Preliminary UXO Assessment

Risk mapping (Ref. 7) for UXO's has placed the site in a **Moderate** risk area. Moderate-risk regions are those that show a bomb density of between 11 and 50 bombs per 1000 acres and that may contain potential WWII targets. Action to mitigate the risk is considered essential, albeit more likely that a reduced scope of work is required compared with that needed for high-risk regions.

A review of the available post-WWII historic mapping (Ref. 1) identified that the majority of terraced properties to the northeast of the site were demolished post-WWII.

However, a review of available online bomb damage mapping for Manchester (Ref. 8) does not record any explosive bombs in the area.

Considering the above, the risk of encountering potential UXO as part of future intrusive works is considered **Low** and no specialist information is required prior to any intrusive works.

If unexploded ordnance is discovered during any works, stop immediately, prevent access to the area, and inform the police. If the site boundary or location changes then the UXO risk should be reassessed.

Copyright ©2021 Curtins Consulting Ltd

6.0 Conceptual Site Model & Qualitative Risk Assessment

The conceptual site model (CSM) and Qualitative Risk Assessment (QRA) are presented in the table within this section.

The CSM details the source-pathway-receptor linkages or potential pollutant linkages (PPL) that have been identified for the site. The QRA details the associated level of risk relating to these potential pollutant linkages.

The CSM and QRA concern risk to human health and water environment with additional, more specific risk assessment protocols contained within the main body of this reporting, as detailed in *Section 6.1* below.

The QRA follows the framework outlined within CIRIA C552 (Ref. 9) which is summarised within *Appendix C.*

The 'risk rating' within the QRA refers to the risk that the source, pathway, receptor linkage or PPL is complete. Unless specifically stated it does not necessarily refer to an immediate risk and is intended to be used as a tool to assess the necessity for further assessment/investigation.

6.1 Additional Risk Assessments

The following risk assessments, listed below, are not included within the main CSM and QRA but nonetheless can be of critical importance to the onward development of the site:

- The risk presented by Mining is discussed and assessed in *Section 4.1.1*.
- The risk presented by Radon is discussed and assessed in *Section 4.1.3*.
- The risk presented by Unexploded Ordnance is discussed and assessed in *Section 5.0*.

Under current health and safety legislation, employers are required to carry out their own appropriate risk assessments and mitigation to protect themselves and their employees, other human receptors and the environment from potential contamination. Such risks must be adequately mitigated by law, specifically the Construction Design Management (CDM) Regulations, 2015 (Ref. 10) which require that potential risks to human health and the environment from construction activities are appropriately identified and all necessary steps taken to eliminate / manage that risk. It has been assumed that any future construction works on site will be undertaken in compliance with these requirements.

Copyright ©2021 Curtins Consulting Ltd

- The table below represents the first stage in the land quality risk assessment process: The Qualitative Risk Assessment.
- For a development site to be deemed 'suitable for use', the level of risk needs to be brought down to acceptable levels, i.e. low to very low risk. The purpose of each stage of risk assessment is ultimately to establish, if there is a requirement for additional levels of assessment to be made to have sufficient confidence to support a risk characterisation or management decision, e.g. remedial action.
- In the absence of specific site data, a Generic Quantitative Risk Assessment is invariably recommended.

