# PRELIMINARY GEOENVIRONMENTAL APPRAISAL

**of land occupied by**

**THE EQUITABLE BUILDING, 7–9, ST. ANN STREET, MANCHESTER**

**Prepared for**

**PH Property Holdings Ltd.**

**Report No. 5346-G-R001-1**

**Date: December 2024**

## Executive Summary

The site (property) is located at 7-9, St. Ann Street, Manchester City Centre (NGR 383750, 398400). The site occupies an area of 0.1 hectares and is currently occupied entirely by a multi-story building with commercial businesses operating on the ground floor.

IDG were commissioned by PH Property Holdings Ltd to provide a preliminary geoenvironmental appraisal of the site. It is understood that consideration is being made to convert the 2nd and 3rd floors into residential flats, with alteration works to the basement, ground floor and 1st floor to facilitate services and access. The proposed floor layouts are provided by JB+CO Architects and Designers.

IDG's investigation included a review of available desk study information.

A summary of salient geoenvironmental issues is provided in the table below.

| **Issue** | **Remarks** |
|---|---|
| Location | 7-9, St Ann Street, Manchester City Centre |
| Former to present uses | Offices and several commercial businesses. |
| Anticipated Ground Conditions | Glaciofluvial sand and gravel beneath the western area of the site. No superficial deposits beneath the central and eastern portions of the site. Underlain by Sandstone of the Chester Formation. |
| Mining & Quarrying | There are no recorded quarries within the vicinity of the site.<br>The site does not lie within the Cheshire Subsidence Compensation District.<br>The site does lie within a Coal Mine Reporting Area but not within a development high risk area.<br>The Coal Authority states that the property is not within a surface area that could be affected by any recorded underground coal mining. |
| Hazardous Gas | There are no known or suspected areas of landfill recorded within the vicinity of the site.<br>The Coal Authority states that there is no record of mine gas emission requiring action. |
| Radon | The property is not location in a Radon Affected Area. |
| Anticipated Contamination | Potential for asbestos-containing materials within the interior of the building, as it's construction cycle pre-dates the year 2000. |
| Flooding | The site is depicted within an area with limited potential for groundwater flooding to occur. |

At this stage, the anticipated significant abnormals relating to geoenvironmental issues at the site are:

- An asbestos survey of the building is recommended.

*This brief summary should not be assumed to represent a complete account of all the potential geo-environmental issues that may exist at the site. As such it is strongly recommended that the report be read in its entirety.*

| 5346-G-R001-1 | December 2024 | Updated to incorporate revised layout plans |

**FOREWORD (Preliminary Geoenvironmental Investigation Report)**

This report has been prepared for the sole use and reliance of the Client named on page 1 and cannot be relied upon by any other parties without the express written authorisation of ID Geoenvironmental Limited (IDG). Any unauthorized third party relies on this report at their own risk and the authors owe them no duty of care.

The report should be read in its entirety, including all associated drawings and appendices. IDG cannot be held responsible for any misinterpretations arising from the use of extracts that are taken out of context. However, it should be noted that in order to keep the number of sheets of paper in the hard copy to a minimum, some information (e.g. laboratory test certificates) is only included within the "electronic", PDF Report.

The findings and opinions conveyed in any Desk Study section of the report (including review of any third party reports) are based on information obtained from the sources listed, which IDG understands are reliable. All reasonable skill, care and diligence have been applied in examining the information obtained. However, IDG accept no responsibility for inaccuracies in the data supplied or for opinions based on any such inaccurate data.

Where the report refers to the potential presence of invasive weeds such as Japanese Knotweed, or the presence of asbestos containing materials, it should be noted that the observations are for information only and should be verified by a suitably qualified expert.

IDG reserve the right to amend their conclusions and recommendations in the light of further information that may become available.

**PRELIMINARY GEOENVIRONMENTAL INVESTIGATION**

**of land occupied by**

**THE EQUITABLE BUILDING, 7-9 ST. ANN STREET, MANCHESTER**

# 1 INTRODUCTION

## 1.1 The Commission and Brief

1.1.1 ID Geoenvironmental Limited (IDG), have been commissioned by PH Property Holdings Ltd to provide a geoenvironmental appraisal of land occupied by the Equitable Building, 7-9, St Ann Street, Manchester, hereafter referred to as 'the site'.

1.1.2 The agreed scope of works included:

- An assessment of the environmental setting and land use history of the site and adjacent area from published geological and topographic maps and environmental database sources.
- Obtaining a mining report from the Coal Authority.
- Identification of potential receptors and derivation of a site conceptual model.

1.1.3 Correspondence regarding IDG's appointment, including the brief for this investigation, is provided in Appendix D.

1.1.4 It is understood that consideration is being given to a residential redevelopment of the site as described in Section 2 below.

1.1.5 The principal objective of this preliminary phase of investigation is to identify geoenvironmental issues affecting the site.

## 1.2 Report Format and Limitations

1.2.1 Standard definitions, procedures and guidance necessary for assessment of the environmental setting of the site are provided within Appendix E.

1.2.2 This Preliminary Investigation comprised an inspection of historical and geological maps and information provided by the Landmark Information Group and The Coal Authority.

1.2.3 General notes and limitations relevant to all IDG preliminary investigations are described in the Foreword and should be read in conjunction with this report. The text of the report draws specific attention to any modification to these procedures and to any other special techniques employed.

# 2 SITE DESCRIPTION AND THE PROPOSED DEVELOPMENT

## 2.1 General

2.1.1 The site location is shown on Drawing No. 5346-G-D001 presented in Appendix A. Site details are summarised in the following table.

**Summary of Site Location Details**

| | |
|---|---|
| **Location** | 7-9, St Ann Street, Manchester City Centre |
| **Current Access** | Off Barton Square Road |
| **NGR** | 383750, 398400 |
| **Approximate Area** | 0.1 ha |
| **Known services** | No service information provided at this stage |
| **Surrounding land uses** | The surrounding land is utilised by multiple commercial properties.<br>Saint Ann's Church is present to the South East |

## 2.2 Site Operations

2.2.1 The site is occupied by a four-storey commercial building with associated courtyard and basement.

2.2.2 The ground floor is currently utilised by multiple commercial retail businesses.

## 2.3 The Proposed Development

2.3.1 It is understood that consideration is being given to convert the 2nd and 3rd floors into residential flats, with alteration works to the basement, ground floor and 1st floor to facilitate services and access. The updated proposed floor plan layouts (Drg. References 1572-AL(05)2110 to 1572-AL(05)2170) provided by JB+CO Architects and Designers dated November 2024 are presented within Appendix A.

# 3 SITE HISTORY

## 3.1 Historical OS Maps

3.1.1 In order to investigate the development history and previous land uses at the site and immediate surrounding land, site centred extracts from Ordnance Survey (OS) plans dating back to 1848 were examined. These plans are presented in Appendix B.

3.1.2 The following table provides a summary of the salient points relating to the history of the site. Significant former uses/operations are highlighted in bold text for ease of reference.

**Summary of Site History**

| Date(s) | Site | Surrounding Land |
|---|---|---|
| 1848 – 1851 | The site is depicted to comprise multiple adjoined buildings/ properties. | St. Ann Street is depicted immediately adjacent to the site's southern boundary with buildings and St. Anne's Church beyond.<br>Barton Square Road is depicted immediately adjacent to the site's western boundary with buildings beyond.<br>An attached building is depicted to the north.<br>St. Ann's Square is depicted immediately adjacent to the site's eastern boundary with buildings beyond.<br>The River Irwell is depicted ~200m NW of the site. |
| 1891 – 1896 | No significant change. | Tram lines are depicted ~30m W of the site.<br>An **Old Quarry** is depicted ~195m N of the site.<br>The **Guardian Printing Works** is depicted ~205m NW of the site.<br>**Clowes Street Works (Iron)** is depicted ~215m NW of the site.<br>**Lancashire Veneer Saw Mills** is depicted ~220m NW of the site.<br>**City's Printing Works and Albert Packing House** are depicted ~220m SW of the site.<br>An **Engineering Works**, **Electric Portable Battery Works** and a **Sugar Refinery**, all with associated chimneys are depicted ~235m NW of the site.<br>The **Eagle Foundry (Iron)** is depicted ~245m NW of the site.<br>An **Engineering Works** is depicted ~255m NW of the site.<br>A **Timber Yard** is depicted ~260m NW of the site.<br>A train station is depicted ~390m N of the site. |
| 1908 – 1909 | No significant change. | Three **Printing Works** are depicted ~150m NE and ~260m NW and ~280m S of the site.<br>The **Old Quarry** ~195m N of the site is depicted as the Temperance Hotel.<br>The **Guardian Printing Works** ~205m NW of the site is no-longer depicted. |

| | | |
|---|---|---|
| | | **City's Printings Works** and **Albert Packing House** ~220m SW of the site are no-longer depicted.<br>The **Engineering Works**, **Electric Portable Battery Works** and **Sugar Refinery** ~235m NW of the site are no-longer depicted.<br>The **Timber Yard** ~260m NW of the site is no-longer depicted.<br>The train station ~390m N of the site is depicted as the Exchange Station. |
| 1923 | No significant change. | A **Finishing Works** is depicted ~250m NW of the site. |
| 1931 – 1938 | No significant change. | The tram line ~30m W is no-longer depicted. |
| 1948 – 1954 | The building is depicted as a **Ruin**. | An **Electric Sub-Station** is depicted ~20m NE of the site.<br>A **garage** is depicted ~150m W of the site. |
| 1955 – 1958 | The site contains a large building footprint and is depicted as being split into multiple properties (assumed to be multiple commercial properties as per current use/footprint) | No significant change. |
| 1962 – 1972 | No significant change. | The Exchange Station ~390m N of the site is depicted as dis-used. |
| 1975 | No significant change. | No significant change. |
| 1979 – 1984 | No significant change. | The **garage** ~150m W of the site, is depicted as a car park.<br>Two **Electric Sub-Stations** are depicted ~120m and ~190m SW of the site. |
| 1985 - 1987 | No significant change. | The Exchange Station~390m N is depicted as a car Park. |
| 1993 – 1994 | No significant change. | No significant change. |
| 1995 – 1999 | No significant change. | No significant change. |
| 2000 – 2006 | No significant change. | No significant change. |
| 2024 | No significant change. | No significant change. |

3.1.3 It is noted that the site is depicted as a 'Ruin' on 1948 plans, along with numerous other sites in the vicinity. It is considered that this is representative of significant bomb damage sustained to the site and wider city centre area during World War II.

## 3.2 Historical Building Plans

3.2.1 Historical Building Plans dating back to 1917 demonstrate that the building has be occupied by offices and/or commercial businesses up to the present day. These plans are presented in Appendix B.

3.2.2 The plans also demonstrate that the building underwent re-construction of the central and northern sections between 1951 and 1962.

