M & H Snowie
was established
in 1988 and has
given its
customers the
quality of
product and
service they
demand. Snowie
Heritage Bricks
was formed in
2001 and has

continued to give quality service to its customers in the form of a product that they know they can trust. We work with excellent haulage contractors and have a commitment to maintaining stock levels to service our customers' needs. All our bricks are sold through reputable merchants. We recognise that those merchants, our customers, are our business and the support received from customers old and new is greatly appreciated.

The Snowie Heritage Brick was first introduced into the market place in 1996 as a quality match for the old type brickwork in many cities. It has been used extensively in the United Kingdom and has been specified because of its high compressive strength and F2 category, designed to withstand severe exposure. Due to the excellent match the brick is with old brickwork, planning

departments within local councils have requested that the bricks be used