Conceptual Site Model			Qualitative Risk Assessment			Recommended Actions
Source	**Pathway(s)**	**Receptor(s)**	**Consequence**	**Likelihood of Occurrence**	**Risk Rating**	
Potential sources of on-site contamination: • Made Ground of unknown composition from uncontrolled deposition of materials onsite during the construction and demolition of terraced housing and buildings on-site. Potential sources of off-site contamination: • Uncontrolled deposition of Made Ground during the construction of roads and structures and demolition near and adjacent to the site's boundaries.	Direct contact, ingestion, inhalation (dust and vapours)	**End-user of site** (Residents) **& Construction Workers**	**Medium** Chronic health risk	**Low Likelihood** Based on the site's limited development history and lack of historical industrial use, the likelihood of encountering significant contamination within the Made Ground is considered to be Low. There is potential for localised contamination related to ACM-containing materials considering structures onsite before 2000s. Likelihood of construction workers coming into contact with contamination on site can reduced by appropriate PPE.	**Moderate / Low**	**Generic Quantitative Risk Assessment** Recommended as part of the ground investigation.
	Vertical migration through the superficial deposits (soils) May occur due to existing service corridors and physical processes including; capillary action and downwards into the natural deposits through infiltration.	**Controlled Waters** (Groundwater) Secondary Aquifer – Undifferentiated (superficial deposits) Principal Aquifer (bedrock) There are no potable groundwater abstraction points within 500m. The site is not within a designated Source Protection Zone.	**Medium** Pollution of sensitive water resources	**Unlikely** While there is the potential for localised contamination to migrate vertically through the superficial deposits to the bedrock Principal Aquifer, there is a low likelihood of significant contamination being present in the Made Ground due to lack of historical industrial land use and taking into account the lack of an SPZ or abstraction points within 750m.	**Low**	No further action required
	Horizontal migration over and through the superficial deposits (soils)	**Controlled Waters** (Surface Water) Nearest surface water feature is an unnamed watercourse 178m northeast flowing southwards. No surface water abstraction points within 1km.	**Mild** Pollution of non-sensitive water resources	**Unlikely** Considering the distance from the site to the nearest surface water receptor and the expected low levels of contamination within the Made Ground, this pathway is considered unlikely.	**Very Low**	No further action required
Potential sources of ground gas: • Infilled land (non-water) located 203m east. • Infilled land (water) located 15m south. • Historical landfill on the southern boundary of the site.	Vertical and horizontal migration through existing service corridors and the underlying superficial deposits	**End-user of site** (Residents)	**Medium** Human health risk	**Likely** There is potential for gas generation from any localised organically rich deposits present in the Made Ground or superficial soils and reflecting.	**Moderate**	**Generic Quantitative Risk Assessment** Recommended as part of the ground investigation.

Copyright ©2021 Curtins Consulting Ltd

7.0 Conclusion and Recommendations

The qualitative risk assessment (QRA) determined a varied level of level of risk associated with the proposed development.

The QRA concluded by recommending that generic quantitative risk assessments (GQRA) were conducted to confirm the assessment of risk ascribed to each of the respective potential pollutant linkages (PPLs). It is recommended that the GQRA is conducted as part of a ground investigation in support of the engineering design of the proposed development.

In summary, the following recommendations are made:

- Undertake an intrusive ground investigation;
- Undertake a GQRA as part of the ground investigation; and
- Undertake ground gas monitoring over a period of two-three months for potential hazardous gases.

It is further recommended that the site investigation works are completed in advance of any development works taking place.

7.1 Contaminants of Concern

Potential contaminants of concern associated with the sources identified within the Conceptual Site Model in *Section 6.0* of this reporting include but are not limited to: broad range aliphatic and aromatic hydrocarbons present within any fuel oils; polycyclic aromatic hydrocarbons (PAHs); inorganic compounds including heavy metals; and asbestos present in discarded building materials.

Potential contaminants associated with the airborne dust/particulates include but are not limited to: polycyclic aromatic hydrocarbons and inorganic compounds including toxic metals that are also accounted for by potential onsite contaminants of concern.

7.2 Other Considerations

The requirement for additional surveys, e.g. arboricultural and ecological surveys, should be confirmed through advice from a suitably qualified and experienced professional.

Sources

- S1 Made Ground soils (on-site)
- S2 Made Ground soils (off-site)
- S3 Ground gas generating sources
- S4 Infilled Ground / Landfills

Pathways

- P1 Direct contact, ingestion and or inhalation
- P2 Vertical migration
- P3 Horizontal migration

Receptors

- R1 End users (Commercial)
- R2 Construction Workers
- R3 Groundwater
- R4 Surface water

Introduction

The Environment Act 1995 has made site sensitivity a key issue, as the legislation pays as much attention to the pathways by which contamination could spread, and to the vulnerable targets of contamination, as it does the potential sources of contamination.
For this reason, Landmark's Site Sensitivity maps and Datasheet(s) place great emphasis on statutory data provided by the Environment Agency/Natural Resources Wales and the Scottish Environment Protection Agency; it also incorporates data from Natural England (and the Scottish and Welsh equivalents) and Local Authorities; and highlights hydrogeological features required by environmental and geotechnical consultants. It does not include any information concerning past uses of land. The datasheet is produced by querying the Landmark database to a distance defined by the client from a site boundary provided by the client.
In this datasheet the National Grid References (NGRs) are rounded to the nearest 10m in accordance with Landmark's agreements with a number of Data Suppliers.

Natural England Copyright Notice

Site of Special Scientific Interest, National Nature Reserve, Ramsar, Special Protection Area, Special Conservation Area, Marine Nature Reserve data (derived from Ordnance Survey 1:10000 raster) is provided by, and used with the permission of, Natural England who retain the copyright and Intellectual Property Rights for the data.