# 4 GEOLOGY AND MINING

## 4.1 Geology

4.1.1 The published 1:50,000 scale geological map (BGS Sheet 85) depicts the far western side of the site to be underlain by superficial deposits comprising Glaciofluvial sand and gravel. Superficial deposits are shown to be absent beneath the central and eastern portions of the site.

4.1.2 In addition, the BGS Sheet 85 depicts the site to be within or close proximity to the approximate margin of a superficial deposit filled buried channel or valley.

4.1.3 The bedrock beneath the site comprises Sandstone of the Chester Formation.

4.1.4 Published 1:50,000 scale geological plans depict an inferred fault approximately 17m southwest of the site striking NW-SE with an unknown displacement.

## 4.2 BGS Borehole Records

4.2.1 Records have been obtained from BGS for the exploratory holes shown in the following table.

**BGS Borehole Records**

| BGS reference | Date | Location | Final depth m | Summary of strata encountered |
|---|---|---|---|---|
| SJ89NW1453 | 1979 | 31m W of site | 12.0 | 0.0 – 0.1m TARMAC<br>0.1 – 0.4m CONCRETE<br>0.4 – 1.3m MADE GROUND: Grey/black ash, brick and rubble fill<br>1.3 – 2.2m MADE GROUND: Soft to firm mixed grey/black/brown silty clay with patches of ash and brick rubble<br>2.2 – 7.1m Medium dense to dense grey/brown slightly silty SAND & GRAVEL with cobbles and occasional thin bands of clay<br>7.1 – 7.8m Very stiff dark grey/brown silty CLAY<br>7.8 – 10.0m Dense grey/brown slightly silty SAND & GRAVEL<br>10.0 – 12.0m Very dense weakly cemented brownish red silty fine to medium grained SANDSTONE. |
| SJ89NW63 | Not supplied | 44m NW of site | 14.02 | 0.0 – 3.66m MADE GROUND<br>3.66 – 7.01m SAND, GRAVEL & MARL<br>7.01 – 14.02m SANDSTONE |
| SJ89NW1452 | 1979 | 55m NW of site | 12.0 | 0.0 – 0.1m TARMAC<br>0.1 – 0.28m COBBLESTONE<br>0.28 – 0.5m HARDCORE<br>0.5 – 1.4m MADE GROUND: Moderately compacted silty sand, gravel and clay with fragments of brick<br>1.4 – 3.5m Medium dense grey/brown silty SAND & GRAVEL with occasional Cobbles<br>3.5 – 6.75m Dense grey/brown clayey SAND & GRAVEL with cobbles<br>6.75 – 7.7m Dense brownish red silty fine to medium grained SAND<br>7.7 – 10.5m Very dense weakly cemented brownish red silty fine to medium grained SANDSTONE<br>10.5 – 12.0m Very dense/hard partially cemented brownish red SANDSTONE |

## 4.3 BGS GeoSure Natural Ground Stability Hazard Datasets

4.3.1 Information from BGS relating to potential ground stability hazards is summarised in the following table.

**Ground Stability Hazards**

| Hazard | Hazard rating | Estimated Distance from Site |
|---|---|---|
| Potential for shrinking or swelling clay ground stability hazards | No Hazard | On-site |
| Potential for landslide stability hazards | Very Low | On-site |
| Potential for ground dissolution stability hazards | No Hazard | On-site |
| Potential for compressible ground stability hazards | No Hazard | On-site |
| Potential for collapsible ground stability hazards | Very Low | On-site |
| Potential for running sand ground stability hazards | Low | On-site |

## 4.4 Salt

4.4.1 The site does not lie within the Cheshire Brine Subsidence Compensation District.

## 4.5 Coal Mining

4.5.1 The site lies within a Coal Mine Reporting Area but is not within a development high risk area.

4.5.2 The Coal Authority CON29M Coal Mining Report Ref. 51003438747001 dated 22nd July 2024 is presented in Appendix C and states the following:

4.5.3 The property is not within a surface area that could be affected by any recorded underground coal

mining.

4.5.4 The property is not in an area where the Coal Authority has received an application for, and is currently considering whether to grant a licence to remove or work coal by underground methods.

4.5.5 There are no recorded coal mine entries known to the Coal Authority within or within 20m, of the boundary of the property.

4.5.6 The Coal Authority is not aware of any damage due to geological faults or other lines of weakness that have been affected by coal mining.

4.5.7 The property is not within the boundary of an opencast site from which coal has been removed by opencast methods.

4.5.8 The Coal Authority has not received a damage notice or claim for the subject property, or any property within 50m of the enquiry boundary since 31st October 1994.

4.5.9 The Coal Authority has no record of a mine gas emission requiring action.

4.5.10 The property has not been subject to remedial works, by or on behalf of the Coal Authority, under its Emergency Surface Hazard Call Out procedures.

# 5 ENVIRONMENTAL SETTING

## 5.1 General

5.1.1 Notes describing how the site's environmental setting has been assessed are included in Appendix E. Environmental information obtained from Landmark Information Group (Landmark) is presented in Appendix C. A summary of relevant information is provided below.

## 5.2 Hydrogeology

5.2.1 The Landmark Envirocheck report states that:

- The superficial deposits beneath the site are classified as a Secondary A Aquifer.
- The bedrock beneath the site is classified as a Principal Aquifer.
- The combined Groundwater Vulnerability is classified as Secondary Superficial Aquifer – Low Vulnerability.
- There are no groundwater abstraction licenses within or within 200m of the site. The closest licence is 289m north of the site and is held by British Telecommunications Plc.
- The site does not lie within a Source Protection Zone.

## 5.3 Hydrology

5.3.1 The Landmark Envirocheck report states that:

- The nearest named water course is the River Irwell 190m northwest of the site, and is designated with a GQA Grade of River Quality E.
- There are no surface water abstraction licenses within or within 200m of the site.
- The closest license is 757m SE of the site involving water from the canal and is held by North Western Electricity Board.

## 5.4 Pollution Incidents

5.4.1 No significant pollution incidents have been recorded within the vicinity of the site.

5.4.2 The closest incident occurred on the 26th of May 1992 approximately 163m northwest of the site involving a miscellaneous pollutant in proximity to the River Irwell. This event was classified as a Category 3 – Minor incident.

## 5.5 Risk of Flooding from Rivers and Sea

5.5.1 The site does not lie within an area depicted on EA Flood Zone maps to be at risk of flooding from rivers or the sea.

## 5.6 Susceptibility to Groundwater Flooding

5.6.1 BGS state that there are BGS groundwater flooding susceptibility areas within 50m of the subject site, relating to superficial deposits flooding. The highest susceptibility is Limited Potential for groundwater flooding to occur.

## 5.7 Radon

5.7.1 The property *is not located* in a Radon Affected Area, as less than 1% of properties are above the Action Level. Building Control Regulations do not require radon protection measures to be installed.

## 5.8 Landfills

5.8.1 There are no known or suspected areas of landfill recorded in the vicinity of the site.

5.8.2 The OS historical maps depict an old quarry approximately 195m north of site between 1891 and 1908. This is not considered to be a potential source of hazardous ground gas due to the relative small size of the quarry and the time elapsed since being infilled.

## 5.9 Current Land Uses and Contemporary Trade Directory Entries

5.9.1 Several commercial businesses currently occupy the ground floor of the building present onsite.

5.9.2 An electrical sub-station lies approximately 20m northeast of the site.

## 5.10 Dangerous or Hazardous Sites

5.10.1 There are no COMAH or NIHHS recorded sites within the vicinity of the site.

## 5.11 Sensitive Land Uses

5.11.1 No Sensitive Land Uses have been identified within the vicinity of the site.

# 6 PRELIMINARY CONCEPTUAL SITE MODEL

## 6.1 General

6.1.1 Based on the data presented in the preceding sections of this report, a Preliminary Conceptual Site Model has been determined as outlined below.

***Potential contamination sources***

6.1.2 The historical plans depict the site to have been fully occupied by a building since 1848 to the present day, with a brief period between 1848 and 1955 where the northern portion of the building is depicted as a ruin. In addition, the historical building plans demonstrate that the building has only been occupied by offices and commercial retail businesses, which is considered unlikely to have given rise to significant contamination. Minor localised contamination may have taken place during the cycle of construction, partial demolition and alteration of the building.

6.1.3 Asbestos containing materials are potentially present within the interior of the building as the construction cycle pre-dates the year 2000.

6.1.4 No sources of hazardous ground gas have been identified, therefore, there is no significant risk from hazardous ground gas.

***Human receptors***

6.1.5 Following the proposed redevelopment, human receptors will include residents within the new properties and workers & the general public on the ground floor and in neighbouring properties.

6.1.6 Transient risks to construction workers from handling contaminated soils are normally addressed by the adoption of appropriate health and safety measures during the construction works, and therefore these receptors are not considered further. Similarly, risks to residents in neighbouring properties due to airborne dust or vapours during redevelopment works should be addressed by the adoption of suitable measures.

***Controlled water receptors***

6.1.7 The superficial deposits beneath the site are classified as a Secondary A Aquifer. The underlying rocks are classified as a Principal Aquifer. The site does not lie within a Source Protection Zone.

6.1.8 The nearest surface watercourse is the River Irwell, with a low quality designation of GQA Grade E, which flows in a southerly direction, approximately 190m beyond the site's western boundary.

6.1.9 Based on the above, the site's environmental setting has been assessed as low to moderate sensitivity.

***Preliminary Conceptual Site Model***

**Summary of Potential Pollutant Linkages**

| Potential Contamination Source | Receptors | Plausible Pathways | Evidence / Site Features |
|---|---|---|---|
| Potential for Asbestos containing materials within the building | Human Health (end-users of converted residential properties, construction workers) | Inhalation of dust containing asbestos fibres | e.g. Construction, partial demolition and alteration cycle of the building pre-dating the year 2000. |

## 6.2 Land Contamination - Part IIA

6.2.1 Local Authorities have responsibilities with respect to contaminated land in the context both of Part IIA of the Environmental Protection Act 1990, and the Town and Country Planning Act 1990.

6.2.2 The contaminated land regime in Part IIA of the Environmental Protection Act 1990 was introduced specifically to address the historical legacy of land contamination. It applies where there is unacceptable risk, assessed on the basis of the current use and the relevant circumstances of the land. It is not directed to assessing risks in relation to a future use of the land that would require a specific grant of planning permission. This is primarily a task for the planning system, which aims to control development and land use in the future.

***National Planning Policy Framework 2019***

6.2.3 This site is being considered for redevelopment and therefore potential contamination issues have to be considered to ensure compliance with the Town & Country Planning Act 1990 and the National Planning Policy Framework 2019 (NPPF).

6.2.4 In accordance with Paragraph 178 of the NPPF 2019, the local Planning Authority should also ensure that:

- a site is suitable for its proposed use taking account of ground conditions and any risks arising from land instability and contamination. This includes risks arising from natural hazards or former activities such as mining, and any proposals for mitigation including land remediation (as well as potential impacts on the natural environment arising from that remediation);
- after remediation, as a minimum, land should not be capable of being determined as contaminated land under Part IIA of the Environmental Protection Act 1990; and
- adequate site investigation information, prepared by a competent person, is available to

inform these assessments.

