Delegated officer report for planning application

Application no. 142564/FO/2025

Date registered valid: 28 March 2025

Proposal: Insertion of a replacement door, the retiling of steps and landing, and the installation of handrails.

Address: St. James Safe Deposit Company Ltd, 77 Oxford Street, Manchester, M1 6EG

Ward(s): Piccadilly Ward

Applicant: Amanda Williams-Thomas, St James' Safe Deposit Co Ltd

Agent (if any): Don Murphy, Paul Butler Associates

Case officer: Jack Naven
Tel: 0161 219 2095
Email: jack.naven@manchester.gov.uk

Recommendation: Approve

Date of recommendation: 13 May 2025

Application Details

Type of application: Full Application Consent

Development type: Minor Other

Departure from Development Plan: No

Environmental Statement: Not required

Description of Site/Area

Listed building: Grade II

Conservation area: Whitworth Street Conservation Area 1985

Tree Preservation Order: Not applicable

77 Oxford Street is one of many units located in the Grade II listed St James Building, 61-95 Oxford Street.

St James Building was constructed in 1912 as a commercial warehouse and office building.

The overall building is bounded to the north by the Oxford Place offices (61 Oxford Street); to the east by Linley House (offices); to the west by Oxford Street; and, to the south by the Rochdale Canal.

The building was constructed by The Calico Printers Association in 1912, and was designed by Clegg, Fryer, and Penman. It was originally designed to accommodate offices, a drafting department, and textile warehouse, and comprises eight storeys above basement.

The building façade is of Portland stone, with a green slated mansard roof. The Listing notes its value as part of a group of buildings which include other former warehouses on Oxford, Portland, and Whitworth Streets.

The majority of the St James' Buildings are occupied by a mixture of office, training, and educational uses, along with retail and leisure uses at ground floor level fronting Oxford Street. The main entrance to the building is positioned centrally on the Oxford Street elevation. The reception area is accessible by steps from Oxford Street which then provides access via further staircases and lifts to the upper floors of the building.

The St James' Safe Deposit Co Ltd has been present at the building since the building's construction in 1912 and original operation.

The works are proposed to a secondary entrance, to the immediate north of the building's historic main entrance. The entrance door is a modern part glazed, framed door, likely dating from the 1980s. This can be reached via steps and a platform landing which have been tiled in modern quarry tiles.

The entrance, which is recessed, features metal gates which are operational, and feature the "SAFE DEPOSIT" lettering at the top of the gates.

The site lies within the western boundary of the Whitworth Street Conservation Area. It is within close proximity to several listed buildings and structures including the Tootal, Broadhurst, and Lee Building (Grade II*) which it faces, 61 Oxford Street (Grade II) which borders its northern perimeter, Rochdale Canal Lock 88 (Grade II) which is to the immediate south of the site, and beyond this, the Palace Theatre (Grade II).

Description of Development

The proposal seeks planning permission for the insertion of a replacement door, the retiling of steps and landing, and the installation of handrails.

Related Applications

142565/LO/2025 - Listed Building Consent for the insertion of a replacement door, the retiling of steps and landing, and the installation of handrails.

To be approved in tandem with this application.

Consultations & Notification Responses

Greater Manchester Police –No response to the consultation request.

Publicity - Neighbour notification letters were sent to surrounding properties. A site notice and local press advert were also produced. At the time of writing this report, no representations have been received because of this publicity.

Policy

The following policy and guidance are considered relevant to the consideration of this application:

The Adopted Core Strategy for the City of Manchester (2012)

Adopted on 11th July 2012 and the Key Development Plan Document in the Local Development Framework. It states that all new developments should follow the 'Development Principles' and accord with the design guidance set out in the Supplementary Planning Documents.

CC9 (Design and Heritage) advises that design of new buildings will need to be of the highest standard in terms of appearance and function. The standards and guidance explained in other LDF policies should be the basis for the approach to design, with particular attention to be given to the City Centre context and character.

Development in Manchester City Centre should preserve or enhance the heritage assets that have been identified, including listed buildings, conservation areas and scheduled ancient monuments.

