Containers should be within 25m of the waste collection point specified by the waste collection authority.

The bins are stored within the boundary of the dwelling to comply with Building Regulations Part H and BS5906:2005. The layout of the development has been designed with smooth continuous surfaces for easy horizontal movement. Each dwelling will have space to segregate waste.

The residents will arrange for bins to be relocated to a temporary position on bin collection day for easy collection by the local council. The bins will then be relocated back to the bin store location within the dwelling boundary for residents to use.