6.2.5 Paragraph 179 of the NPPF 2019 states, "where a site is affected by contamination or land stability issues, responsibility for securing a safe development rests with the developer and/or landowner".

6.2.6 Paragraph 180 states "planning policies and decisions should also ensure that new development is appropriate for its location taking into account the likely effects (including cumulative effects) of pollution on health, living conditions and the natural environment, as well as the potential sensitivity of the site or the wider area to impacts that could arise from the development".

***This Site***

6.2.7 The current use of the site is considered unlikely to have given rise to significant ground and groundwater contamination; however, the construction, partial demolition and alteration cycle may have resulted in localised contamination.

6.2.8 It is considered that the site should be suitable for the proposed use, subject to the comments made in Section 7.

# 7 CONCLUSIONS AND RECOMMENDATIONS

## 7.1 General

7.1.1 It is understood that consideration is being made to convert the 2nd and 3rd floors into residential flats, with alteration works to the basement, ground floor and 1st floor to facilitate services and access.

7.1.2 The main issues considered in this report, and in particular in Sections 3 and 4, are based on a review of historical data and available information. The report provides an assessment of geoenvironmental issues and implications for the current and proposed use of the site, together with issues associated with residential redevelopment of the site.

## 7.2 Contamination

7.2.1 The site has been occupied by a building and used as offices and/or commercial retail businesses since 1848. This is considered unlikely to have given rise to significant contamination. Minor localised contamination may have arisen from the construction, partial demolition and alteration cycle of the building.

7.2.2 Asbestos containing materials are potentially present within the building as the construction cycle pre-dates the year 2000.

## 7.3 Hazardous Gas

7.3.1 The property *is not located* in a Radon Affected Area, as less than 1% of properties are above the Action Level. Building Control Regulations do not require radon protection measures to be installed.

7.3.2 There are no known or suspected areas of landfill recorded within the vicinity of the site.

7.3.3 The Coal Authority states that there is no record of a mine gas emission requiring action.

## 7.4 Mining and Quarrying

7.4.1 There are no recorded quarries within the vicinity of the site.

7.4.2 The site does not lie within the Cheshire Subsidence Compensation District.

7.4.3 The site does lie within a Coal Mine Reporting Area but not within a development high risk area.

7.4.4 The Coal Authority states that the property is not within a surface area that could be affected by

any recorded underground coal mining.

## 7.5 Flooding

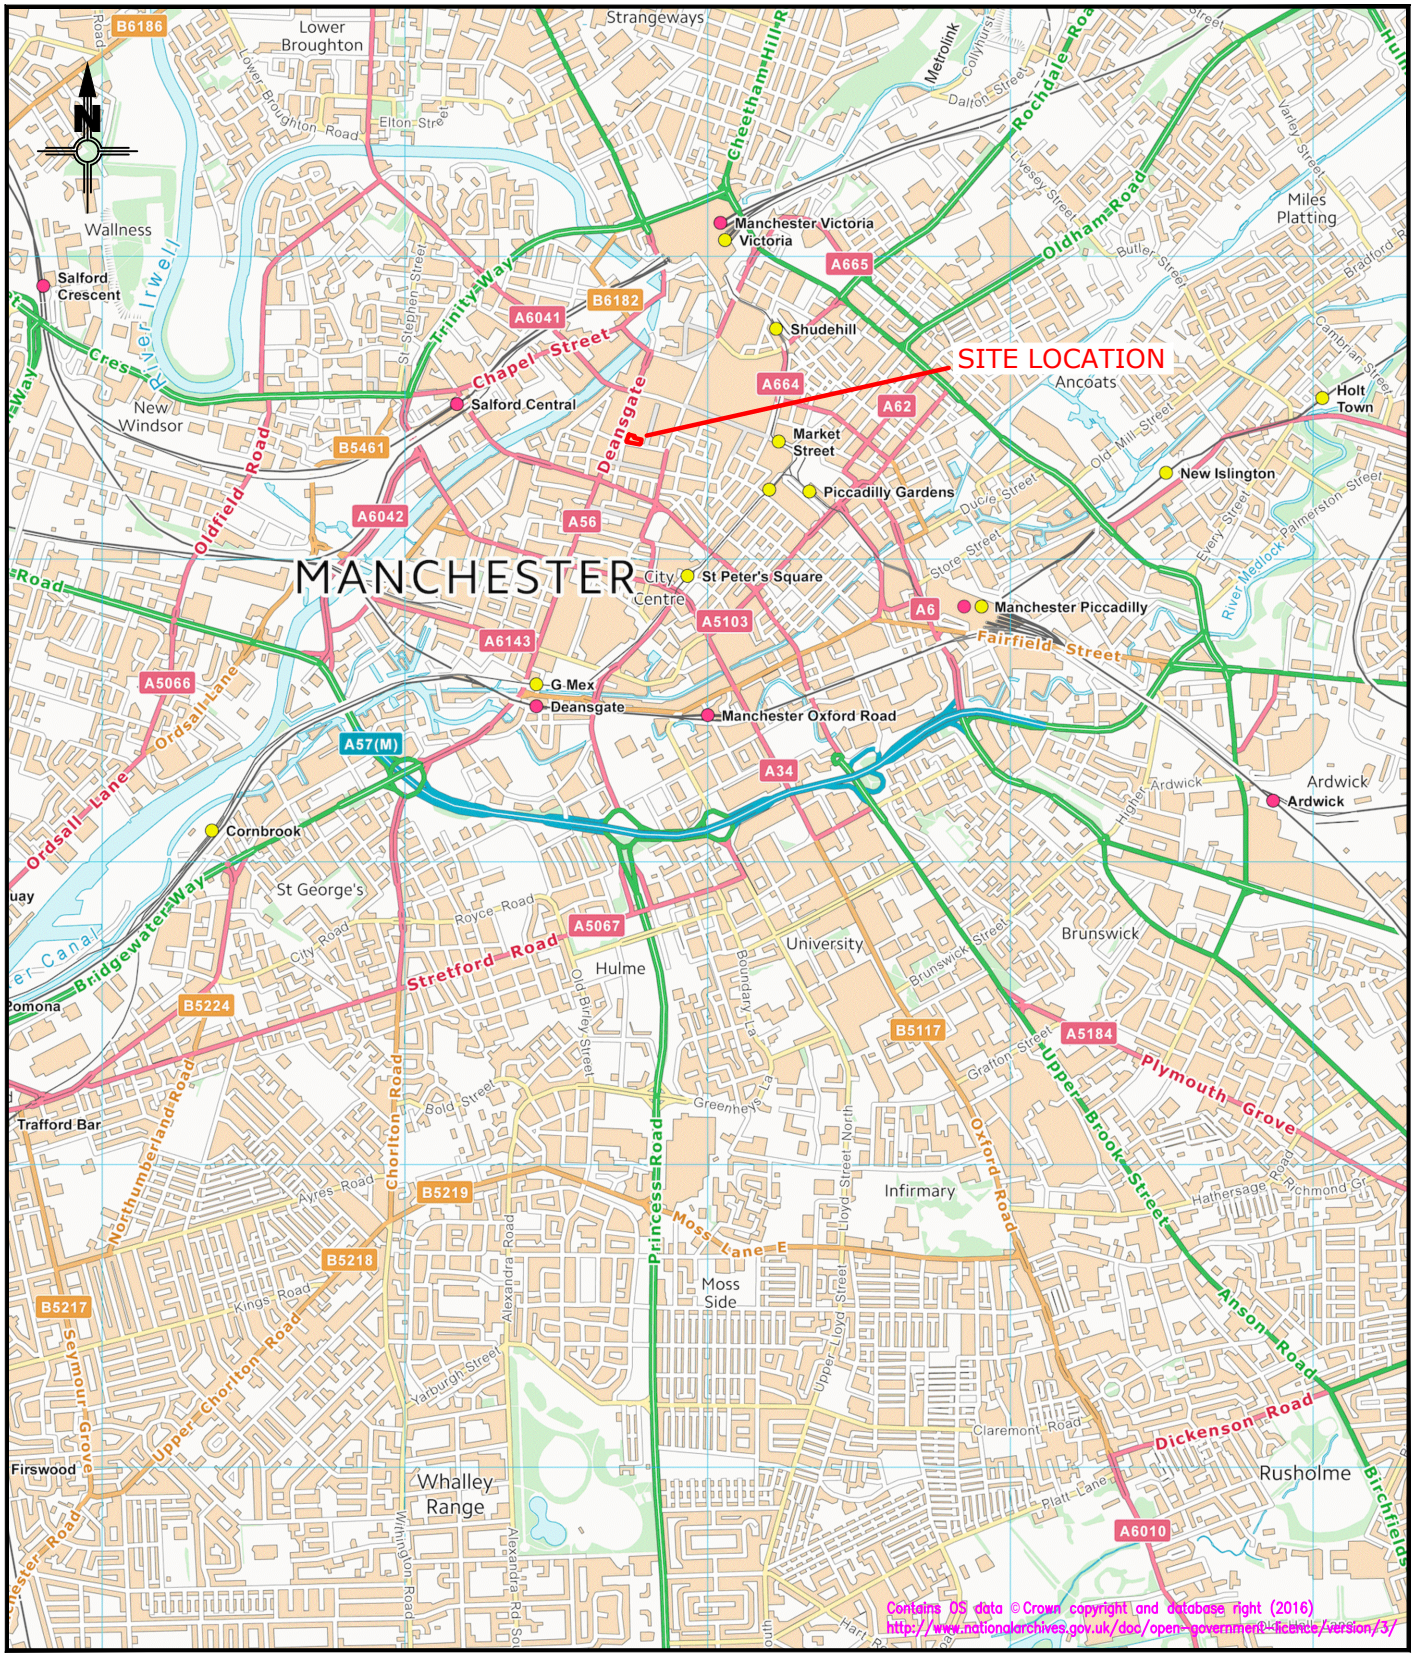

7.5.1 BGS state that there are BGS groundwater flooding susceptibility areas within 50m of the subject site, relating to superficial deposits flooding. The highest susceptibility is Limited potential for groundwater flooding to occur.

## 7.6 Further Recommendations

7.6.1 An asbestos survey of the building is recommended.

7.6.2 It is unlikely that the proposed redevelopment to residential use will require any ground intrusion. We would note however that should any ground intrusion be proposed, given the site's history of likely bomb damage during WWII, a UXO survey would be prudent.

