Description

Please describe details of the proposed development or works including any change of use

The proposed development is a residential scheme designed to align with the surrounding building scale and characteristics. It consists of two storeys, each accommodating two apartments with two bedrooms and two bathrooms per unit. Additionally, the proposal includes two apartments within the mansard featuring discreet dormer windows.

The main entrance, centrally positioned and facing Abbey Hey Lane, provides access to a central distribution core. A secondary rear entrance is located for convenience near the car parking area at the back of the property. The scheme also includes landscaping and ancillary works to enhance the overall site.

To assist in answering this question correctly, please refer to the help text which provides guidance on determining if any important biodiversity or geological conservation features may be present or nearby; and whether they are likely to be affected by the proposals.

- ☐ Yes, on the development site
☐ Yes, on land adjacent to or near the proposed development
☒ No

Supporting information requirements

Where a development proposal is likely to affect features of biodiversity or geological conservation interest, you will need to submit, with the application, sufficient information and assessments to allow the local planning authority to determine the proposal.

Failure to submit all information required will result in your application being deemed invalid. It will not be considered valid until all information required by the local planning authority has been submitted.

Your local planning authority will be able to advise on the content of any assessments that may be required.

Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why the requirement does not apply to the development.

[Find out more about biodiversity.net.gain, and access digital tools from our partners that can help determine if you are exempt, or produce the biodiversity metric information required.](#)

Do you believe that, if the development is granted permission, the general Biodiversity Gain Condition (as set out in [Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 \(as amended\)](#)) would apply?

- ☐ Yes
- ☒ No

Biodiversity net gain has been introduced as a general condition for planning permission. As set out in [The Environment Act 2021](#): "grants of planning permission in England [are] to be subject to a condition to secure that the biodiversity gain objective is met". Therefore, in England, all planning permissions are generally subject to biodiversity gain rules, unless they are specifically exempt or out of scope.

If you have stated that the biodiversity net gain requirement does not apply to your application you must provide the reason(s) why, and may also need to supply evidence (especially where you believe the application is eligible for the 'de minimis' exemption).

You can use our partner's free online tool to determine if you are exempt and to produce detailed reasons

Please add all the reasons why biodiversity net gain does not apply and enter a justification for each one

Reason biodiversity net gain does not apply:

Development subject to the de minimis exemption (development below the threshold)

What best describes the size of your site?:

Over 25 square metres

Please justify the reason why biodiversity net gain does not apply:

Reason Why Biodiversity Net Gain (BNG) Does Not Apply: The site, currently vacant, formerly housed the Abbey Hey Hotel, which was demolished circa 2009. The majority of the site was occupied by the hotel's footprint, with tarmacked areas to the side and rear for vehicular access and parking. As shown in the site photos, the land was effectively wholly tarmacked, and following the hotel's demolition, loose rubble was left behind. Over time, only low-quality shrubs have grown. Due to these factors, although the site exceeds 25 sqm, it does not provide a functional onsite habitat in its existing condition. Furthermore, the proposal includes the creation of a small rear communal garden, which will enhance the biodiversity habitat, improving the site's ecological contribution.

Note: Please read the help text for further information why developments may be exempt or not in scope.

Foul Sewage

Please state how foul sewage is to be disposed of:

- ☒ Mains sewer

Waste Storage and Collection

- ☒ Yes
☐ No

If Yes, please provide details:

A screened bins area is provided at the rear of the property. It is easily accessible, close to the rear exist path and not visible from the main street. The refuse vehicle can easily revert into the site vehicular access and the bins area/collection point is easily accessible.

Have arrangements been made for the separate storage and collection of recyclable waste?

- ☒ Yes
☐ No

If Yes, please provide details:
