

# NOTES

- The new gates are to replicate the size of the existing gates in all dimensions (width, height and thickness)
- All timber components, boards and strips to be treated and decorated to the same colour as the existing gates using gloss paint
- All existing ironmongery to be re-used if possible. All components are to be carefully removed, cleaned and serviced and installed on to the new gates in their original locations on the existing gates
- The existing metal guide bolts under the wheels fitted to the bottom edges of the gates are to be fitted and re-set in to the existing existing surface so that they do not move or vibrate and fully support the weight of the gates along their entire length
- No works are proposed to the existing brick piers, bridge parapet or railing

Existing stone cappings & brick piers retained (no works planned to these elements)

## Rear (Inside) Elevation of Gates

Existing cast metal 'spikes' to top edge of existing gates to be carefully removed, cleaned, repaired if necessary and re-located and fixed to new gates in exact same locations

Existing hinges and mounting to brick piers to be retained, cleaned, serviced and relocated and attached to new gates

New gates to be decorated in same colour as existing and all boards, strips and other timber components are to replicate the existing gates

New gates to be secured shut using bolt and padlock as existing

No works are proposed to existing railings and bridge parapet

Existing drop-bolt re-used

Existing wheels retained, serviced & cleaned & fixed to new gates

Floor tracks to be re-set into ground