The Council will support high density and mixed-use development in the City Centre, but developers must recognise the specific design challenges that must be overcome to ensure complementarity of function and form. New development must support the range of uses the Council expects in the City Centre and contribute to a coherent and integrated physical environment.

CC10 (A Place for Everyone) advises that the City Centre will develop as a location which appeals to a wide range of residents and visitors. Development which promotes this objective will be supported, particularly through: Uses which increase the diversity of activity in the City Centre, with an emphasis on family-oriented activity; and high standards of accessibility to buildings and across spaces in the City Centre.

SP1 (Spatial Principles) refers to the key spatial principles which will guide the strategic development of Manchester together with core development principles. It is stated that developments in all parts of the city should create well designed places which enhance or create character, make a positive contribution to the health, safety, and well-being of residents, consider the needs of all members of the community, and protect and enhance the built environment. Further, development should seek to improve access to jobs, services and open space, and provide good access to sustainable transport provision.

EN1 (Design Principles and Strategic Character Areas) advises that development provide opportunities for good design to enhance the overall image of the City should be fully realised and both reinforce and enhances the local character. It also advises that developer's will be expected to consider the City's heritage, including its listed buildings, conservation areas, archaeological remains and historic street pattern.

EN3 (Heritage) advises that throughout the City, the Council will encourage development that complements and takes advantage of the distinct historic and heritage features of its districts and neighbourhoods, including those of the City Centre and that proposals which enable the re-use of heritage assets will be encouraged where they are considered consistent with the significance of the heritage asset.

DM1 (Development Management) states that all development should have regard to a number of specific issues the following of which are relevant to this application and for which more detailed guidance may be given within a supplementary planning document:

- Impact on the surrounding areas in terms of the design, scale, and appearance of the proposed development.
- Development should have regard to the character of the surrounding area.
- Effects on amenity, including privacy, light, noise, vibration, air quality and road safety and traffic generation. This could also include proposals which would be sensitive to existing environmental conditions, such as noise.
- Accessibility: buildings and neighbourhoods fully accessible to disabled people, access to new development by sustainable transport modes.
- Community safety and prevention.
- Design for health.
- Refuse storage and collection.
- Vehicular access and car parking.

The Unitary Development Plan (UDP) for the City of Manchester (1995)

The Unitary Development Plan was adopted in July 1995. Coinciding with the adoption of the Core Strategy in 2012 significant proportions of the UDP have been replaced; however, a number of policies were saved on 11 July 2012 and remain extant.

DC18.1 (Conservation Areas) states that the Council will give particularly careful consideration to development proposals within Conservation Area. The Council will seek to preserve and enhance the character of its designated conservation areas by carefully considering; the relationship of new structures to neighbouring buildings and spaces; and the effect of major changes to the appearance of existing buildings.

DC19.1 (Listed Buildings) states that the Council will have regard to the desirability of securing the retention, restoration, maintenance and continued use of such buildings and to protecting their general settings by; not permitting any external or internal alterations or addition to a listed building where, in its opinion, there would be an adverse effect on its architectural or historic character; and seek to preserve and enhance the setting of listed buildings by appropriate control over the design of new development in their vicinity, control over the use of adjacent land, and where appropriate, by the preservation of trees and landscape features.

Places for Everyone (2024)

The Places for Everyone Plan is a Joint Development Plan Document, providing a strategic plan and policies, for nine of the ten boroughs which make up Greater Manchester.

The following policies are considered relevant to this application:

JP-Strat2 (City Centre) states that the role of the City Centre as the most significant economic location in the country outside London will be strengthened considerably. The City Centre will continue to provide the primary focus for business, retail, leisure, culture and tourism activity in Greater Manchester, but the increasingly important residential role of the City Centre will be expanded. It will be a priority for investment in development and infrastructure. This will include addressing current network capacity issues in the City Centre which will enable the future expansion of the rapid transit public transport network across Greater Manchester. Improvements in the public realm, walking and cycling facilities, and green infrastructure will help to enhance the local character and environmental quality of the City Centre so that it can rival city centres across the globe, enabling it to compete effectively at the international level for investment, businesses, skilled workers, residents and tourists. A broad range of commercial accommodation will be delivered, helping the City Centre to capture growth across key economic sectors. The new functions within the City Centre will be delivered in a way that complement, rather than displace the area's non-residential functions and will seek to protect and enhance the city centre's historic environment and assets.