# Lancashire And Furness

## Published 1848

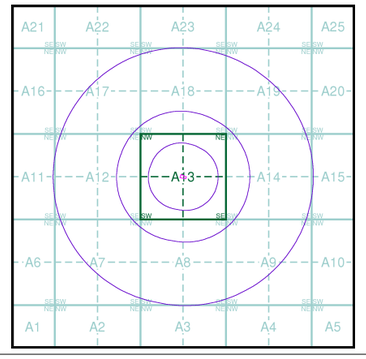

## Source map scale - 1:10,560

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840`s. In 1854 the 1:2,500 scale was adopted for mapping urban areas; these maps were used to update the 1:10,560 maps. The published date given therefore is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas. In the late 1940`s, a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear unfinished - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

## Lancashire And Furness

## Published 1909

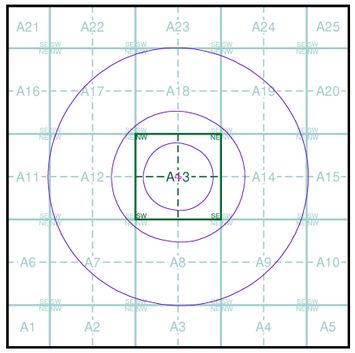

## Source map scale - 1:10,560

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840`s. In 1854 the 1:2,500 scale was adopted for mapping urban areas; these maps were used to update the 1:10,560 maps. The published date given therefore is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas. In the late 1940`s, a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear unfinished - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

## Manchester

## Published 1975

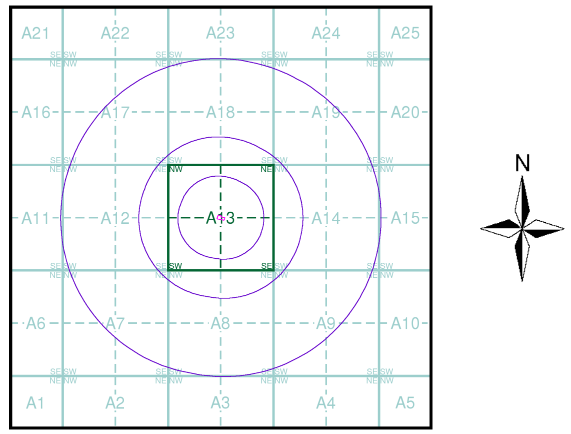

## Source map scale - 1:25,000

These maps were produced by the Russian military during the Cold War between 1950 and 1997, and cover 103 towns and cities throughout the U.K. The maps are produced at 1:25,000, 1:10,000 and 1:5,000 scale, and show detailed land use, with colour-coded areas for development, green areas, and non-developed areas. Buildings are coloured black and important building uses (such as hospitals, post offices, factories etc.) are numbered, with a numbered key describing their use.
They were produced by the Russians for the benefit of navigation, as well as strategic military sites and transport hubs, for use if they were to have invaded the U.K. The detailed information provided indicates that the areas were surveyed using land-based personnel, on the ground, in the cities that are mapped.

## VectorMap Local

## Published 2024

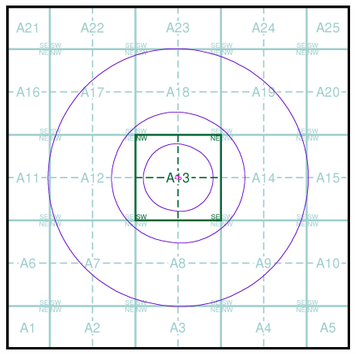

## Source map scale - 1:10,000

VectorMap Local (Raster) is Ordnance Survey's highest detailed 'backdrop' mapping product. These maps are produced from OS's VectorMap Local, a simple vector dataset at a nominal scale of 1:10,000, covering the whole of Great Britain, that has been designed for creating graphical mapping. OS VectorMap Local is derived from large-scale information surveyed at 1:1250 scale (covering major towns and cities),1:2500 scale (smaller towns, villages and developed rural areas), and 1:10 000 scale (mountain, moorland and river estuary areas).

## Lancashire And Furness

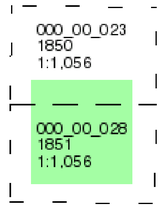

## Published 1850 - 1851

## Source map scale - 1:1,056

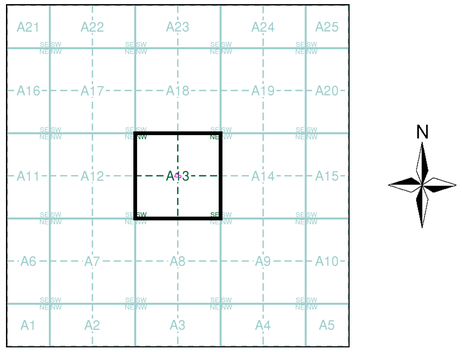

The 1:1056 scale of Ordnance Survey mapping was adopted from Ireland in 1848 and was used to survey towns with a population of over 4000, plus county towns of lesser population, in those counties mapped at the six-inch scale in 1841-55. The scale was the largest scale at which London was mapped by the Ordnance Survey and a 'skeleton' survey of the capital, showing little more than streets, street names, frontages and altitudes, was undertaken between 1848 and 1850. The majority of the 1:1056 surveys were later replaced by 1:500 surveys; although almost all the remainder were revised at this scale, sometimes more than once before 1895. The type of detail shown on the 1:1056 scale is broadly similar to that on 1:500; the apparent omission of minor details such as sewer access points and street lights may be as much a reflection of the generally earlier date of these plans, as of the specification of the map.

Please note: Due to the partial coverage of Historical Town Plans, it is possible that not all segments within an order will contain mapping. Only the segments that have Town Plan coverage will be generated.

# Lancashire And Furness

## Published 1891

## Source map scale - 1:500

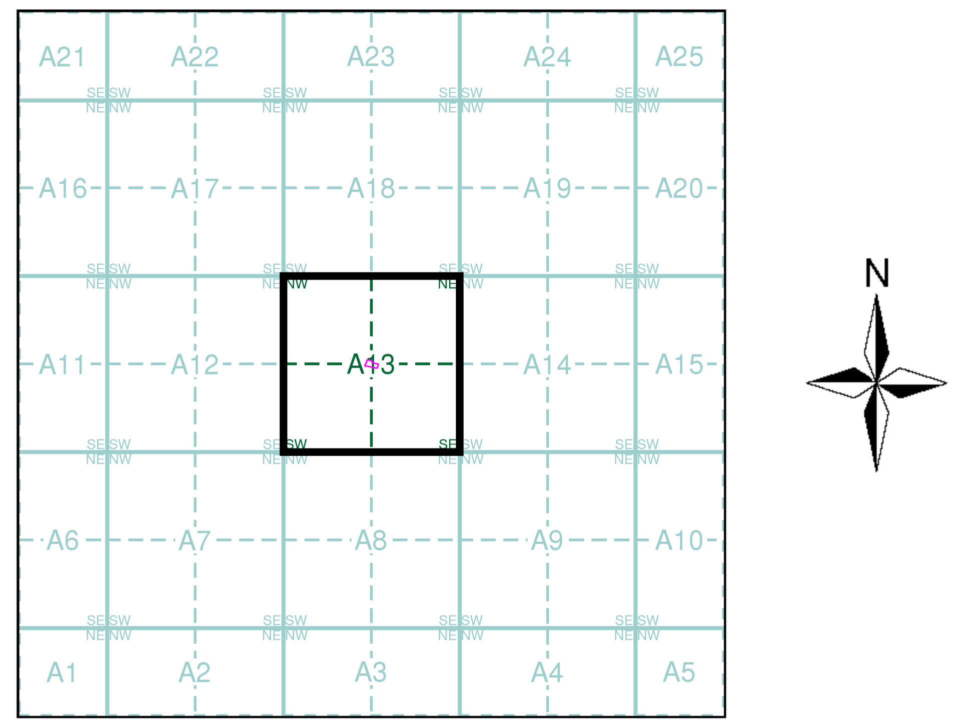

The 1:500 scale Ordnance Survey mapping was introduced in 1855 as a replacement for the 1:528 scale and to compliment the 1:2500 scale that had been implemented in 1853. By 1895, the 1:500 scale covered most towns over a population of about 4000 at the time of survey, although very few towns were mapped more than once at this scale, and none have been since 1910. The 1:500 scale gives particular emphasis to such features as lamp posts, man holes, arched passages and minor building projections. Also often featured are divisions between tenements, interior ground floor layouts of public buildings, and on earlier plans, the functions of the various parts of larger industrial premises are also indicated. Content of the plans does vary however, from one town to the next in terms of, for example, the completeness of railway tracks and the coverage of public buildings.

Please note: Due to the partial coverage of Historical Town Plans, it is possible that not all segments within an order will contain mapping. Only the segments that have Town Plan coverage will be generated.

## Lancashire And Furness

## Published 1892

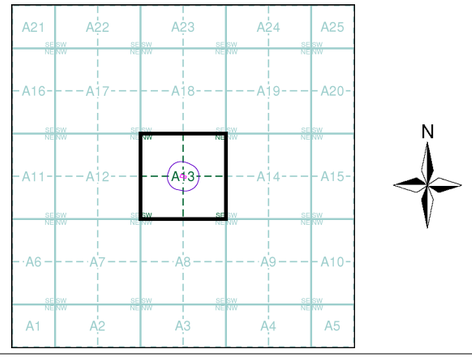

## Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840`s. In 1854 the 1:2,500 scale was adopted for mapping urban areas and by 1896 it covered the whole of what were considered to be the cultivated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

# Supply of Unpublished Survey Information

## Published 1975

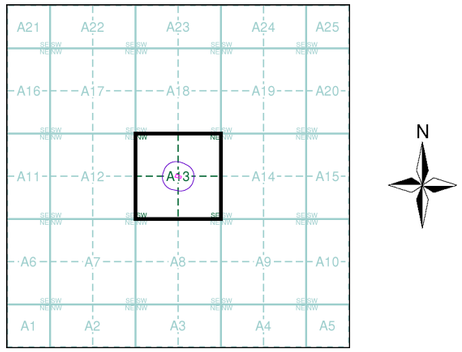

## Source map scale - 1:1,250

SUSI maps (Supply of Unpublished Survey Information) were produced between 1972 and 1977, mainly for internal use at Ordnance Survey. These were more of a `work-in-progress' plan as they showed updates of individual areas on a map. These maps were unpublished, and they do not represent a single moment in time. They were produced at both 1:2,500 and 1:1,250 scales.

# Large-Scale National Grid Data

## Published 1992

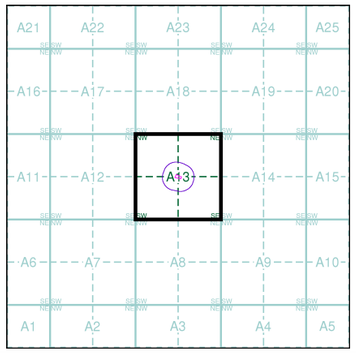

## Source map scale - 1:1,250

'Large Scale National Grid Data' superseded SIM cards (Ordnance Survey's 'Survey of Information on Microfilm') in 1992, and continued to be produced until 1999. These maps were the fore-runners of digital mapping and so provide detailed information on houses and roads, but tend to show less topographic features such as vegetation. These maps were produced at both 1:2,500 and 1:1,250 scales.

