Description

This 6/8 space BDS Shelter® is one of our best-selling cycle shelters. It is made of mild steel and has bolt-down fixing or underground fixing available. It is an excellent bike storage product which is highly customisable and comes with many add-ons so each client can choose the best all-around features for them. The bicycle shelter can be installed with hot-dipped galvanised bike storage racks. It can also be selected with integrated bike racks where the racks are fixed to the shelter frame and not the ground; this is ideal for soft surface areas. You can also select it with the toastrack option, which is a floor-mounted single frame, also ideal for a quick installation as it requires fewer bolts than the individual bike stands. The bike shelter is available in a galvanised, polyester powder-coated RAL code colour finish or hot dipped galvanised and polyester powder-coated RAL code colour finish. It has an anti-vandal clear polycarbonate UV stable roof as standard, and it can be made safer and more protective with the addition of polycarbonate sides. Pair the shelter with some strong and secure bike stands or racks to provide confidence to cyclists by allowing both the frame and wheels to be secured to the cycle stand.

Bike Shelter DWG / CAD Files

[Download our CAD files](#) or contact us for help with planning. We also have an in-house designer who can check and assist with any architectural drawings free of charge.

Options:

The bicycle shelter comes with several options for finish -raw, powder-coated, hot-dipped galvanised, or both hot-dipped galvanised and powder-coated in the colour of your choice. Alternatively, it can be manufactured and shipped raw. The shelter is also very versatile when it comes to the type of racks or stands installed with it, you can select - free-standing galvanised Sheffield or Toastrack bike stands, or shelter-integrated offground ones. The shelter can be manufactured to hold 6 or 8 bikes. It can be selected with or without an LED light and polycarbonate side panels for added safety. You can also opt for swing gates of steel mesh or polycarbonate. Furthermore, you can go a step further in your security and have a locking system with a coded padlock, swipe cards or lock and key. Lastly, you can have an optional central glazing strap to cover the place where the polycarbonate panels meet.

Specification:

- Polycarbonate roof as standard; optional end polycarbonate panels
- Optional bike stands
- Includes assembly bolts, expanding foundation bolts for concrete plinth and arrangement drawing for assembly
- No climb end frames with anti-vandal PET panels
- No-crawl under perimeter
- Complies with secure storage as required by the Code for Sustainable Homes
- 50mm box tube
- Hot dipped galvanised or polyester powder coated to BS EN ISO 1461:1999 standard finish; in any RAL code colour
- Shelter comes with adjustable overground fixing feet
- Single units can be placed alongside or opposite each other to form larger cycle storage areas
- This bike shelter can help contribute towards gaining ENE8 Cycle storage credits when used in the appropriate situation under the Code for Sustainable Homes