JP-P1 (Sustainable Places) states an aim to become one of the most liveable city regions in the world, consisting of a series of beautiful, healthy, and varied places, each having the following key attributes that all development, wherever appropriate, should be distinctive, with a clear identity, visually stimulating, socially inclusive, resilient, adaptable, durable, resource efficient, safe, supported by critical infrastructure, functional and convenient, incorporating accessibility, legible easy to move around, well connected, comfortable and inviting, incorporating high quality and well managed green infrastructure and public realm, well served by local shops, services and amenities.

JP-P2 (Heritage) states an aim to proactively manage and work with partners to positively conserve, sustain and enhance its historic environment and heritage assets and their settings. Opportunities will be pursued to aid the promotion, enjoyment, understanding and interpretation

of heritage assets, as a means of maximising wider public benefits and reinforcing Greater Manchester's distinct identity and sense of place. The policy requires development proposals affecting a designated heritage asset (or an archaeological site of national importance) and a conservation area to conserve those elements which contribute to its significance including those identified in any conservation area appraisal as making a positive contribution to the area. Harm to such elements will only be permitted where this is clearly justified and outweighed by the public benefits of the proposal.

The Guide to Development in Manchester Supplementary Planning Document and Planning Guidance (Adopted 2007)

This document provides guidance to help develop and enhance Manchester. In particular, the SPD seeks appropriate design, quality of public realm, facilities for disabled people (in accordance with Design for Access 2), pedestrians and cyclists. It also promotes a safer environment through Secured by Design principles, appropriate waste management measures, and environmental sustainability.

In Chapter 2 'Design', paragraph 2.7 outlines the City Council's expectations that all new developments should have a high standard of design making a positive contribution to the City's environment and encourages "the most appropriate form of development to enliven neighbourhoods and sustain local facilities. The layout of the scheme and the design, scale, massing, and orientation of its buildings should achieve a unified form which blends in with and links to adjacent areas.

National Planning Policy Framework (NPPF) (2024)

Decisions should accord with the requirements of the National Planning Policy Framework (NPPF) (2024), which sets out the Government's Planning Policies for England and how these are expected to be applied.

The following sections are of relevance to this application:

Section 6 (Building a strong and competitive economy) states a commitment to securing economic growth in order to create jobs and prosperity, building on the country's inherent strengths, and to meeting the twin challenges of global competition and of a low carbon future and places significant weight on the need to support economic growth through the planning system.

Section 7 (Ensuring the vitality of town centres) promotes competitive town centre environments.

Section 8 (Promoting healthy and safe communities) outlines how planning policies and decisions should aim to achieve healthy, inclusive, and safe places and beautiful buildings.

Section 10 (Supporting High Quality Communications) states that advanced, high quality and reliable communications infrastructure is essential for economic growth and social well-being, but advises that the number of radio and electronic communications masts, and the sites for such installations, should be kept to a minimum consistent with the needs of consumers, the efficient operation of the network and providing reasonable capacity for future expansion. Use of existing buildings and other structures for new electronic communications capability should be encouraged. Where new sites are required (such as for new 5G networks), equipment should be sympathetically designed and camouflaged where appropriate.

Section 12 (Achieving well-designed places) advises that the government attaches great importance to the design of the built environment. Good design is a key aspect of sustainable development, is indivisible from good planning, and should contribute positively to making places better for people.

It specifically states that:

"Development that is not well designed should be refused, specifically where it fails to reflect local design policies and government guidance on design. Developments should help to raise the standard of design more generally in an area and fit in with the overall form and layout of their surroundings" (**paragraph 139**).

