Dear Sir,

My name is [REDACTED] and I am a resident of [REDACTED]. I have looked at all the plans online, [REDACTED].

I fully support the project however I wish to object to the landscaping.

I'm my opinion after looking at the plans more needs to be done. There are a large number of very mature trees which according to the landscaping plan will be staying. These form part of my view out of the back of the house but they block all the natural light from entering my garden. I have on numerous occasions wrote to the previous owners asking them to reduce the height of the trees or remove them all together. My next course of action was to actually involve the council under the right to light or party hedge agreement.

In these times of soaring utility bills I have muted the idea of fitting solar panels however it is pointless with these trees blocking all the light. And also come 3pm there is no sun at all to sit out and enjoy.

I have attached a photo taken in the afternoon, as you can see there is no light penetrating the trees.

Don't get me wrong I love looking out my window at all the greenery and nature, but I feel a proper landscaped area will be more fitting to the project and the residents.

Regards,

[REDACTED]