Scottish Natural Heritage Copyright

Contains SNH information licensed under the Open Government Licence v3.0.

Ove Arup Copyright Notice

The Mining Instability data was obtained on licence from Ove Arup & Partners Limited (for further information, contact mining.review@arup.com). No reproduction or further use of such Data is to be made without the prior written consent of Ove Arup & Partners Limited. The supplied Mining Instability data is derived from publicly available records and other third party sources and neither Ove Arup & Partners nor Landmark warrant the accuracy or completeness of such information or data.

Stantec Copyright Notice

The cavity data presented has been extracted from the PBA (now Stantec UK Ltd) enhanced version of the original DEFRA national cavity databases. Stantec UK Ltd retain the copyright & intellectual property rights in the data. Whilst all reasonable efforts are made to check that the information contained in the cavity databases is accurate we do not warrant that the data is complete or error free. The information is based upon our own researches and those collated from a number of external sources and is continually being augmented and updated by Stantec UK Ltd. In no event shall Stantec UK Ltd or Landmark be liable for any loss or damage including, without limitation, indirect or consequential loss or damage arising from the use of this data.

Radon Potential dataset Copyright Notice

Information supplied from a joint dataset compiled by The British Geological Survey and Public Health England.

Natural Resources Wales Copyright Notice

Contains Natural Resources Wales information © Natural Resources Wales and Database Right. All rights Reserved. Contains Ordnance Survey Data. Ordnance Survey Licence number 100019741. Environment Agency - Head Office	November 2001	Not Applicable

Agency & Hydrological	Version	Update Cycle
River Quality Biology Sampling Points Environment Agency - Head Office	July 2012	Annually
River Quality Chemistry Sampling Points Environment Agency - Head Office	July 2012	Annually
Substantiated Pollution Incident Register Environment Agency - North West Region - South Area	January 2021	Quarterly
Water Abstractions Environment Agency - North West Region	January 2021	Quarterly
Water Industry Act Referrals Environment Agency - North West Region	October 2017	Quarterly
Groundwater Vulnerability Map Environment Agency - Head Office	June 2018	As notified
Bedrock Aquifer Designations Environment Agency - Head Office	January 2018	Annually
Superficial Aquifer Designations Environment Agency - Head Office	January 2018	Annually
Source Protection Zones Environment Agency - Head Office	October 2019	Quarterly
Extreme Flooding from Rivers or Sea without Defences Environment Agency - Head Office	September 2020	Quarterly
Flooding from Rivers or Sea without Defences Environment Agency - Head Office	September 2020	Quarterly
Areas Benefiting from Flood Defences Environment Agency - Head Office	September 2020	Quarterly
Flood Water Storage Areas Environment Agency - Head Office	September 2020	Quarterly
Flood Defences Environment Agency - Head Office	September 2020	Quarterly
OS Water Network Lines Ordnance Survey	September 2020	Quarterly
Surface Water 1 in 30 year Flood Extent Environment Agency - Head Office	October 2013	Annually
Surface Water 1 in 100 year Flood Extent Environment Agency - Head Office	October 2013	Annually
Surface Water 1 in 1000 year Flood Extent Environment Agency - Head Office	October 2013	Annually
Surface Water Suitability Environment Agency - Head Office	October 2013	Annually
BGS Groundwater Flooding Susceptibility British Geological Survey - National Geoscience Information Service	May 2013	Annually