At the heart of the Framework is a presumption in favour of sustainable development in terms, *"For plan-making"* and *"For decision-taking"*, (**paragraph 11**).

This is further explored in **paragraph 8**, which confirms that achieving sustainable development means that the planning system has three overarching objectives, which are interdependent and need to be pursued in mutually supportive ways (so that opportunities can be taken to secure net gains across each of the different objectives):

- a) an economic objective
- b) a social objective and
- c) an environmental objective.

Section 16 (Conserving and Enhancing the Historic Environment) addresses how proposals that affect heritage assets should be considered.

Paragraph 207 advises that Local Planning Authorities (LPAs) should require an applicant to describe the significance of any heritage assets affected. The level of detail should be sufficient to understand the potential impact of the proposal on their significance.

Paragraph 208 advises that LPAs should identify and assess the particular significance of any heritage asset that may be affected by a proposal (including by development affecting the setting of a heritage asset) taking account of the available evidence and any necessary expertise. They should take this into account when considering the impact of a proposal on a heritage asset, to avoid or minimise any conflict between the heritage asset's conservation and any aspect of the proposal.

Paragraph 210 advises that in determining applications, local planning authorities should take account of:

1. the desirability of sustaining and enhancing the significance of heritage assets and putting them to viable uses consistent with their conservation
2. the positive contribution that conservation of heritage assets can make to sustainable communities including their economic vitality; and
3. the desirability of new development making a positive contribution to local character and distinctiveness.

National Planning Practice Guidance (NPPG)

The National Planning Practice Guidance (NPPG) is a web-based resource which was launched in March 2014 and coincided with the cancelling of the majority of Government Circulars. It provides guidance on many aspects of planning including plan-making and decision taking.

The National Design Guide (January 2021)

Illustrates how well-designed places that are beautiful, enduring, and successful can be achieved in practice. It forms part of the Government's collection of planning practice guidance and should be read alongside the separate planning practice guidance on design process and tools.

There are 10 characteristics of well-designed places within the National Design Guide which are listed below:

- Context - enhances the surroundings
- Identity - attractive and distinctive
- Built form - a coherent pattern of development
- Movement - accessible and easy to move around
- Nature - enhanced and optimised
- Public Spaces - safe, social, and inclusive
- Uses - mixed and integrated
- Homes and buildings - functional, healthy, and sustainable
- Resources - efficient and resilient
- Lifespan - made to last

Other Legislation

Sections 16, 66, and 72 of the **Listed Buildings and Conservation Areas Act 1990** require that special consideration is given to the preservation of the significant fabric and setting of listed buildings and conservation areas.

Issues

Principle of the Development

The principle of the development is considered to be acceptable. The works are relatively minor in scale and in the case of the handrails, will improve accessibility to the premises.

Visual Amenity

The replacement of the modern door with a glazed door is considered to be a visual improvement, that will open up the entrance visually and provide better views into the historic interior.

The proposed resurfacing of steps in black terrazzo would have similarities with surface finish of main entrance steps, thereby reinstating a more fitting finish to the steps as opposed to the existing, lower quality grey quarry tiles.

The proposed brass balustrade attached to steps is considered to be visually discrete and would have low visual impact on the entrance.

Impact on Heritage

As St. James' Building is a large and encompassing building that is divided up into many units, the focus of the assessment of significance shall be on the specific section of the building that is directly affected by the proposed works.

The entrance to this unit on Oxford Street is an original integrated element to the main round-headed archway and follows the same architectural language as many other entrances to the

overall building, with it also being of a smaller round-headed arch with a single rather than triple keystone above.

The entrance is recessed within the rustic channelled masonry and polished granite plinth with these materials being evident to the reveals, which adds to the significance.

Existing entrance

The entrance is guarded by black metal gates and decorative segmental arch, with 'SAFE DEPOSIT' and the address number '77' incorporated within, painted gold.

It has not been confirmed if these gates are original but given that the St James' Safe Deposit Co Ltd has been in operation since St James Building finished construction in 1912, there is a significant probability that they are original. If not original, they are certainly historic and definitely add to the significance of this section of the building.