## Map Name(s) and Date(s)

| | | |
|---|---|---|
| SJ8398NW 1992 1:1,250 | SJ8398NE 1992 1:1,250 | SJ8498NW 1992 1:1,250 |
| SJ8398SW 1992 1:1,250 | SJ8398SE 1992 1:1,250 | SJ8498SW 1992 1:1,250 |

**Introduction**

The Environment Act 1995 has made site sensitivity a key issue, as the legislation pays as much attention to the pathways by which contamination could spread, and to the vulnerable targets of contamination, as it does the potential sources of contamination.
For this reason, Landmark's Site Sensitivity maps and Datasheet(s) place great emphasis on statutory data provided by the Environment Agency/Natural Resources Wales and the Scottish Environment Protection Agency; it also incorporates data from Natural England (and the Scottish and Welsh equivalents) and Local Authorities; and highlights hydrogeological features required by environmental and geotechnical consultants. It does not include any information concerning past uses of land. The datasheet is produced by querying the Landmark database to a distance defined by the client from a site boundary provided by the client.
In this datasheet the National Grid References (NGRs) are rounded to the nearest 10m in accordance with Landmark's agreements with a number of Data Suppliers.

## Geology 1:50,000 Maps

This report contains geological map extracts taken from the BGS Digital Geological map of Great Britain at 1:50,000 scale and is designed for users carrying out preliminary site assessments who require geological maps for the area around the site. This mapping may be more up to date than previously published paper maps.
The various geological layers - artificial and landslip deposits, superficial geology and solid (bedrock) geology are displayed in separate maps, but superimposed on the final 'Combined Surface Geology' map. All map legends feature on this page. Not all layers have complete nationwide coverage, so availability of data for relevant map sheets is indicated below.

## Geology 1:50,000 Maps Coverage

## Artificial Ground and Landslip

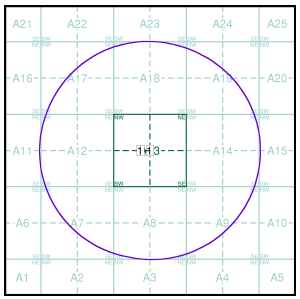

Artificial ground is a term used by BGS for those areas where the ground surface has been significantly modified by human activity. Information about previously developed ground is especially important, as it is often associated with potentially contaminated material, unpredictable engineering conditions and unstable ground.

Artificial ground includes:

- Made ground - man-made deposits such as embankments and spoil heaps on the natural ground surface.
- Worked ground - areas where the ground has been cut away such as quarries and road cuttings.
- Infilled ground - areas where the ground has been cut away then wholly or partially backfilled.
- Landscaped ground - areas where the surface has been reshaped.
- Disturbed ground - areas of ill-defined shallow or near surface mineral workings where it is impracticable to map made and worked ground separately.

Mass movement (landslip) deposits on BGS geological maps are primarily superficial deposits that have moved down slope under gravity to form landslips. These affect bedrock, other superficial deposits and artificial ground. The dataset also includes foundered strata, where the ground has collapsed due to subsidence.

iGeo

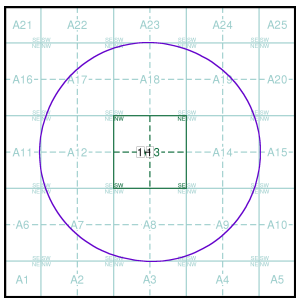

## Superficial Geology

Superficial Deposits are the youngest geological deposits formed during the most recent period of geological time, the Quaternary, which extends back about 1.8 million years from the present.

They rest on older deposits or rocks referred to as Bedrock. This dataset contains Superficial deposits that are of natural origin and 'in place'. Other superficial strata may be held in the Mass Movement dataset where they have been moved, or in the Artificial Ground dataset where they are of man-made origin.

Most of these Superficial deposits are unconsolidated sediments such as gravel, sand, silt and clay, and onshore they form relatively thin, often discontinuous patches or larger spreads.

## Bedrock and Faults

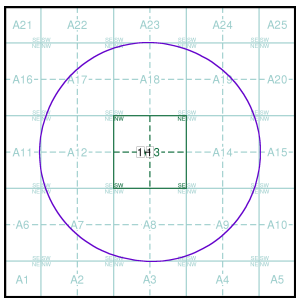

Bedrock geology is a term used for the main mass of rocks forming the Earth and are present everywhere, whether exposed at the surface in outcrops or concealed beneath superficial deposits or water.

The bedrock has formed over vast lengths of geological time ranging from ancient and highly altered rocks of the Proterozoic, some 2500 million years ago, or older, up to the relatively young Pliocene, 1.8 million years ago.

The bedrock geology includes many lithologies, often classified into three types based on origin: igneous, metamorphic and sedimentary.

The BGS Faults and Rock Segments dataset includes geological faults (e.g. normal, thrust), and thin beds mapped as lines (e.g. coal seam, gypsum bed). Some of these are linked to other particular 1:50,000 Geology datasets, for example, coal seams are part of the bedrock sequence, most faults and mineral veins primarily affect the bedrock but cut across the strata and post date its deposition.

## Combined Surface Geology

The Combined Surface Geology map combines all the previous maps into one combined geological overview of your site.

Please consult the legends to the previous maps to interpret the Combined "Surface Geology" map.

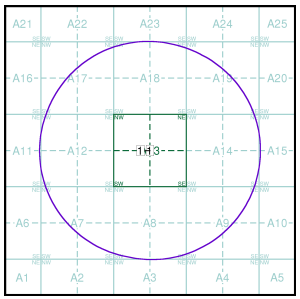

## Additional Information

More information on 1:50,000 Geological mapping and explanations of rock classifications can be found on the BGS website. Using the LEX Codes in this report, further descriptions of rock types can be obtained by interrogating the 'BGS Lexicon of Named Rock Units'. This database can be accessed by following the 'Information and Data' link on the BGS website.

## Index Map

For ease of identification, your site and buffer have been split into Slices, Segments and Quadrants. These are illustrated on the Index Map opposite and explained further below.

**Slice**
Each slice represents a 1:10,000 plot area (2.7km x 2.7km) for your site and buffer. A large site and buffer may be made up of several slices (represented by a red outline), that are referenced by letters of the alphabet, starting from the bottom left corner of the slice "grid". This grid does not relate to National Grid lines but is designed to give best fit over the site and buffer.

**Segment**
A segment represents a 1:2,500 plot area. Segments that have plot files associated with them are shown in dark green, others in light blue. These are numbered from the bottom left hand corner within each slice.

**Quadrant**
A quadrant is a quarter of a segment. These are labelled as NW, NE, SW, SE and are referenced in the datasheet to allow features to be quickly located on plots. Therefore a feature that has a quadrant reference of A7NW will be in Slice A, Segment 7 and the NW Quadrant.

A selection of organisations who provide data within this report:

Envirocheck reports are compiled from 136 different sources of data.

The Coal Authority

# CON29M
## coal mining report

EQUITABLE BUILDING, 28 ST ANN STREET, MANCHESTER, CHESHIRE, M2 7JB

## Known or potential coal mining risks

Future underground coal mining Page 4

## Further action

No further reports from the Coal Authority are required. Further information on any next steps can be found in our Professional opinion.

For more information on our reports please visit www.groundstability.com

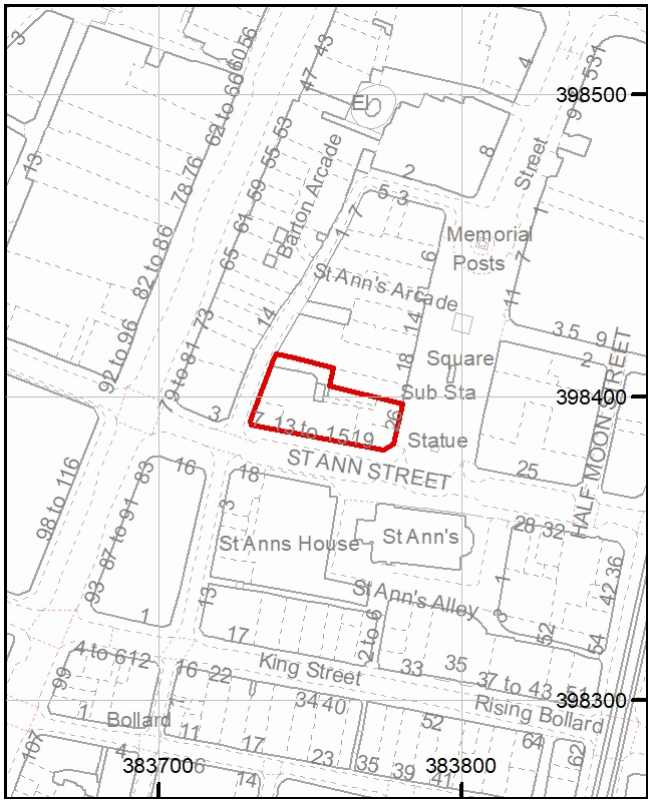

## Professional opinion

According to the official mining information records held by the Coal Authority at the time of this search, evidence of, or the potential for, coal mining related features have been identified. It is unlikely that these features will impact on the stability of the enquiry boundary.

# Enquiry boundary

## Key

Approximate position of enquiry boundary shown

We can confirm that the location is **on the coalfield**

Map data

Reproduced by permission of Ordnance Survey on behalf of HMSO. © Crown copyright and database right 2018. All rights reserved. Ordnance Survey Licence number: 100020315.

This report is prepared in accordance with the latest Law Society's Guidance Notes 2018, the User Guide 2018 and the Coal Authority's Terms and Conditions applicable at the time the report was produced.

## Accessibility

If you would like this information in an alternative format, please contact our communications team on 0345 762 6848 or email communications@coal.gov.uk.

# Professional opinion

## Future development

If development proposals are being considered, technical advice relating to both the investigation of coal and former coal mines and their treatment should be obtained before beginning work on site. All proposals should apply specialist engineering practice required for former mining areas. No development should be undertaken that intersects, disturbs or interferes with any coal or coal mines without first obtaining the permission of the Coal Authority.

MINE GAS: Please note, if there are no recorded instances of mine gas within the enquiry boundary, this does not mean that mine gas is not present within the vicinity. The Coal Authority Mine Gas data is limited to only those sites where a Mine Gas incident has been recorded. Developers should be aware that the investigation of coal seams, mine workings or mine entries may have the potential to generate and/or displace underground gases. Associated risks both to the development site and any neighbouring land or properties should be fully considered when undertaking any ground works. The need for effective measures to prevent gases migrating onto any land or into any properties, either during investigation or remediation work, or after development must also be assessed and properly addressed. In these instances, the Coal Authority recommends that a more detailed Gas Risk Assessment is undertaken by a competent assessor.

If you are looking to develop, or undertake works, within a coal mining development high risk area your Local Authority planning department may require a Coal Mining Risk Assessment to be undertaken by a qualified mining geologist or engineer. Should you require any additional information then please contact the Coal Authority on 0345 762 6848 or email cmra@coal.gov.uk.