Waste	Version	Update Cycle
BGS Recorded Landfill Sites		
British Geological Survey - National Geoscience Information Service	June 1996	Not Applicable
Historical Landfill Sites		
Environment Agency - Head Office	October 2019	Quarterly
Integrated Pollution Control Registered Waste Sites		
Environment Agency - North West Region	October 2008	Not Applicable
Licensed Waste Management Facilities (Landfill Boundaries)		
Environment Agency - North West Region - South Area	January 2021	Quarterly
Licensed Waste Management Facilities (Locations)		
Environment Agency - North West Region - South Area	January 2021	Quarterly
Environment Agency - Thames Region - West Area	January 2021	Quarterly
Local Authority Landfill Coverage		
Bury Metropolitan Borough Council	May 2000	Not Applicable
Manchester City Council - Planning Department	May 2000	Not Applicable
Oldham Metropolitan Borough Council	May 2000	Not Applicable
Rochdale Metropolitan Borough Council - Environmental Health Department	May 2000	Not Applicable
Salford City Council - Environmental Health Department	May 2000	Not Applicable
Stockport Metropolitan Borough Council - Environmental Health Department, EEDD	May 2000	Not Applicable
Tameside Metropolitan Borough Council	May 2000	Not Applicable
Local Authority Recorded Landfill Sites		
Bury Metropolitan Borough Council	May 2000	Not Applicable
Manchester City Council - Planning Department	May 2000	Not Applicable
Oldham Metropolitan Borough Council	May 2000	Not Applicable
Rochdale Metropolitan Borough Council - Environmental Health Department	May 2000	Not Applicable
Salford City Council - Environmental Health Department	May 2000	Not Applicable
Stockport Metropolitan Borough Council - Environmental Health Department, EEDD	May 2000	Not Applicable
Tameside Metropolitan Borough Council	May 2000	Not Applicable
Potentially Infilled Land (Non-Water)		
Landmark Information Group Limited	December 1999	Not Applicable
Potentially Infilled Land (Water)		
Landmark Information Group Limited	December 1999	Not Applicable
Registered Landfill Sites		
Environment Agency - North West Region - South Area	March 2003	Not Applicable
Registered Waste Transfer Sites		
Environment Agency - North West Region - South Area	March 2003	Not Applicable
Registered Waste Treatment or Disposal Sites		
Environment Agency - North West Region - South Area	March 2003	Not Applicable

Hazardous Substances	Version	Update Cycle
Control of Major Accident Hazards Sites (COMAH)		
Health and Safety Executive	April 2018	Bi-Annually
Explosive Sites		
Health and Safety Executive	March 2017	Annually
Notification of Installations Handling Hazardous Substances (NIHHS)		
Health and Safety Executive	November 2000	Not Applicable
Planning Hazardous Substance Enforcements		
Bury Metropolitan Borough Council	February 2016	Variable
Manchester City Council - Planning Department	February 2016	Variable
Oldham Metropolitan Borough Council	February 2016	Variable
Rochdale Metropolitan Borough Council	February 2016	Variable
Stockport Metropolitan Borough Council - Environment and Economic Development	February 2016	Variable
Tameside Metropolitan Borough Council - Planning and Building Control	February 2016	Variable
Salford City Council	June 2016	Variable
Planning Hazardous Substance Consents		
Bury Metropolitan Borough Council	February 2016	Variable
Manchester City Council - Planning Department	February 2016	Variable
Oldham Metropolitan Borough Council	February 2016	Variable

Points of Interest - Recreational and Environmental PointX	December 2020	Quarterly
Underground Electrical Cables National Grid	December 2020	

Sensitive Land Use	Version	Update Cycle
Ancient Woodland		
Natural England	February 2021	Bi-Annually
Areas of Adopted Green Belt		
Bury Metropolitan Borough Council	June 2020	As notified
Manchester City Council	June 2020	As notified
Oldham Metropolitan Borough Council	June 2020	As notified
Rochdale Metropolitan Borough Council	June 2020	As notified
Salford City Council	June 2020	As notified
Stockport Metropolitan Borough Council	June 2020	As notified
Tameside Metropolitan Borough Council	June 2020	As notified
Areas of Unadopted Green Belt		
Bury Metropolitan Borough Council	June 2020	As notified
Manchester City Council	June 2020	As notified
Oldham Metropolitan Borough Council	June 2020	As notified
Rochdale Metropolitan Borough Council	June 2020	As notified
Salford City Council	June 2020	As notified
Stockport Metropolitan Borough Council	June 2020	As notified
Tameside Metropolitan Borough Council	June 2020	As notified
Areas of Outstanding Natural Beauty		
Natural England	January 2021	Bi-Annually
Environmentally Sensitive Areas		
Natural England	January 2017	
Forest Parks		
Forestry Commission	April 1997	Not Applicable
Local Nature Reserves		
Natural England	February 2021	Bi-Annually
Marine Nature Reserves		
Natural England	July 2019	Bi-Annually
National Nature Reserves		
Natural England	January 2021	Bi-Annually
National Parks		
Natural England	April 2017	Bi-Annually
Nitrate Sensitive Areas		
Natural England	April 2016	Not Applicable
Nitrate Vulnerable Zones		
Environment Agency - Head Office	December 2017	Bi-Annually
Department for Environment, Food and Rural Affairs (DEFRA - formerly FRCA)	October 2015	
Ramsar Sites		
Natural England	August 2020	Bi-Annually
Sites of Special Scientific Interest		
Natural England	February 2021	Bi-Annually
Special Areas of Conservation		
Natural England	July 2020	Bi-Annually
Special Protection Areas		
Natural England	September 2020	Bi-Annually