The steps and landing have been tiled in modern blue quarry tiles. There are signs indicating the use and opening hours set within the façade and recessed stone. The door is a modern, part glazed, part framed door, but with a historic segmental fan light and timber transom above. These elements all contribute to its significance.

The ongoing use of the St James' Safe Deposit Company contributes greatly to the overall historic significance of the wider building.

Once again, as St. James' Building is a large and encompassing building that is divided up into many units, the focus of the impact on the heritage asset shall be on the specific section of the building that is directly affected by the proposed works.

Proposed elevations

Proposed ground floor plan

The modern door that is to be replaced is non-original and so its significance is obviously lower than an original or historic door.

The proposed insertion of frameless glazed door is consistent with similar door to right hand secondary glazed door which was inserted in 2012.

The new door would be an enhancement visually as a lightweight contemporary intervention and sit below decorative glazed fanlight with brass handles and kick plates.

The proposed door will be located in the same position as the existing and will utilise existing fixing points as far as possible, therefore resulting in minimal impact upon the historic or original fabric and making a minor positive contribution to the visual amenity of the entrance.

The works to replace the door will result in a very low level of less than substantial harm.

The existing quarry tiles are considered to be low quality and to not contribute to the heritage significance.

The proposed resurfacing of steps in black terrazzo would have similarities with surface finish of main entrance steps, thereby reinstating a more fitting finish to the steps as opposed to the existing grey quarry tiles.

A sample of the terrazzo tiles have been viewed on site by a Planning Officer and Conservation Officer from Manchester City Council, who have confirmed that the tiles are of a satisfactory quality. A condition has been added to ensure that the works are carried out in accordance with the approved sample.

Proposed sample against existing steps

Overall, this is considered to have a very low impact on the heritage asset and cause a very low level of less than substantial harm.

The proposed brass balustrade attached to steps is considered to be visually discrete and would have low visual impact on the entrance.

Although it would introduce a small degree of additional clutter that is not currently present, the proposed balustrade would blend in well with other brass elements currently in situ at this entrance and on the exterior of the wider building, including those positioned either side of the adjacent main entrance. This design approach limits the adverse impact upon the entrance way as far as possible whilst also improving accessibility.

A sample of the brass balustrade have been viewed and the tiles are of a satisfactory quality. A condition has been added to ensure that the works are carried out in accordance with the approved sample.

Brass sample (Antique brass)

Overall, this is considered to have a low level of less than substantial harm on the heritage asset and not to be a significant enough addition to detract from the historic significance of the building.

Method statements have not been submitted for any of the works mentioned above. A condition has been included on the application to ensure that these method statements are submitted to and agree in writing by the City Council as the Local Planning Authority, before any of these works commence.

With this element of control in place, the City Council will be able to ensure that the methodology of carrying out these works results in as little impact upon the heritage asset as possible.

Public benefits

The inclusion of a frameless glazed door is considered to be a modern solution that maximises the prominence of the surviving heritage features around the door including the fanlight above, and maximises views through to the historic hallway beyond, from the street. This is considered to be a minor public benefit.

The re-tiling of the steps and addition of brushed brass stair nosings is considered to replace a low-quality existing tiling, which will result in a visual enhancement, which will bring a low beneficial impact by allowing for better appreciation of this historic entrance.

The addition of the handrails will improve accessibility and safety of those using the stairs, which is considered to be a significant public benefit.

Most importantly, the continued use of this unit by St James' Safe Deposit Company, an original occupier of St James' Building, is considered to be a significant public benefit as it greatly contributes to the historical significance and appreciate of the historic building.

Overall, the combined works are considered to have a positive public beneficial effect on the listed asset and would also have a minor positive impact on the Whitworth Conservation Area.

Access

The Listed status of the building, along with its original design does present accessibility challenges to the premises. The need to provide access to the basement dictate that it is not possible for level access to be provided via this entrance.

Level access is available adjacent to the main entrance, however.