# Detailed findings

Information provided by the Coal Authority in this report is compiled in response to the Law Society's CON29M Coal Mining enquiries. The said enquiries are protected by copyright owned by the Law Society of 113 Chancery Lane, London WC2A 1PL.

The Coal Authority owns the copyright in this report and the information used to produce this report is protected by our database rights. All rights are reserved and unauthorised use is prohibited. If we provide a report for you, this does not mean that copyright and any other rights will pass to you. However, you can use the report for your own purposes.

## 1 Past underground coal mining

The property is not within a surface area that could be affected by any past recorded underground coal mining.

## 2 Present underground coal mining

The property is not within a surface area that could be affected by present underground mining.

## 3 Future underground coal mining

The property is not in an area where the Coal Authority has received an application for, and is currently considering whether to grant a licence to remove or work coal by underground methods.

The property is not in an area where a licence has been granted to remove or otherwise work coal using underground methods.

The property is not in an area likely to be affected from any planned future underground coal mining.

However, reserves of coal exist in the local area which could be worked at some time in the future.

No notices have been given, under section 46 of the Coal Mining Subsidence Act 1991, stating that the land is at risk of subsidence.

## 4 Mine entries

There are no recorded coal mine entries known to the Coal Authority within, or within 20 metres, of the boundary of the property.

## 5 Coal mining geology

The Coal Authority is not aware of any damage due to geological faults or other lines of weakness that have been affected by coal mining.

## 6 Past opencast coal mining

The property is not within the boundary of an opencast site from which coal has been removed by opencast methods.

## 7 Present opencast coal mining

The property does not lie within 200 metres of the boundary of an opencast site from which coal is being removed by opencast methods.

## 8 Future opencast coal mining

There are no licence requests outstanding to remove coal by opencast methods within 800 metres of the boundary.

The property is not within 800 metres of the boundary of an opencast site for which a licence to remove coal by opencast methods has been granted.

## 9 Coal mining subsidence

The Coal Authority has not received a damage notice or claim for the subject property, or any property within 50 metres of the enquiry boundary, since 31 October 1994.

There is no current Stop Notice delaying the start of remedial works or repairs to the property.

The Coal Authority is not aware of any request having been made to carry out preventive works before coal is worked under section 33 of the Coal Mining Subsidence Act 1991.

## 10 Mine gas

The Coal Authority has no record of a mine gas emission requiring action.

## 11 Hazards related to coal mining

The property has not been subject to remedial works, by or on behalf of the Coal Authority, under its Emergency Surface Hazard Call Out procedures.

## 12 Withdrawal of support

The property is not in an area where a notice to withdraw support has been given.

The property is not in an area where a notice has been given under section 41 of the Coal Industry Act 1994, cancelling the entitlement to withdraw support.

## 13 Working facilities order

The property is not in an area where an order has been made, under the provisions of the Mines (Working Facilities and Support) Acts 1923 and 1966 or any statutory modification or amendment thereof.

## 14 Payments to owners of former copyhold land

The property is not in an area where a relevant notice has been published under the Coal Industry Act 1975/Coal Industry Act 1994.

# Statutory cover

## Coal mining subsidence

In the unlikely event of any coal mining related subsidence damage, the Coal Authority or the mine operator has a duty to take remedial action in respect of subsidence caused by the withdrawal of support from land or property in connection with lawful coal mining operations.

When the works are the responsibility of the Coal Authority, our dedicated public safety and subsidence team will manage the claim. The house or land owner ("the owner") is covered for these works under the terms of the Coal Mining Subsidence Act 1991 (as amended by the Coal Industry Act 1994). Please note, this Act does not apply where coal was worked or gotten by virtue of the grant of a gale in the Forest of Dean, or any other part of the Hundred of St. Briavels in the county of Gloucester.

If you believe your land or property is suffering from coal mining subsidence damage and you need more information on what to do next, please use the following link to our website which sets out what your rights are and what you need to consider before making a claim.
www.gov.uk/government/publications/coal-mining-subsidence-damage-notice-form

## Coal mining hazards

Our public safety and subsidence team provide a 24 hour a day, 7 days a week hazard reporting service, to help protect the public from hazards caused by past coal workings, such as a mine shaft or shallow working collapse. To report any hazards please call 0800 288 4242. Further information can be found on our website: www.gov.uk/coalauthority.

# Glossary

## Key terms

**adit** - horizontal or sloped entrance to a mine

**coal mining subsidence** - ground movement caused by the removal of coal by underground mining

**Coal Mining Subsidence Act 1991** - the Act setting out the duties of the Coal Authority to repair damage caused by coal mining subsidence

**coal mining subsidence damage** - damage to land, buildings or structures caused by the removal of coal by underground mining

**coal seams** - bed of coal of varying thickness

**future opencast coal mining** - a licence granted, or licence application received, by the Coal Authority to excavate coal from the surface

**future underground coal mining** - a licence granted, or licence application received, by the Coal Authority to excavate coal underground. Although it is unlikely, remaining coal reserves could create a possibility for future mining, which would be licensed by the Coal Authority

**mine entries** - collective name for shafts and adits

**mine gas** - reports of alleged mine gas emissions received by the Coal Authority within the enquiry boundary that subsequently required investigation and action by the Coal Authority to mitigate the effects of the mine gas emission. Please note, if there are no recorded instances of mine gas reported, this does not mean that mine gas is not present within the vicinity. The Coal Authority Mine Gas data is limited to only those sites where a Mine Gas incident has been recorded

**payments to owners of former copyhold land** - historically, copyhold land gave rights to coal to the copyholder. Legislation was set up to allow others to work this coal, but they had to issue a notice and pay compensation if a copyholder came forward

**shaft** - vertical entry into a mine

**site investigation** - investigations of coal mining risks carried out with the Coal Authority's permission

**stop notice** - a delay to repairs because further coal mining subsidence damage may occur and it would be unwise to carry out permanent repairs

**subsidence claim** - a formal notice of subsidence damage to the Coal Authority since it was established on 31 October 1994

**withdrawal of support** - a historic notice informing landowners that the coal beneath their property was going to be worked

**working facilities orders** - a court order which gave permission, restricted or prevented coal mine workings

www.id-geo.co.uk

Dear Mr Harper,

**Equitable Building, 7-9 St Ann Street, Manchester M2 7LG**
**Preliminary (Desk Study) Investigation**

Further to your recent invitation we are pleased to provide a proposal for undertaking a preliminary (desk study) investigation in respect of the above building proposed for redevelopment.

It is understood that the property site is located at 7-9, St Ann Street, Manchester and that the redevelopment of the property relates to a change of use from commercial to residential on the 2nd/3rd floor of the building. The ground floor will remain in its current commercial use.

Based on a brief review of the available information for the above site, we consider that the following geoenvironmental factors are likely to influence the proposed development:

- The site is likely to be underlain by Glaciofluvial Sheet Deposits (sand and gravel) underlain by sandstone bedrock of the Chester Sandstone Formation
- At present historical uses of the site are unknown.
- The site lies within a Coal Mine Reporting Area but is not within a development high risk area.
- The site is not within The Cheshire Brine Subsidence Compensation District.
- A significant risk from gas has not been identified at this stage, however this will be reviewed during the desk study

Our proposal allows for the following scope of works:

- Obtaining and examining site-centred historical Ordnance Survey maps relating to the site and surrounding area.
- Undertaking an examination of published geological and hydrogeological maps.
- Obtaining an environmental database search (Envirocheck, Groundsure or similar).
- Obtaining a mining report from the Coal Authority.
- Undertaking a preliminary contamination risk assessment (PRA) and preparing a preliminary conceptual model for the site.
- Preparing a Preliminary (Desk Study) Investigation Report.
- Issue of an electronic pdf copy of the report.

Dependent on the initial findings of the above standard searches, additional enquiries may be necessary (e.g. obtaining coal shaft records, mine abandonment plans or local authority monitoring data) which may incur additional costs.

We assume that an Ordnance Survey basemap or topographical survey will be provided by the client upon instruction. An OS basemap could be provided, if required, at additional cost.

**Programme**
We can make an **immediate start** on the Desk Study Investigation and anticipate the completed report will be issued within three weeks of your instruction.

It is anticipated that, allowing for receipt of statutory search information, a final electronic report will be available within 3 weeks of receiving your written instruction to proceed. Our fee for provision of this report is **£X** plus VAT.

**Terms and Conditions**
The scope of work outlined in this proposal will be undertaken in accordance with our Standard Terms and Conditions, a copy of which are enclosed. Your attention is drawn to the Sections 8 and 9 of the terms and conditions which relate to provision of Professional Indemnity Insurance and Limitation of Liability respectively. We will be pleased to accept your instruction to proceed as acceptance of this proposal and agreement of our Terms and Conditions.

We understand that our report is solely for the benefit of the PH Property Holdings Ltd. If, however, at a later date, a third party wishes also to rely on the benefit of our report then we will consider any such request. Whether or not we enter into a warranty with a third party will be at our discretion, and subject to payment of a fee to cover our legal and incidental costs. We will also require approval from our insurers should more than one beneficiary require a warranty, or should the proposed warranty not be in our approved standard form.

It is hoped the above is sufficient for your present needs. However, should you require any further information, please contact the undersigned.

Yours sincerely,

Liam Murphy
BSc (Hons) Geology, CGeol, FGS
Principal Geoenvironmental Engineer
**for and on behalf of**
**iD GEOENVIRONMENTAL LIMITED**

# Terms and Conditions for the Appointment of iD Geoenvironmental Limited

*V010*

**1 DEFINITIONS AND INTERPRETATION**

1.1 In this Agreement, unless the context otherwise requires, the following words and expressions have the following meanings:

"IDG" shall mean ID Geoenvironmental Limited whose registered offices are at Dane Mill Business Centre, Broadhurst Lane, Congleton, Cheshire, CW12 1LA.

"Agreement" shall mean these Terms (entitled "Terms and Conditions for the Appointment of ID Geoenvironmental Limited"), the Proposal, any document recording the Client's unequivocal acceptance of the Proposal and any other documents or parts of other documents expressly referred to in any of the foregoing;

"Client" shall mean the party for whom the Services are being provided by IDG;

"Documents" shall mean all documents of any kind and includes plans, drawings, reports, programmes, specifications, Bills of Quantities, calculations, letters, e-mails, faxes, memoranda, films and photographs (including negatives), or any other form of record prepared or provided or received by, or on behalf of IDG, and whether in paper form or stored electronically or on disk, or otherwise;

"Intellectual Property" includes all rights to, and any interests in, any patents, designs, trade marks, copyright, know-how, trade secrets and any other proprietary rights or forms of intellectual property (protectable by registration or not) in respect of any technology, concept, idea, data, programme or other software (including source and object codes), specification, plan, drawing, schedule, minutes, correspondence, scheme, formula, programme, design, system, process logo, mark, style, or other matter or thing, existing or conceived, used, developed or produced by any person;

"Parties" shall mean the Client and IDG;

"Project" shall mean the project described in the Proposal and any enquiry from the Client on which IDG has based its Proposal;

"Proposal" means the offer document prepared by IDG in response to an enquiry or otherwise, in connection with the proposed provision of the Services;

"Services" means the work and services relating to the Project to be provided by IDG pursuant to the Agreement and as set out in the Proposal and shall include any additions or amendments thereto made in accordance with these Terms;

"Terms" means these terms entitled "Terms and Conditions for the Appointment of IDG";

1.2 Words importing the singular only shall also include the plural and vice versa, where the context requires.

1.3 Words importing persons or parties shall include firms, corporations and any organisation having legal capacity and vice versa, where the context requires; and words importing a particular gender include all genders.