The addition of the handrail is seen to improve accessibility for some users.

Overall, there are significance challenges with providing full level access from this entrance and the ability to access the premises via the main entrance, which has level access, means that the proposal can be considered acceptable in terms of access.

Public Safety

The addition of the handrail is seen to greatly contribute to public safety, as it will help to prevent users from slipping, particularly in wet conditions, as well as enable some users to better support themselves whilst climbing the steps.

Conclusion

Conclusion In view of the above, this application is considered acceptable, as the works are considered to cause a low level of less than substantial harm to the special interest and the historic character of the Grade II listed building. Any less than substantial harm caused as a result of these works is considered to be outweighed by the public benefit that will result from these works being carried out, including the continued use of the space, the introduction of w-fi, the safety that the installation of CCTV will bring, and the irrigation that will support the landscaping in the Quadrangle, which enhances the setting of the designated asset.

Other Legislative Requirements

Equality Act 2010

Section 149 (Public Sector Equality Duty) of the Equality Act 2010 requires due regard to the need to: Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act and; Advance equality of opportunity between persons who share a protected characteristic and persons who do not share it. The Equality Duty does not impose a

legal requirement to conduct an Equality Impact Assessment. Compliance with the Equality Duty involves consciously thinking about the aims of the Equality Duty as part of the process of decision-making.

Human Rights Act 1998 considerations

This application needs to be considered against the provisions of the Human Rights Act 1998. Under Article 6, the applicants (and those third parties, including local residents, who have made representations) have a right to a fair hearing and to this end the local planning authority must give full consideration to their comments.

Protocol 1 Article 1, and Article 8 where appropriate, confer(s) a right of respect for a person's home, other land and business assets. In taking account of all material considerations, including Council policy as set out in the Core Strategy and saved policies of the Unitary Development Plan, the Director of Planning, Building Control & Licensing has concluded that some rights conferred by these articles on the applicant(s)/objector(s)/resident(s) and other occupiers and owners of nearby land that might be affected may be interfered with but that that interference is in accordance with the law and justified by being in the public interest and on the basis of the planning merits of the development proposal. She believes that any restriction on these rights posed by the recommendation given is proportionate to the wider benefits of and that such a decision falls within the margin of discretion afforded to the Council under the Town and Country Planning Acts.

Recommendation: Approve

Article 35 Declaration

Officers have worked with the applicant/agent in a positive and proactive manner based on seeking solutions to problems arising in relation to dealing with the application.

Condition(s) to be attached to decision for approval

1) The development must be begun not later than the expiration of three years beginning with the date of this permission.

Reason - Required to be imposed pursuant to Section 91 of the Town and Country Planning Act 1990.

2) The development hereby approved shall be carried out in accordance with the following drawings and documents, received by Manchester City Council as the Local Planning Authority on 28 March 2025:

- Location Plan
- Proposed GF Door 252-101 3.00
- Proposed GF Door 252-102 3.00
- Heritage, Design and Access Statement

Reason - To ensure that the development is carried out in accordance with the approved plans. Pursuant to policies SP1 and DM1 of the Core Strategy and saved policies DC18 and DC19 of the Unitary Development Plan of Manchester.

3) The samples of the brass balustrade and any other brass elements associated with the proposal (door ironmongery and footplate, step nosings), shall be carried out in accordance with the Antique Brass sample, viewed on site by Local Planning Authority officers on 08 May 2025.

The samples of the black terrazzo steps shall be carried out in accordance with the Solus Ceramics 7TER124 Honed R9 sample, viewed on site by Local Planning Authority officers on 08 May 2025.

The development shall be fully implemented in accordance with the approved details, which shall be maintained in situ thereafter.

Reason - In the interests of visual amenity and because the proposed works affect a building which is included in the Statutory List of Buildings of Special Architectural or Historic Interest and careful attention to building work is required to protect the character and appearance of this building and to ensure consistency in accordance with policy and EN3 of the Core Strategy and saved policy DC19.1 of the Unitary Development Plan for the City of Manchester.