1.4 The sub-headings to the clauses of these Terms are for convenience only and shall not affect the construction of the Agreement.

1.5 A reference to legislation includes that legislation as from time to time amended, re-enacted or substituted and any Orders in Council, orders, rules, regulations, schemes, warrants, by-laws, directives or codes of practice issued under any such legislation.

1.6 In the event of conflict between the documents forming part of the Agreement, the Proposal shall prevail, followed by the Terms.

**2 APPOINTMENT & OBLIGATIONS OF IDG**

2.1 The Client agrees to engage IDG and IDG agrees to provide the Services in accordance with the provisions of the Agreement.

2.2 IDG shall perform the Services using the reasonable standard of skill and care normally exercised by similar professional consultancy firms in performing similar services under similar conditions and shall use all reasonable endeavours to perform the Services in accordance with all relevant environmental and safety legislation.

**3 OBLIGATIONS OF THE CLIENT**

3.1 Throughout the period of this Agreement the Client shall afford to IDG or procure the affording to IDG of access to any site where access is required for the performance of the Services. In doing so, the Client accepts responsibility for ensuring that IDG is notified in writing of all special site and/or plant conditions, including without prejudice to the generality of the foregoing, the existence and precise location of all underground services, cables, pipes, drains or underground buildings, constructions or any hazards known or suspected by the Client, which the Client shall clearly mark on the ground or identify on accurate location plans supplied to IDG prior to the commencement of the Services. The Client shall also inform IDG in writing of any relevant operating procedures including any site safe operating procedures and any other regulations relevant to the carrying out of the Services. The Client shall indemnify IDG against all costs, claims, demands and expenses arising as a result of any non-disclosure in this respect, including but not limited to indemnification against any action brought by the owner of the land or otherwise. Whilst IDG will scan all potential exploratory locations with a Cable Avoidance Tool, IDG shall not be liable for any damage to underground services, cables, pipes, drains or underground buildings, constructions and the like which were either not marked on site or for which accurate plans were not provided.

3.2 If the Client discovers any conflict, defect or other fault in the information or designs provided by IDG pursuant to the Agreement, he will advise IDG in writing of such defect, conflict or other fault and IDG shall have the right to rectify the same or where necessary, to design the solution for rectification of any works carried out by others pursuant the conflicting, defective or in any other way faulty information or designs.

**4 INTELLECTUAL PROPERTY**

4.1 The copyright in all Intellectual Property prepared by or on behalf of IDG shall remain vested in IDG. The Client shall have a non-exclusive licence to copy and use such Intellectual Property for purposes directly related to the Project. Such licence shall enable the Client to copy and use the Intellectual Property but solely for its own purposes in connection with the Project and such use shall not include any licence to reproduce any conceptual designs or professional opinions contained therein nor shall it include any license to amend any drawing, design or other Intellectual Property produced by IDG.

4.2 Should the Client wish to use such Intellectual Property in connection with any other works or for any other purpose not directly related to the Project or wish to pass any Intellectual Property to any third party, it must obtain the prior written consent of IDG. The giving of such consent shall be at the discretion of IDG and shall be upon such terms as may be required by IDG. IDG shall not be liable for the use by any person of such Intellectual Property for any purpose other than that for which the same were prepared by or on behalf of IDG.

4.3 Ownership of any proposals submitted to the Client that are not subsequently confirmed as part of the Services to be provided for the Client remain with IDG and such proposals must not be used as the basis for any future work undertaken by the Client or a third party and no liability can be accepted howsoever arising from such proposals.

4.4 In the event of the Client being in default of payment of any fees or other amounts due, IDG may suspend further use of the licence on giving 2 days' notice of the intention to do so. Use of the licence may be resumed on receipt of the outstanding amounts.

**5 TITLE**

6.1 IDG shall transfer only such title or rights in respect of the Documents as it has, and if any part is purchased from a third party IDG shall transfer only such title or rights as that party had and has transferred to IDG.

6.2 Title in the Documents shall remain with and shall not pass to the Client until the amount due under the invoice(s) (including interest and costs) has been paid in full.

**6 CONFIDENTIALITY**

6.1 IDG undertakes not to divulge or disclose to any third party without the written consent of the Client information which is designated confidential by the Client or which can reasonably be considered to be confidential and arises during the performance of the Services unless required to do so by law or necessary in the proper performance of its duties in relation to the Project, or in order to make full frank and proper disclosure to its insurers or intended insurers, or to obtain legal or accounting advice. Subject to this IDG shall be permitted to use information related to the Services it provides in connection with the Project for the purposes of marketing its services and in proposals for work of a similar type.

**7 THIRD PARTIES**

7.1 The Agreement or any part thereof or any benefit or interest there-under may not be assigned by the Client without the prior written consent of IDG. The giving of such consent shall be at the discretion of IDG and IDG will only agree to an assignment on its terms and in return for payment of a fee by the Client to IDG to cover IDG's legal and other costs associated with any assignment. IDG will consider and may consent to any request from the Client for IDG to enter a collateral warranty with a third party with regard to the Services provided under the Agreement. The giving of such consent shall be at the discretion of IDG and IDG will only enter a collateral warranty on its terms and in return for payment of a fee by the Client to IDG to cover IDG's legal and other costs associated with any collateral warranty.

7.2 The Agreement shall not confer and shall not purport to confer on any third party any benefit or any right to enforce any term of this Agreement for the purposes of the Contracts (Rights of Third Parties) Act 1999 or otherwise.

**8 INSURANCE**

8.1 IDG warrants to the Client that there is in force a policy of Professional Indemnity insurance covering its liabilities for negligence under this Agreement, with a limit of indemnity of £2,000,000 (TWO MILLION POUNDS) but subject to separate annual aggregate limits of indemnity in respect of pollution/contamination claims of £2,000,000 and asbestos (£1,000,000). This policy is annually renewable and IDG agrees to use reasonable endeavours to maintain such insurance at all times until six years from the date of the completion (or termination) of the Services under the Agreement, provided such insurance is available at commercially reasonable rates having regard, inter alia, to premiums required and policy terms obtainable. If for any period such insurance is not available at commercially reasonable rates, IDG shall forthwith inform the Client and shall obtain in respect of such period such reduced level of Professional Indemnity insurance as is available and as would be fair and reasonable in the circumstances for IDG to obtain.

**9 LIMITATIONS ON LIABILITY**

9.1 Unless otherwise agreed in writing, IDG's liability under or in connection with the Agreement whether in contract, tort, negligence, breach of statutory duty or otherwise (other than in respect of personal injury or death) shall be limited to and shall not exceed the lesser of either two million pounds or 20 times the total value of invoices issued to the Client for consultancy work instructed under the Agreement. IDG's liability in connection with any claim relating to asbestos shall not exceed £1,000,000. No action or proceedings under or in respect of the Agreement whether in contract, tort, negligence, under statute or otherwise shall be commenced against IDG after the expiry of a period of six years from the date of the completion (or termination) of the Services under the Agreement.

9.2 IDG shall not be liable for the cost of rectifying any defect, conflict or other fault in the information or designs provided by IDG or for the cost of designing a solution for and rectifying any subsequent works carried out by others pursuant to the conflicting, defective or in any other way faulty information or designs, unless IDG has been advised in writing of the same by the Client and has been given the opportunity to rectify the same or where necessary, to design the solution for rectification of any subsequent works carried out by others pursuant to the same.

**10 PAYMENT**

10.1 Invoices for services rendered will be submitted for payment in accordance with the Proposal. The due date for payment is the date of the invoice and the final date for payment is 14 days from the date of the invoice. If the Client disputes the amount included for payment in an invoice a written notice must be served on IDG by the Client not later than 7 days before the final date for payment. If no notice is given the amount due shall be the amount stated in the invoice. If the Client shall fail to pay in full any sum due under the terms of the Agreement by the final payment date for that sum and no effective notice of intention to withhold payment has been issued, IDG may serve written notice on the Client demanding payment within 14 days of such notice. If the Client shall fail to comply with such notice, IDG shall be entitled to terminate its employment under the Agreement forthwith.

10.2 In the event of failure on the part of the Client to pay any monies in accordance with the foregoing payment provisions, IDG will be entitled to charge interest on any monies owed to it by the Client, such interest to be at a rate of 8% above the base rate of a clearing bank from time to time calculated from the final date for payment to the date of actual payment on a compound basis. IDG will also be entitled to claim any additional costs in collecting the debt plus compensation for time spent.

**11 DELAY**

11.1 IDG will comply with any timescale agreed for completion of the Services unless delayed or prevented by circumstances beyond its reasonable control and in the event of any such circumstances arising IDG undertakes to complete the Services within a reasonable period, but will not be liable to the Client for any delay as a result.

**12 TERMINATION**

12.1 The Agreement may be determined by either party in the event of the other making a composition or arrangement with its creditors, becoming bankrupt, or being a company, making a proposal for a voluntary arrangement for a composition of debts, or has a provisional liquidator appointed, or has a winding-up order made, or passes a resolution for voluntary winding-up (except for the purposes of a bona fide scheme of amalgamation or reconstruction), or has an administrator or an administrative receiver appointed to the whole or any part of its assets. Notice of determination must be given to the party which is insolvent by the other party.

12.2 If for any reason the performance of the Services by IDG is suspended for a period in excess of three calendar months then IDG shall be entitled to determine its appointment in respect of the Services by seven days written notice to the Client.

12.3 Any determination of the appointment of IDG howsoever caused shall be without prejudice to the right of IDG to require payment for all services performed up to the date of such determination including but not limited to payment of a fair and reasonable proportion of any figure identified in the Proposal or otherwise for fees in respect of a particular service which IDG has started, but not completed.

**13 NOTICES**

13.1 Any notice provided for in the Agreement shall be in writing and shall be deemed to be properly given if delivered by hand or sent by first class post to the address of the relevant party as may have been notified by each party to the other or, in the absence of notification, to the address of IDG set out above or to the registered address of the Client. Such notice shall be deemed to have been received on the day of delivery if delivered by hand or on the second working day after the day of posting if sent by first class post.

**14 ENTIRE AGREEMENT**

14.1 The Agreement constitutes the complete and entire agreement between the Client and IDG with respect to the Services and supersedes any prior oral and/or written warranties, terms, conditions, communications and representations, whether express or implied and any claim against IDG in respect of the Services can only be made in contract under the provisions of the Agreement and not otherwise under the law or tort or otherwise. IDG will not be bound by any standard or printed terms or conditions furnished by the Client in any of its documents unless IDG specifically states in writing separately from such documents that it intends such terms and conditions to apply.

14.2 No amendments, modifications or variation of the Agreement shall be valid unless made in writing and agreed to by both the Client and IDG; such agreement must be recorded in writing by at least one of the Parties.

**15 DISPUTES AND GOVERNING LAW**

15.1 The Agreement shall be governed by and construed in accordance with English law and the Parties irrevocably and unconditionally submit to the jurisdiction of the English Courts.

15.2 Where the Housing Grants, Construction and Regeneration Act 1996 applies, any dispute between the Parties may be referred to adjudication in accordance with The Scheme for Construction Contracts Regulations 1998 or any amendment or modification thereof being in force at the time of the dispute, as applicable to England, Wales, Scotland and Northern Ireland.

Appendix E

**Generic Notes – ID Geoenvironmental Investigations**

## Environmental Setting

### General

Third party information obtained from the British Geological Survey (BGS), the Coal Authority and the Local Authority etc is presented in the Correspondence Appendix of this Geoenvironmental Report.

### Geology, Mining & Quarrying

In order to establish the geological setting of a site, ID Geoenvironmental refer to BGS maps for the area, and the relevant geological memoir.

A coal mining report is obtained from the Coal Authority. Further information is sourced from the Local Authority and by reference to current and historical OS plans.

### Landfills and other Historical Land Uses

ID Geoenvironmental obtain data from the either Landmark Information Group or Groundsure, and if required from the Environment Agency and the Local Authority with respect to known areas of landfilling within 250m of the proposed development site. Reference is also made to historical OS plans, which are inspected for evidence of backfilled quarries, railway cuttings, colliery spoil tips etc.

Historical maps dating from the middle of the nineteenth century are also studied for evidence of historical land uses (i.e. gas works, foundries, chemical works) which may represent potential sources of contamination or ground instability.

### Radon

Radon is a colourless, odourless gas, which is radioactive. It is formed in strata that contain uranium and radium (most notably granite), and can move though fissures eventually discharging to atmosphere, or the spaces under and within buildings. Where radon occurs in high concentrations, it can pose a risk to health.

Radon Affected Areas are designated by the UK Health Security Agency (UKHSA). UKHSA advise that radon concentrations should be measured in all properties located within Radon Affected Areas.

The risk of proposed properties being affected by radon has been assessed by reference to the information presented in the Groundsure Geoinsight Report or Landmark Report. The search data is based on a BGS radon dataset with a 75m resolution.

Radon potential maps published online by UKHSA (www.ukradon.org) are of a significantly lower resolution and show the worst-case radon potential within a 1km grid square.

Further details of the protective measures required, if appropriate, are provided in the Hazardous Gas section of this Geoenvironmental Report.

**Hydrogeology**

ID Geoenvironmental obtain information from the Environment Agency (EA) and the Landmark Information Group with respect to:

- groundwater quality
- recorded pollution incidents
- licensed groundwater abstractions

From 1 April 2010 the Environment Agency's Groundwater Protection Policy uses aquifer designations that are consistent with the Water Framework Directive. These designations reflect the importance of aquifers in terms of groundwater as a resource (drinking water supply) but also their role in supporting surface water flows and wetland ecosystems.

The aquifer designation data is based on geological mapping provided by the British Geological Survey.

These maps are split into two differing aquifer designations:

- **Superficial (Drift)** – permeable unconsolidated (loose) deposits such as sands and gravels.
- **Bedrock** – solid permeable formations such as sandstone, chalk or limestone.

The maps display the following aquifer designations:

- **Principal aquifers:** *"These are layers of rock or drift deposits that have high intergranular and/or fracture permeability - meaning they usually provide a high level of water storage. They may support water supply and/or river base flow on a strategic scale. In most cases, principal aquifers are aquifers previously designated as major aquifer"*.
- **Secondary A** – *"permeable layers capable of supporting water supplies at a local rather than strategic scale, and in some cases forming an important source of base flow to rivers. These are generally aquifers formerly classified as minor aquifers";*
- **Secondary B** - *predominantly lower permeability layers which may store and yield limited amounts of groundwater due to localised features such as fissures, thin permeable horizons and weathering. These are generally the water-bearing parts of the former non-aquifers*
- **Unproductive Strata**: *These are rock layers or drift deposits with low permeability that have negligible significance for water supply or river base flow. However groundwater flow through such rocks, although imperceptible, does take place and needs to be considered in assessing the risk associated with persistent pollutants. Some non-aquifers can yield water in sufficient quantities for domestic use".*

Groundwater vulnerability is determined by 4 variables:

1. The presence and nature of overlying soil (the weathered zone affected by living organisms; soil in the UK can extend up to 2m in depth). Physical properties of the soil affect the

downward passage of water and it's ability to attenuate pollutants. The EA make reference to a three-fold classification of soil types:-

- Soils of **low** leaching potential are defined as *"soils in which the pollutants are unlikely to penetrate the soil layer because either water movement is largely horizontal, or they have the ability to attenuate diffuse pollutants".*
- Soils of **intermediate** leaching potential are defined as *"soils which have a moderate ability to attenuate diffuse source pollutants or in which it is possible that some non-adsorbed diffuse source pollutants and liquid discharges could penetrate the soil layer".*
- Soils of **high** leaching potential are defined as *"soils with little ability to attenuate diffuse source pollutants and in which non-adsorbed diffuse source pollutants and liquid discharges have the potential to move rapidly to underlying strata or to shallow groundwater".*

In urban areas and restored mineral workings the soil information is based on fewer observations than elsewhere. A worst-case vulnerability (H) is therefore assumed for these areas and for current mineral workings by the EA. All are given a designation of **HU** unless proved otherwise.

2. The presence and nature of Drift, which often overlies bedrock. Where Drift is of substantial thickness and low permeability, it can provide an effective barrier to surface pollutant migration. Permeable Drift is classified as a Minor Aquifer except where it is in probable hydraulic continuity with a Major Aquifer, where it is regarded as part of the Major Aquifer unless proven otherwise by site investigation.

3. The nature of the geological strata (bedrock). Rocks that contain groundwater in exploitable quantities are called aquifers.

4. The depth of the unsaturated zone; i.e. that part of the aquifer which lies above the water table

The EA have also designated Source Protection Zones, which are based on proximity to a groundwater source (springs, wells and abstraction boreholes). The size of a Source Protection Zone is a function of the aquifer, volume of groundwater abstracted and the effective rainfall, and may vary from tens to several thousand hectares.

**Hydrology**

ID Geoenvironmental obtain information from the Environment Agency and the Landmark Information Group with respect to:

- surface water quality
- recorded pollution incidents
- licensed abstractions (groundwater & surface waters)
- licensed discharge consents
- site susceptibility to flooding

The EA have set **water quality** targets for all rivers. These targets are known as River Quality Objectives (RQO's). The water quality classification scheme used to set RQO planning targets is known as the River Ecosystem scheme. The scheme comprises five classes (RE1 to RE5) which

reflect the chemical quality requirements of communities of plants and animals occurring in our rivers.

General Quality Assessment (GQA) grades reflect actual water quality. They are based on the most recent analytical testing undertaken by the EA. There are six GQA grades (denoted A to F) defined by the concentrations of biochemical oxygen demand, total ammonia and dissolved oxygen.

The susceptibility of a site to **flooding** is assessed by reference to a Flood Map on the Environment Agency's website. These maps provide show natural floodplains - areas potentially at risk of flooding if a river rises above its banks, or high tides and stormy seas cause flooding in coastal areas.

There are two different kinds of area shown on the Flood Map:

1. Dark blue areas could be flooded by the sea by a flood that has a 0.5% (1 in 200) or greater chance of happening each year, or by a river by a flood that has a 1% (1 in 100) or greater chance of happening each year

2. Light blue areas show the additional extent of an extreme flood from rivers or the sea. These outlying areas are likely to be affected by a major flood, with up to a 0.1% (1 in 1000) chance of occurring each year.

These two colours show the extent of the natural floodplain if there were no flood defences or certain other manmade structures and channel improvements

The maps also show all flood defences built in the last five years to protect against river floods with a 1% (1 in 100) chance of happening each year, or floods from the sea with a 0.5% (1 in 200) chance of happening each year, together with some, but not all, older defences and defences which protect against smaller floods.

The Agency's assessment of the likelihood of flooding from rivers and the sea at any location is based on the presence and effect of all flood defences, predicted flood levels, and ground levels.

It should also be noted that as the floodplain shown is the 1 in 100 year (or 1 in 200 year as appropriate), areas outside this may be flooded by more extreme floods (e.g. the 1 in 1000 year flood). Also, parts of the areas shown at risk of flooding will be flooded by lesser floods (e.g. the 1 in 5 year flood). In some places due to the shape of the river valley, the smaller floods will flood a very similar extent to larger floods but to a lesser depth.

If a site falls within a floodplain, it is recommended that a flood survey be undertaken by a specialist consultant who can advise on appropriate mitigating measures; ie raising slab levels, provision of storage etc.

Furthermore, as discussed in Planning Policy Statement 25 (PPS25) a consequence of amendment 8 to Article 10 of The Town and Country Planning (General Development Procedure) Order 1995 ("the GDPO"), on 1st October 2006, LPAs are required to consult the Environment Agency on all applications for development in flood risk areas (except minor development), including those in areas with critical drainage problems and for any development on land exceeding 1 hectare outside flood risk areas.

## COMAH & Explosive Sites

ID Geoenvironmental obtain information from the Landmark Information Group with respect to COMAH or explosive sites within 1km of the proposed development site. MMi's report refers to any that are present, and recommends that the Client seeks further advice from the HSE.

Areas around COMAH sites (chemical plants etc) are zoned with respect to the implementation of emergency plans. The HSE are a statutory consultee to the local planning authority for all COMAH sites. The COMAH site may have to revise it's emergency action plan if development occurs. This might be quite straightforward or could entail significant expenditure. Consequently, the COMAH site may object to a proposed development (although it is the Local Authority who have final say, and they are likely to place more weight on advice from the HSE).

## Preliminary Conceptual Ground Model

The site's environmental setting (and proposed end use) is used by ID Geoenvironmental to assess the significance of any contamination encountered during the subsequent ground investigation

Assessment of contaminated land is based on an evaluation of pollutant linkages (source-pathway-receptor). Contaminants within the near surface strata represent a potential source of pollution. The environment (most notably groundwater), site workers and end users are potential targets.

Potential pollutant linkages are shown on a preliminary conceptual site model, presented as a Drawing in an Appendix to this Geoenvironmental Report. The preliminary model is revised in light of data arising from the subsequent ground investigation.
